

I'm not robot

Continue

Eli computer guy voip

Is going to use TCP/IP. So now instead of having a telephone The server. is. is, regardless For. Avaya wants to sell you both the telephone system and all the phones, call boxes, etc. that go with it. BKC It's a good business practice for them, but I hate it. The way they are able to do so is they can use their proprietary protocols that no one else has. So don't bid Use a protocol to talk. So it's not TCP/IP. This is Not that there are the best codecs you can use. So the sound quality is probably going to be pretty good and it will probably be more than what you need, but but Are not going to be able to make or the quality will be plenty. Start, start as soon as I start talking. The same allows you to use a telephone. We talked about entrances. So the gateways are what are the normal to connect voices on the IP world Talking to, it's 45
