Turn on the Filehub. 2. Outlets to your flash drive/hard drive with SD card. Wait until the SD indicator stops flashing and turns solid on 3. Press and hold the SD in USB backup button for about 5 seconds until the SD card indicator stops flashing, and indicating the Filehub will read the card SD.4. Wait until the SD indicator stops flashing, so the single-key backup is completed. 5. Now you can check your backup folder called SD backup to your flash drive/hard drive via the RAV FileHub app. The original record in your SD card will not be deleted. 2) TransferRe File by Mobile App A. Download the Search app for the RAV FileHub app on Google Play or Apple Store. Type the app in the search results and install. (There is no app for computer or laptop for now; you can access via webpage) 06/07 B. Connect to the WiFi network through fileHub power on the FileHub and turn on its WiFi. Go to Settings and turn on Wi-Fi on your mobile, find and tap RAV-FileHub-2G-xxxx or RAV-FileHub-5G-xxxx to connect (password: 11111111). C. Insert a USB drive with SD card Insert a USB drive or USB HDD (any USB storage) and SD card in the ports of the Filehub. Note: Make sure there is enough battery capacity for using the device. 08/09 D. Access and transfer snippet files to run the play. On the homepage we can view the battery level, total and available capabilities of the SD card and USB drive (if any), File Management, Settings, Video, Pictures, Music, Backup Pictures, Backup Contacts, Camera, and SD Backup Card. Note: If another device is connected before, please go to Settings -> Logout first and connect again. Check the files on the mobile by type: video, pictures and music, or by folder of the SDflash drive card. 10/11 Back up files in the USB/SD card drive. Returns up contacts to the USB/SD card drive. Slide switch between the USB/SD card storage, Tap File Management to access the USB/SD DEpo card, and you can view, copy, move and delete files and folders on the drive/SD card with the mobile storage. Slide switch between the USB/SD card storage, Tap Management accessed the USB/SD card storage, and you can view, copy, move and delete files and folders on the drive / SD card with the mobile storage. 12/13 Note: Do not copy files for a long time. For example, to copy a folder, tap and keep the folder, type the Copy, select a path and type Paste. E. Edit and save a file) Open the file on the flash drive/SD card and move it to internal storage (iPhone, iPad/tablet or laptop). b) Edit the file (make sure it is editable on your storage device). c) Transfert it back to the flash drive/SD card; you can choose whether to replace or save as a new file. 14/15 3) File TransferRe by Webpage: Recommended to use the following web browsers: Chrome, Firefox, Edge, and Safari. a) Connect the wifi to RPG-WD009 Turn on Wi-Fi on the computer, find the RavPower FileHub-2G-xxxx on the network list and click to connect (password: 11111111). b) Place a USB drive with Power SD card on the Filehub and turn on its WiFi, plug in a USB drive and SD card.c) Access 10.10.10.254 Open a web browser, type in 10.10.10.254 in the address bar (click Allow access if a window pops up). On the Filehub RAV filehub you can access data by section/folder (explorer) and change settings. If a window pops up for verification, just enter admin for Username and leave Password Blank, click Log in. 16/17 You can view, copy, move and delete files and folders on the drive /SD card and the mobile storage. Note: Please clear the browser cache if the connection fails first time, and then try again. Note: Make sure the transmission distance is smaller than 10m / 32. 8ft. 4) Capture Photos/Videos via In-app Camera A) Capture and store photos or Video Tap Camera on the homepage with the photo capture button or video; the data will be saved to the SD card automatically. 18/19 B) Find pictures/videos filmed in the app: File Management -> SD Card -> Camera - phone XXX's -> photos /videos. On webpage (10.10.10.254): Explorer -> SD Card -> Camera -> XXX's phone – photo/video. Configure the Power Router Tour on the router via the Equipped USB cable, and you can use it as a travel router in 3 mode. Note: Make sure that the router is walked over and there is enough battery. You are commanded to view the webpage by revaying the screen of scenery on mobile phone. 1) Access Point (AP) Mode A) Connect a wireless network to the router change it to wireless wireless for multiple devices (especially for temporary network use). Note: Take operation on the mobile app for example. The settings are similar to those on webpage for Windows PCs, Apple Macs, mobile phones or other devices. The 5G SD 20/21 FileHub will automatically become an access point when connected to a well placed routell (as in a hotel). You just need to: B) Power on the FileHub, C) Plug in a network cable of the router, and wait that indicators stop flashing and turn fixed on d) Connect the Wifi to RPG-WD009 Turn on Wifi on your mobile and find and type ravPower FileHub-2G-xxxx to connect. E) You don't need to change any parameters under this mode. Even if you can check them on the app (change the values per field if necessary). a) Type WiFi_Disk Settings -> WiFi Settings, tick or left unchecked Hidden SSID, type SSID to check the AIDS in the filehub. 