Diablo 3 malthael damage type

View the source of Share death personification of sanctuary folklore, see Lord Death. Much uncertainty surrounds the archangel Malthael. Once a calm key hand of wisdom, he was lost to us the moment Worldstone disappeared. Unable to comprehend that catastrophic event, he left Heaven. His departure has created a huge turning point for the council, which has so far remained unseeded. Selathiel, writing about Malthael(src) Archangel of Wisdom (formerly)The Silent AngelAngel of DeathArchitect of the Eternal Conflict[1]The Guardian[2]The Reaper[3] High Heavens (formerly)Reapers Angiris Council member/leader (former)Reapers Malthael leader was a former member and leader of the Angiris Council. Once upon a time, the Archangel of Wisdom became the angel of Death. Biography of the Great Conflict Like the rest of the heavenly master and his leaders, Malthael participated in the Great Conflict and played a decisive role in it. [4] He was the first leader of the Angirio Council[5] (and its chief member)[6] and through it angelkind as a whole. [5] According to Itherael, when the angels were young, Malthael was the one who found Anu's eye for Pandemonium and called him Worldstone. All angelkind swore to protect her. [7] Wrath Malthael acted alongside the rest of the Council during the great conflict in Vienna against the hell forces, as he fought demonic forces led by Diablo. Malthael easily target demons attacks right back at them and use his weapons to immobilize Diablo himself. However, the ferventness of the Empire led to the brutal overthrow of the Lord of Terror, not taken into captivity, as Tyrael and Auriel intended, which would have been useful to the war effort. Malthael remained silent all the time. [8] The war of sin, whatever the choice, does not matter to me... I'm abstaining. Malthael refrains from addressing Sanctuary (src) Not all the minions of heaven and hell were content to be bound by the Great Conflict. The result was that under the leadership of the angel Inari and the demon Lilley, a number of fraudsters stole the World Stone and created their sphere—the Temple. [4] Malthael was used to discover where the artifact had gone, and how the Archangel of Wisdom was tortured by his inability to find him. [9] Malthael and co. decide the fate of the temple the coupling of angelo and demon would lead to the rise of nephalem. After the creation of the Temple, although at first it was hidden from the High Heavens, malthael mood darker. Deckard Cain later speculated that nephalem clouded Malthael's vision of existence either opened his eyes to a new truth, or that there was a connection between nephalem and Malthael chalice that the angel learned. [4] At the end of the War of Sins, Heaven learned of and in the last battle the forces of Heaven, Hell, and Edrem clashed with each other. [10] Malthael watched and watched the existence of mankind. [5] After the battle, the Angiri Council met to discuss the fate of the Shrine and its inhabitants. Malthael abstained from voting, but the end result was that the Temple and its denizens would be allowed to exist, freely choosing their own path. [10] At the end of wisdom in Pandemony I saw his visions lost in reflection. He's looking for something. The peace that once encapsited him has disappeared and replaced by a dark new power. He radiates it, even my visions. An icy black wave waves waves above me, stabbing into my spirit like a thousand needles. Like me, he took the road to power. One of which does not return. Adria (src) Malthael disappeared after the destruction of Worldstone after entering Pandemonium Malthael. Before that, he was apparently more interested in humanity. [11] His departure broke the unity of angiris council. Some speculated (correctly) that he chased pandemonial halls, seeking answers to the incomprehensible secrets of life and death. [9] Malthael did roam these halls, but in madness, for mankind eclipsed wisdom from his vision. [12] Adria speculated that Malthael knew that Tyrael was responsible for the destruction of Worldstone and knew why he was compelled to do his actions. Perhaps, in his last gasp of wisdom, Malthael realized that no matter what the angels did, Hell always found a way to control humanity. That The Angiri Council's desire to preserve order was doomed to fail, so he refused it. [13] Malthael, now the angel of death after the defeat of Diablo in his siege of the High Sky, now mortal Tyrael took Malthael's place as an aspect of wisdom. [9] Malthael saw these events and witnessed the events that led to them. He saw the actions of Zoltun Kulle, the man who embraced evil. He concealed