Land of convergence mhw guide

This is it; This is the final quest of the game where you will face a very dangerous elder dragon. If you want to kill it and quit the game, then see the guide below: Practice: Finally, the final exploration of the game you will get to see the credits after completing it. You are about a very dangerous dragon that will not go down easily. Besides, since this is the last quest, you will definitely face a lot of difficulties to complete it. So the goal is to be a very tough opponent and be careful when you fight it so you can kill a dragon called Genojiba. Anyway, if you successfully complete the goal, you will be rewarded with a generous amount of 19800z you're the last to defeat this monster. You will receive a 50 minute window to defeat the monster, but if you don't, you will fail the quest. If you are stunned three times during a quest, it will fail. Finally, you'll have a hunter rank of 15 that you should now. Anyway, as the basics of the method, let's start the quest: - create patches of hot ground that will set you on fire though you don't have to pack the less heavy equipment you're facing. So with that in mind, it makes sense to have resistance equipment that will make it easier for you to fight and make this annoying to get out. If you face Genojiva, it will be for newborns, but its size will be strict. So it's still a good time to stop it as you can get infants or other Zorah Magdaros. - At the beginning of the battle, you will find yourself on a fair-sized battlefield with flat and no features worth noting. Genojiba's usual attacks include tail smashes, which can drop the tail to the ground, but can be avoided if you don't stand behind it. It can also perform limb damage that will do minor damage despite the huge limbs. - One of the most harmful attacks Genojiba can carry out is where he pushes his legs back and then his arms forward and glides forward a good distance. This attack can cause great damage, so if you see it rolling up the back or sideways. And in addition to these physical attacks, Xeno'Jiiva can also spit out several types of energy explosions. - Genojiba's head, tail and head accept damage best. But both can be very difficult targets. The safest target is the forelimbs, which are less vulnerable but easier to target. It is not weak or strong for any disease, but poison and explosive diseases can be effective. So while keeping these things in mind, the monster fightYe will soon be able to kill. At the end of the quest, you'll receive a reward and credits will begin. This means the end of the story. You must log in or register here. | Monster Hunter World: How to unlock high-level quests, rewards, weapons, and armor? Streaming Video and TV 1 October 5, 2018 | Monster Hunter World - Hunting Demon Quest Guide Streaming Video and TV 0 October 5, 2018 Convergence Land is an allotment quest from Monster Hunter World (MHW). A lot of energy flows through the New World, and we've found where it all leads. Go with a job seeker and find out what's there. The Sapphire Star can guide us all. Objective convergence information conditions: HR 15 or later failure conditions: time expires, faint 3 times. The Admiral will be asked with him to investigate the joining of fate where you go and tremendous energy is detected. To help the New World balance, we need to accompany the Admiral and investigate the area to deal with the cause of the disturbance. The goal is to follow all objectives, including fighting Genojiba, which was later revealed during the quest. WalkthroughYes you must first start at the camp and later head to the job seekers who will talk to you to start the cutscenes that give you a face with Geno Jiba. At the end of the cutscenes, you have to fight the monster because the admiral escaped to bring the job seeker to the safe. As you begin to fight Genojiva and try to survive as much as your target may suspect, you'll eventually have to kill the monster as long as you do as much damage as possible. Attack some of the genojiba you can, mainly deal with some damage if in the first place the legs can not reach other parts. After suffering significant damage, Genojiba has to wait

for a few seconds before being blown away and transported through Wingdrake. If you continue to attack Xenojiva, you will weaken and weaken until you can finally kill it. Genojiba will no longer run and will end the quest if he dies fighting until he dies. Quest Rewards After you've killed Genojiva, the Land of Convergence quest ends and you'll receive 19,800 Jenny completes Monster Hunter World story mode and you'll be able to remove and start removing your Hunter Rank cap or continue later with a prompt to buy Monster Hunter World: Xs.tips instead of Iceborne.TipsDo, which will be interrupted and prevented from taking damage later if you carefully deploy the attack and take time to stumble or recover from the attack. Genojiba is very big and will be difficult to attack at times because it towers over the character, and it's a good thing to target your legs before targeting your tail or head. When Genojiba starts rushing for attacks, you can take the time to run for the attack, sharpen your weapons, or use items before attacking to save time and move on. This website uses cookies to enhance your experience. We assume you're ok with this, but you can opt out if you want. Cookie Setting Permission Fribersy & Cookie Policy Final Mission, Land of Convergence, unlocks when you shoot three quests that have taken down three elder dragons - Kushala Daora, Baak Hajk and Theostra.With three completions and quests underway, you will face a giant creature without a name - which will later be revealed as Xenojiva. In terms of preparation, if you've shot down three elder dragons, there's nothing to stop you finishing the game. Encounters play out differently from other battles, but you'll be more than ready to march and see the end credits. Genojiba weakness: fire - medium distance - - Medium Dragon - Medium Dragon - Medium Dog - High Sleep - NullMaby - Jerblast - Medium - Lowe This unnamed monster is Geno Ziva, and the biggest monster you'll face (if you don't count Zora Makdaros, apparently). This is a two-stage battle. The first is very simple - a giant dragon must step around the stadium and attack its weaknesses by treading around the shiny blue part of its body on its head, fore feet and tail. The attack is mainly an array of powerful lasers taken from the front foot slam, swipe and head that can cover the entire arena or a particular direction. Either way they are well telegraphed, and it is a case of rushing into the dragon's side - ideally from an angle - and getting closer to avoiding such an attack. However, the situation is much more difficult in the second phase, when it charges and the body grows red. :: The 20 best PSVR games you really need to play Ice 7 have arrived! Here's how you can start the Monster Hunter World Iceborne and beat your first monster, Vitodus. Once you're settled into the world, learn about The Monster Hunter World's Layer de Armour and the various side quests available - surveyor set missions, boaboa quests and finding pearl spring macaque locations, and, when you're ready to take it, Sara Ishbalda. If you're making it, it's useful to learn where to find rare substances like PureChristal and Monster Slobone. Stay away from Monster Hunter for a while and need retraining? Our page on weapon changes and types, can help you join your friends and squad in multiplayer and how to capture monsters and mount monsters. Every time I see this attack coming, simply again. If you're close enough, it's also a great opportunity to rush back for a quick attack. After a while, you change the arena, and the dragon repeats, returning to the first stage. It's essentially - if you learn what to avoid, it's very simple, and it feels more like a routine boss battle than a Monster Hunter encounter. If you feel like the battle is not going anywhere, don't worry - Genojiba has a lot of health and therefore can feel like a slogan after a while. But there are no other tricks beyond the two steps mentioned above, so keep it and it will be done for you. If you're stunned by the size of the arena and re-enter the battle, you're more likely to appear right next to the monster, and you're likely in the line of fire, so be vigilant. It also doesn't give you a lot of space to run away and pursue So try and heal yourself and choose the moment to sharpen your weapon carefully. Once you finally get it down, it's technically the end of the game! Enjoy the end credits - there are no more story missions, but there are still many hunts. Good luck! Luck!