22/23 b) Tap Channel to change the channel for the network.c) Secure Snippet, change the security protocols and tap Save. d) Speed Test Transfer Snippet -> Speed to check the network speed. 24/25 2) Router Mode Use as a regular router by connecting it to an ADSL or modem cable (self-provided) for multiple used devices. a) Settings snippet -> network -> The WiFi . 5G SD Note: Capture operations on the webpage for NETWORK PC for example. The settings are similar to those on mobile app and webpage for Apple Mac, mobile phones or other devices. 26/27 Note: Please consult the network administrator or refer to the wireless user documentation for selecting Static IP, Dynamic IP or PPPoE as provided for this Filehub. If you are using an internet DSL, please enter the username PPPoE with password and click Save b) When the device is connected to a WiFi network, Fibre Access will be selected automatically. Change the IP address and other parameters and tap Save. a) Static IP: You need to go to the TCP/IP settings and specify IP address and DNS settings. 28/29 b) Dynamic IP: You do not need to allocate any IP address or DNS settings to get it to work. c) PPPOE: If you need to click an icon that goes through a connection process that uses a username and password. 3) Bridge Mode the router lends a wireless network and broadcasts it with a new network name (SSID) and password. · Take operations on the mobile app for example. The settings are similar to those on webpage for Windows PCs, Apple Macs, mobile phones or other devices. Note: · Under this mode, you need to connect your device to the same wifi and the FileHub. The speed of the device will be just half of that under the routeute or AP mode. · The bridge mode is not supported for 5G WiFi networks. 5G SD 30/31 A. On your mobile, open the app, go even if Settings -> WiFi_Disk Settings, and select the network... as previously instructed. B. Type in run the RAV FileHub app, and the Settings icon tab. C. WiFi_Disk Settings, tick or left unchecked Hidden SSID, type SSID to enter the SSID into the filehub, and tap Save. 32/33 Share via Samba/DLNA Access your movies, music, and pictures at home or along the way; supports connecting up to five devices in the FileHub Under the Wi-Fi. Note: · Make sure that all devices connect to RVA-FileHub-2G-xxxx or RVA-FileHub-5G-xxxxx. - Make sure the transmission distance is smaller than 10m / 32. 8ft. Service Type Contains File Services (Samba) or DLNA services for sharing between trained devices. Note: Recommend use by 3 devices or less at the same time in case of any pasted data. Also you need to set the file as shared. 34/35 Environment System 1. On Mobile App Tap the Settings icon in the top right corner to view and change the related settings (make sure it's properly connected). 1. Guest Users You can log in or just use the app as a guest user. 2. Type languages to select the language as you want. 3. Type On the device, you can update the firmware or the app once there's a new version. 36 / 37 4. Type Third-Party Play, tap the On/o function for default party player settings. 5. Type Cache and then Logout to log in again. 2. On webpage (10.10.10.254) 1. Time Settings Type Settings -> Time settings, check and change the time zone and other parameters as you want. 38 / 39 2. Update You can choose to update the firmware when there is any update available. 3. Reset The Tap Settings to ON/OFF button on, and Reset will start. The Thread indicator on the FileHub will flash blue for a few seconds and turn them fixed on after the device is rebooted. The restore is done. Note: 1) To restore the Filehub means to recover it in the factory settings, all configured data already will be reset, including the set name for the Filehub and its connection with your mobile. 2) You can also insert a needle into the comb reset hole on the Filehub, keep it for 3s reset. 4. Wizard Follow the instruction step by step for a quick setting for use (AP mode for example). 40/41 Use FileHub as a power bank to charge your mobile device by simply connecting it to your device via the USB charging cable. Check the remaining battery level by pressing the Power button. Specifications Model Input Wi-Fi Speed Standard Frequency Battery Capacity Play Time Temperature & Humidity Weight Dimensions RP-WD009 DC 5V/2A 733Mbps (300Mbps@2.4GHz; 433Mbps@5GHz) IEEE 802.11ac / 802.11n 2.4GHz / 5GHz 6700 mAh-ion 2.4G: 8.4 hours 5G: 6 operating hours: 5°C-40°C (41°F-1 04°F) / 5%-90° RH (non-condensed) Deposit: 0 °C-60 °C (32°F-140°F) / 5-90% RH (non-condens) 113 x 76 x 25mml 4.4x3.0x1.0in 199 4g77.0oz 42/43 FAQ: How do I restore my RAVPower Filehub to factory settings? 1. Make sure it's connected to a mobile device or laptop via the USB cable. 2. Press and hold Pinhole to Reset for 10 seconds with a needle or a toothpick. 3. Wait for the router to reboot. 4. Or you can find the Restore to factory default settings in the admin system (10.10.10.254) by Settings -> System -> Reset Settings. Q: How do I update the armor? 1. Power on the Filehub. 2. Insert an SD card to Filehub. Place the firmware file in your cell phone or laptop that has access to 10.10.10.254 instead of the USB storage. 