the latent power of a non-facial hero. He saw the hero defeat the Prime Minister's evil, an act that during all his years of war in eternal conflict, he could never reconcile. Faced with such power and regarded mankind as a disgust, Malthael was determined to become the incarnation of Death. Although he could not vote for the destruction of mankind at the end of the Sin War, Malthael has now seen wisdom during the extermination of mankind. [12] Malthael discovered the whirlwind of human souls in the heart of the Pendemonium fortress, where the great Worldstone once rested. He turned it into a prison of the Soul and used the energy of spirits to become an aspect of Death. With the defeat of the Lords of Hell, he argued that mankind was the most powerful demonic force left behind now as a heritage behind their ancient nephalem. With the extermination of mankind, would be one, a triumphant Great Conflict. [14] On the basis of his activities, he established the Pandemonium fortress. [15] Emperor Lieutenant Balzael entered the Maltese league. [2] Urzael also joined him, who shared Malthael's view of humanity. [11] The angelic maiden girls that Urzael brought with him also made a promise for Malthael. [16] Malthael also manipulated the Templar warrant sect in Westmarche to distract her in the Temple from detecting his broader efforts. [2] The storm of light Death is emptiness, and all mortals are afraid of it. Malthael's reflections (src) Malthael, guardian after the Diablo attack on the sky, Malthael, going from the Guardian moniker, were kept informed of the events in Balzael. He was told how Black Soulstone damaged Angiris' council, as he planned. The Council considered the fate of the Temple, and Malthael's goal was to give the stone enough time to spoil the Council so that they would be determined to liberate Heavenly Master in the mortal world by eradicating mankind. But Tyrael's act of reforming Horadrim in order to get a stone threw his plans into jeopardy. This, and the sect of the Templar Order, which he influenced in Westmarsh, was scattered by the Knights of Westmarsh, its members were killed or imprisoned. The stone lasted too long for the council to be enchanted against humanity, so Malthael changed his plans. He knew that Tyrael had found Corvus, which would be a useful fortress. Although his viciousness did not allow non-mortals to come, Balzael believed that Malthael would overcome the problem. Savvy pools, Malthael informed Balzael to allow Tyrael and Horadrim to take the stone. When he was out of heaven, he would take a stone for himself and adopt a new plan that still leads to the end of mankind. The plan worked, and Horadrim regained the stone. In the shrine, Malthael had one of the templars held in captivity and killed others who were imprisoned with a man. Malthael used his powers to extinguish cell torches and take advantage of the souls of other prisoners. Then he moved to the catacombs that would take

him to Corvus. And into Black Soulstone. [2] Soul reaper No one can stop death... Malthael in Tyrael (src) Malthael takes soulstone shortly after Tyrael took his former dimension, Malthael re-emerged, now embodying the aspect of death. [17] In Rakky's tomb, he encountered his brother and the Hobrarimo group, who were currently in the black sieve stone. Malthael effortlessly slew Horadrim members and destroyed his souls in the process (minus Lorath Nahr). Although he was able to defend himself against Malthael's initial attack, Tyrael could not hurt Malthael and was also incapacitated. [18] Seeing that Tyrael's soul was free demonic in taint (unlike humans), he did not see Tyrael as his enemy and eventually decided to spare his life. [19] After dropping Tyraella aside, Malthael came close to stone[18] with the intention of his opinion[17] and once and for all ending the Great Conflict. [20] Tyrael (powerless to stop Malthael) declared that nephalem would stop him. Malthael paused his attitude and turned to his mortal brother; react that no one can stop death, before breaking down the constraints and demanding Soulstone for himself. [18] Malthael with Black Soulstone Later Malthael led his Reapers against Westmarch. [1] By the time Nephalem came to an eye again with him, his plan to eradicate mankind was almost complete. [5] Both Tyrael and Nephalem were embarrassed as to why Malthael had resolutely taken on Black Soulstone. As Nephalem struggled to save what was left of Westmarch, Tyrael deciphered a Black Soulstone that was interrupted and left stranded. Eventually, Nephalem tracked Down to Malthael's place in the Pandemonium fortress, while Tyrael finished deciphering the Soulstone strand. Much to the horror of his enemies, Malthael has been fundamentally replaced by black soulstone consumption and is all demonic in essence of Sanctuary. This meant that mankind faced destruction, for their demonic heritage would be torn from their souls with a stone, and their bodies would be torn. Malthael continued his work from the heart of the Pandemonium fortress, constantly feeding the ever-growing souls of the dead and growing more powerful with each passing moment. An act of treason against his fellow angels, Malthael encouraged his Reapers to attack the Pandemonium Gates of the High Heavens to prevent Nephalem after him. The council of Angiris, who took it, was in conflict with him, especially Imperius, who was shocked to learn of Malthael's betrayal. While Imperius didn't care whether Malthael wanted to destroy humanity, he agreed that Malthael should have been stopped and sent his angels to help Nephalem against Malthael Pandemonium. Malthael defeated As Nephalem fought his way through the battlefields of Eternity and got the entrance to the Pandemonium Fortress, Malthael taunted the hero, claiming the extermination of mankind had already begun. Nephalem, now empowered and ruled by death forces itself, faces the heart of the Malthael fortress. Malthael turned out to be an incredibly powerful opponent, showing mastery of his weapons, as well as bombarding Nephalem with undead waves. In order for the battle to end, Malthael invited Black Soulstone to the fortress and destroyed it, taking the essence of Diablo. Although this gave Malthael a huge boost in power, he still eventually defeated Nephalem. Malthael's defeat was shown be a painful, agonizing one; accompanied by a dazzling explosion of energy, which destroyed the roof of the fortress. When he fell to the floor below, all the souls he consumed erupted from his body, and his body slowly disintegrated. This included Diablo himself, who was now free because of Malthael's actions. [21] Legacy How long, I wonder if his madness is not noticed by those closest to him? Tyrael's reflection on Malthael 'Malthael's actions had a lasting effect on both the temple and the sky.' Entire populations were eradicated in the sanctuary, and cities were devastated. The carnage led to religious schisms, famine and war between mankind. The sky also suffered greatly at the hands of the Reapers, and after malthael's defeat, closed its gates. [22] At some point during or after the Maltel genocide, Tyrael learned of the existence of Soulsmasher, the weapon allegedly created by Malthael. He suspected that the weapon was developed as part of an early attempt to free human souls for his use. He was left to wonder how long Malthael's madness had not been noticed by those closest to him. [23] Rumors continue to persist that Malthael once participated in a random game with a mortal, mortal, winning a couple of Bridges. As the clothes drew attention to the lives of all loved ones, the winner caused the collapse of his entire household. Abd al-Hazir reflected that if the story was true, Malthael was a painful loser. [24] In-game Diablo Immortal Malthael will appear in Diablo Immortal. [25] Diablo III Malthael's appearance in Malthael is diablo III's main antagonist: Souls Reaper. He serves as act boss of Act V, and defeating him ends the plot offered by development. It is referred to in the element-flavored text of Soulsmasher and Death's Bargain. Tips and other additional information While players fight through the streets of Westmararch, chances are that any of the city guards still living in the city, when it is spoiled by the Reapers, will be turned into malthael shade. While these roughly maintain their look, they do so with a stained shade, and only take advantage of their vortex ring attack. Other than that, shades are low threat, usually having a little more life than the average revenge soldiers. The final battle with Malthael takes place on a relatively small circular platform. There are two health wells to the west and east. The battle is divided into three stages. These abilities are the ones he uses throughout the fight: Charging attack: Charge, which causes a knock, but the damage is small, if any. This ability is not too dangerous in itself, but he can (and often will be) a future player in the Death Shrouds. Drain the soul: The vortex ring around Malthael, causing significant damage to everyone inside. Malthael is fully mobile when using this power, and has the ability to reflect incoming projectiles (up to where these projectiles can actually harm the user if they do not escape them). Death shrouds: Malthael will summon clouds of fog