3. Go to Settings -> System &gt; Update. K: The RAV FileHub app cannot find the USB storage device after I connect it to the product.1. Unplug on the power of o the Filehub. 2. Unplug the USB disk and plug it into the Filehub again. 3. Plug in power on your FileHub again with the USB storage plug in. You can also access the file through USB drive via the admin route system on 10.10.10.254. K: My Filehub is unresponsive when I enter the admin webpage 10.10.10.254. Make sure that you device is connected to the router. It can disucect from the router when you're changing settings without your notice. Make sure it stays connected to the Filehub. A: My mobile cannot connect to the Filehub after changing the password SSID. A: Go to Settings -> WiFi on your mobile phone, tap the wifi connected and then forget this network and connect again. If it still doesn't work, reset the Filehub to Factory settings. K: The network speed decreases in the Bridge Mode. A: It is a matter of radio / frequency (2.4GHz) and bandwidth. You recommend applying the AP mode to expand the wireless network with less impact of pek performance. K: My device cannot connect to the Internet via the FileHub. A: Check whether your FileHub is connected to a WiFi or WiFi network or not. Please note that the FileHub can create its own LAN even when dispecting from the Internet. Customer Service For more information, you can visit or , or download the latest user guide and firmware on their website. For any questions, you can contact us by email. We are pleased to help with issues related to ensuring you a satisfied experience with our products. 44/45 Vorsichtsmaßnahmen DE INHALT CDas Gerät abet nourished middle der angeben richtig Spanung; andernfalls könnte eass beschädigt werden. Connect FileHub network and enable its Wi-Fi function. Go to Settings and turn on Wi-Fi on your mobile device. To connect, search for RAV-FileHub-2G-xxxxx or RAV-FileHub-5G-xxxx and type the entry (password: 11111111). C. Outlets in USB drive and map SD Outlets a USB drive or USB hard drive (any USB memory) and an SD card to the Connectors in the FileHub. Note: Make sure that the battery capacity is enough to use the device. 54/55 D. Find and transfer files to Run, type the app. On the home page, you can check battery level, total and available capabilities of SD card and USB drive (if any), view file management, settings, videos, pictures, music, photo backup, camera, and SD backup card. Check files on mobile device by type (video, pictures and music) or files on SD card / flash drive by folder. Note: If another device has been connected before, please first go to Settings -> log out and register. Returns up 56/57 files of USB drive/SD card. Back up contact in USB drive/SD card. Move the change between USB memory/SD card. Tap file management to access USB memory/SD card flash and folders on the drive / SD card with mobile storage. Move the change between USB memory/SD card, the management typed to access USB memory/SD card flash. Now you can view, copy, move and delete files and folders on the drive / SD card with mobile storage. Move the change between USB memory/SD card, the management typed to access USB memory/SD card, the management typed to access memory/SD card. Now you can view, copy, move and delete files and folders on the drive / SD card with mobile storage. 58/59 For example, to copy a folder, type the folder, type Copy After, select a path, and type Paste. Do not copy files for a long time. Edit and save a file) Open the file on the flash drive/SD card and move it to the internal storage (iPhone, iPad/tablet or laptop). b) Edit the file (make sure it can be modified on your storage devices). c) Transfert it back to the flash drive/SD card; You can decide whether to replace it or save it as a new file. 60/61 3) Transfer files across web pages: The following web browsers should use: Chrome, Firefox, Edge and Safari. a) Connect Wi-Fi from RPG-WD009 Turn on Wi-Fi on the computer, find the RavPower FileHub-2G-xxxx in the network list, and click to enter connection (password: 11111111). b) Place a USB drive with a SD card on the Filehub and connect into the address bar (click Enable Zugri when a window is displayed). The RAV FileHub client allows you to access data and change settings in sections/folder (Explorer). If a window appears available for verification, simply enter admin as the username and leave the password blank. Click Sign In.62/63 You can view, copy, move and delete files and folders on the drive / SD card and mobile storage. Note: Please clear the browser cache if the connection fails first time. Then try again. Note: Make sure the transmission distance is smaller than 10 meters. 4) Capture photos/videos from app's internal camera A) Capture photos and videos and save Rattled on camera on the home page and then click the button to capture pictures or videos; The data is automatically stored on the SD card. 64/65B) Find Images/Videos in the app: File Management -> SD Card -> Camera - XXXs phone -> pictures / videos. On webpage (10.10.10.254): Explorer -> SD Card -> Camera -> XXXs phone -> photos / videos. 1) Access point mode A) Configure via connect point router trip turn on the route via the USB cable and you can use it in 3 mode as a travel router. Note: Make sure that the router is turned on and has sufficient battery capacity. You should turn the screen on your mobile phone into landscape when viewing the web page. Configure a cable network to the router if you want to use it without WiFi when using multiple devices (especially for temporary network usage). Cable Network 66/67 5G SD Notes: Capture the operation Mobile app as an example. Settings are similar to those on the website for Windows PCs, Apple Mac, mobile phones or other devices. When connecting to a router is properly configured (as in a hotel), the FileHub automatically becomes an access point. So only: B) turns on FileHub. C) Connect network cbles from the router and wait for the Wi-Fi Azure indicator to stop flashing and shining forever. D) Connect Wi-Fi from RPG-WD009 Turn on Wi-Fi on your mobile device and search for RavPower FileHub-2G-xxxx. Type the connected entry. E) You don't need to change any parameters in this mode. However, you can check them in the app (change the values in each field if necessary). a) Type Wi-Fi Disk Settings -> WiFi settings, select the Hide SSID from or off check box, type SSID into the FileHub. 68/69 b) To change the channel for the network, type Channel. Type Security, change the security logs, and tap Save. d) Type transfer Snippet -> Speed test. 70/71 2) Routeute mode Use a traditional router by connecting it to an ADSL modem cable (self-supplied) when using multiple devices. Cable network a) Settings snippet -> Networking >: Wi-Fi and LAN. Socket ADSL-Modemo5G Note: Capture the operation of the website on Windows PC as an example. Settings are similar to those in the website on mobile app or websites on Apple Mac, mobile phones or other devices. 72/73 b) When the device is connected to a cable network, the Zugri WiFi is automatically selected when using. Enter the IP address and other parameters with Save. Note: Please contact your network administrator or refer to the users document cable user for selecting Static IP, Dynamic IP, or PPPoE according to the information for this FileHub. If you are using DSL web, please enter PPPoE user name and password and click Save. a) Static IP: You must call the TCP/IP settings and specify IP address and DNS settings and DNS settings. 74/75 b) Dynamic IP: You do not need to allocate IP address or ADNS settings for commission. c) PPPoE: If you need to click an icon that will be in a username and password connection process. 3) Bridge Mode the router lends an existing network and transmits it with a new network name (SSID) and password. 5G SD Takes the operation of the website as an example. The settings are similar to those on the website when Apple Mac, mobile phones or other devices. Note: In this mode, you must connect your device to the same Wi-Fi network as FileHub. The speed on the device is half that of router or access point mode. · Bridge mode is supported on a 5 GHz Wi-Fi network. 76/77 A. Connect to RAVPower FileHub-2G-xxxx Wi-Fi network according to the previous instructions on your mobile device. B. Run the FileHub RAV app, type the Settings icon. C. Type Wi-Fi Disk Settings, select the Hide SSID from or off check box, type SSID into the FileHub, and tap Save. 78/79 Shared via Samba/DLNA Featured Sharing between Different Devices on Your Movies Access, Music and Picture Services at Home or on the -> Windows File Service (Samba) or DLNA Service. also: supports connecting up to five Filehub devices via Wi-Fi. Note: Make sure that all devices are connected to the RVA-FileHub-2G-xxxx or RVA-FileHub-5G-xxxx. - Make sure the transmission distance is less than 10 m. Note: A maximum of 3 devices should be used at the same time in case of preserves data. You must also set up the file as shared. 80/81 Environment System 1. No mobile app icon in the settings in the upper right corner to see the relevant settings (ensure that the connection is lifted). 1. Your invite user can log in or use the app as a guest. 2. The languages to select the languages you want. 3. Tap Info if you want to view factory settings, current versions, customer service contacts and our website. You can update the firmware or app as soon as a new version is available. 82 / 83 4. Typing third-party play, two/activate the feature for default the third-party player setting is not typed. 5. Type Cache, and then sign out to log in again. 2. For each web page (10.10.10.254) 1. Time Settings Snippet Settings -> Time settings, check and change the time zone and other parameters as needed. 84 / 85 2. Firmwares You can update the weapon update if an update is available. 3. Reset setting Set On/Off buttons for on. The reset begins. The Wi-Fi indicator flashlight for a few seconds and then lights up forever after the device restart. This concludes the reverse. Note: 1) Restore the FileHub to restore its factory settings. All data already configured is including the set name for the FileHub and its connections to your mobile device. 2) Alternatively, you can insert a needle into the Recipe hole on the FileHub for 3 seconds to reset. 4. Assistant Follow the instructions for quick setup (access point mode serves as an example). Using 86/87 FileHub as a power bank, you can load your mobile device by simply connecting them to your device via the USB charging system. Check the remaining battery capabilities by pressing the Power button.