that move slowly on the floor. This causes significant cold damage to anyone passing through very fast ticks, but they can be harmless when using talisman of Aranoch. Over time, they will dissipate, but they are also spam, especially in the last phase. Malthael spawns them the faster, the more health he loses. Malthael will not take this opportunity during Phase 2. Step 1: You'll be the last of your kind of added ability: Soul Nova: From time to time, Malthael flies up and lands in the center of the platform. From there he begins to release a swarm of glowing blobs, each moving in a straight line toward the edge of the platform. While this is happening, nephalem hero suffers from a chilling debuff. Blobs hit quite hard and knock heroes back at a very small distance, but they are slow and rare enough to avoid being done easily, especially if standing close to the edge of the platform. Malthael can (and should) be corrupted while he stands in the center, an easy task ranged in the invaders. Stage 2: The end is inevitable no cutscene or any event after reaching the second round of the fight, but the player will have reached this stage if Malthael says that the end is inevitable (occurs after Malthael suffers at least 25% of his lifetime injury). At this stage, his death shroud and Soul Nova abilities are replaced by the ability to summon minions and rely on the skull spiral: Skull Spiral: Malthael periodically shouts a group of souls on the edge of the arena. They quickly spiral toward the center of the arena, from where they fly toward the edges. These souls cause significant damage if the player fails to dodge them. The first edge of the platform remains clear from the initial spiral of the souls, and the final stage can be easily avoided enough. Summons: Malthael periodically shouts at two exorcists. The damage they cause can be significant, especially during teleportation. However, they drop the Health Globes when killed. Note that if you keep close to the edge to avoid souls, you can pin, so it is best to have a skill like Teleport. When Malthael's health is low enough (somewhere below 50%), all remaining exorcists die. In cutscene, Malthael breaks black soulstone and absorbs it into his body. It begins in the last stage. Step 3: Not the only weapon in the skull spiral and summons abilities is replaced by a soul sweep, and death Shroud can be used again. Soul Cleansing: Malthael from time to time fly into the air and land in the center of the platform. From there, he will release a group of five red waves of flame, each of which creates a stream of fire that harms everything on one side of it. Waves fly in all directions except for Malthael face randomly). As soon as you get to that area, because immediately after that two wing-like liner (possibly Soulstone's shards) are swept around it, starting from the front and then going left and right. The sector behind it is the only place that remains clear, and the damage is significant. The only time the damage should be done is that the sector behind Malthael is covered with Death Shrouds, and the player has poor resistance to cold damage compared to the fire resistance needed to shrug off the shards; one or two shroud is not that threatening, but many more will even soul sweep shame in a quick time. Otherwise, the main difference is the higher death shrouds content: Malthael can now spawn them in two. Perhaps because of his crazy life (7 billion Torment VI (70) for the soliozation of heroes), Malthael does not have a raging timer (there were precedents to deal with it up to 3 hours of Torment VI gravity). But this fight is more a battle of survival than a DPS race, because the amount of damage that will inevitably be taken is insane. High hardness, especially before cold damage, combined with the independent source of damage (like pets), kiting and/or damage absorption is seen as a better option than a pure glass cannon build. The best moment to use damage to cool off, if any, is when Malthael first prepares his Soul Sweep attack, because for a few seconds he is very vulnerable (if you manage in time for his retardation). If you play alone, be sure to equip your followers with things that make them more durable (usually a lot of frost resistance if you don't have access to legendary followers' things that prevent them from dying), otherwise the amount of damage they will inevitably receive will keep them incapacitated for the whole fight. A few tips to keep in mind to survive Soul Sweep: if Malthael is penepulated to attack speed, the area covered by the shreds will be larger than usual. If Malthael suffers a great debuff at the speed of his attack, the injury will eventually become inevitable. If possible, for this reason avoid slowing down the speed of its attack. Fortunately, this is one of the few times the rate of slowing down an opponent's attacks will be quite damaging. Also, if possible, try to avoid movement skills, such as infuriating charge to Malthael's position if possible. This is because all the firefighters fired will strike Nephalem, causing enormous damage. But even the Angel of Death has its weaknesses. Since most of the damage is cold, the Aranchio mascot will provide the player with some protection. As Malthael himself also has a higher degree of life than even rift guardians at his level, if ever there was time to use Bul-Kathos's Wedding Band, he would be the best candidate on his own After death Malthael drops a guaranteed Reaper's Wraps recipe (if the player doesn't yet). From the very first murder, he also lowers one legendary element in campaign mode (can be restored). Before patch 2.0.6., he also had the opportunity to drop the Reaper's Fear ingredient. Bugs Can be permanently trapped on the edge of the platform without being able to move normally, which is especially fatal along with the attacks of Malthael's Drain Soul and Death Shroud. This is especially risky for hardcore characters, as the chances of surviving a fight in this case are negligible. Quotes Malthael's portrait of Nephalem ... (First performance nephalem) Nephalem... I'm going to end the conflict. Death is peace. (after defeat urzael) Nephalem... Black Soulstone travels through the portal to the Temple. Even now, it is spreading to death all over the world. And so ends, Eternal conflict. (entering the Gate of Death) I heard the sound and I didn't know what it was... I was looking for wisdom chalice, but it wasn't. The sound is calling me, and I knew them: human souls..., but where? (The Path of Wisdom, Part 1) I brought myself to the Sanctuary, where people live..., but the souls did not call me from that place. I was looking for the breadth of creation, always after the sound - always sound ... and then I realized: Pandemonium, where Worldstone once rested. (The Path of Wisdom, Part 2) Soul swing and writhe. Now I know the truth of mortals: all paths lead to death..., regardless of their struggles, regardless of their triumph, they die. This is wisdom. (The Path of Wisdom, Part 3) Human souls show their greatness potential: they can stand for good, like any angel in heaven, or they can accept evil worthy of the lowest demon of hell. The power of such a choice should not rest in the hearts of beings, which are here instantly, then ignite and die. (The Path of Wisdom, Part 4) People cannot be trusted. They are born of an angel and a demon, but the demons have distorted everything they touch. People are corrupt and are not worthy of choice between good and evil - angels and demons do not choose as they should be. (The Path of Wisdom, Part 5) Nephalem trapped prime minister's evil Black Soulstone - this is the perfect moment to end the Eternal Conflict... demons are light prey, but humans need to be removed before they grow too strong; soulstone is a great weapon. The eternal conflict will end. (The Path of Wisdom, Part 6) Soulstone is a sanctuary. The blood of demons will soon disappear from all creation. You will be the last of your kind. For a few moments. Death is coming, nephalem. (Start Stage 1) A world without evil. You need to die. The eternal conflict ends. An end is inevitable. (start of phase 2) There's no other way. Death is unattainable. Death will be you from pain. Death consumes everyone. After all, all bow to death. You are from time to time, nephalem. Your world is dying. There's nothing to save. You are filled with the power of death. But it won't save you! but it's not the only weapon I have. (before destroying Black Soulstone, starting stage 3) The development of Malthael's presence reaper soul was created/dictated by Josh Mosqueira. He wanted Malthael, as the game's antagonist, to balance the game with a new character (Crusader). [26] Storm heroes In some aspect of wisdom, Malthael abandoned heaven after the destruction of Worldstone. Secretly, he was determined to end the Eternal Conflict by becoming a reaper of souls and eliminating everything that was affected by demonic corruption, including humanity. Heroes of the Storm (src) For details, see the corresponding article hot5 wiki Malthael also looks like playing the character Heroes of the Storm. Most of his lore and Diablo III abilities make a comeback, albeit largely reworked. He was considered to add to the storm of heroes from the beginning, but his place in the original release was taken by Leoric. [27] Add a photo to this gallery Malthael's next chess piece, Malthael, in Diablo Chess. It represents a piece of rook. Personality and traits This angel commands power beyond his understanding. Surely he had a lot of knowledge as an archangel of wisdom? Yes, but he sees virtue only in light, not in the Balance. Without some harmony between these forces, we can see ourselves. The victory he imagines for himself could never come true. Ordan and Nephalem discuss Malthael (src) Malthael Malthael was a gaunt figure, decorated with black robes and armor. [28] As an archangel of Wisdom, he was once a wise and noble being who was said to cherish life. However, he was considered melancholic, evasive and even frightening[4] and was even his own enigma. He rarely spoke, was slow in anger and could be contemplate and slow to act, but was respected by other angels for his understanding. When he spoke, his voice was said to have been enraptured by other angels through his melody and the wisdom she conveyed. However, as his behavior darted, his voice became chilling and could even provoke thoughts about the embodiment and feelings of anger. [4] Mendeln was one such example, Malthael's voice filled him with thoughts of constant, empty death. [10] Malthael saw mankind as an abomination that should not exist. [5] In his writings, Malthael revealed that he began to hear strange voices (sound, as he himself called it) by calling him pandemonium. When he learned of the potential and power of mankind within himself, he concluded that they were ugly because he felt that their ability to have free power was not natural. between angels and demons. [30] Adria respected Malthael to some extent; much more than other angels. Speculating that she had seen foolishness in Angiris Council's attempts to maintain order, she stated that at least that's why he had my respect. But Malthael's ability to see the true nature of things made him (in her opinion) unpredictable, unknown and dangerous. [13] As an angel of death, Malthael became even darker, loudly killing those who opposed him[18] and seeing him in black and white. [19] He saw virtue only in Light, and he was not interested in the concept of balance. He was ready to destroy mankind by all necessary means and even went so far as to betray his angelic brethren. [21] [2] His wings, once bright and purple[8], became white and wise in their appearance, skeletal. [18] His method of transformation was different from that of other damaged angels, such as Izual. [20] Abilities wisdom was once an aspect of Malthael, so he had to see everything. He so got this ability from Chala'dar, Wisdom Chalice. [4] This ability has been reduced, and perhaps completely eliminated, apparently solely because of the existence of mankind, at least after the destruction of Worldstone. Although Malthael was not in a hurry to rage, he was still an unbeatable fighter. [4] In controlling a couple of sickle-loving shotels,[8][18] he was able to target enemy attacks only with the slightest use of force. [4] Malthael As an archangel of wisdom, Malthael was one of the most powerful angels in existence. As an angel of death, Malthael's power only grew stronger. [31] In this new aspect, Malthael demonstrated the ability to tear souls[18] to have mortals, to absorb fire[2] and to rot bodies, creating dense mist with wings. [18] He was also very reconciled with souls and could feel any demonic taint. [19] Malthael was also able to stun to the shadow of death, partly by becoming partially out of reality and therefore resistant to any truly physical or miraculous damage, even to the strokes of angelic knives. The only being who could hit him was Nephalem, and only after they demanded part of the soul power malthael, which was used to bind the forces of death. [21] After consuming the demonic essence of Black Soulstone, Malthael was able to channel the energy of the Great Evils against his enemy(s). [6] Trivia This section contains facts and details related to this article. Malthael The Angel of Death is a figure of the Talmud, the Bible and the Quran, often otherwise considered a Grim Reaper. It is expressed by Paul Nakauchi. Despite reaper of Souls (development name) supposedly referring to Malthael, it is not intended or named as such anywhere in the game. When Malthael is killed, his armor turns into gold and his wings are white in his death animation. It can be seen very briefly when the souls of the dead poured out of his body, until it disintegrated. He plays in contrast to his previous appearance in Diablo III: Wrath, where his armor was mostly black and wings purple.
