That word surge, however since it hasn't explicitly said that the spell has to be targeted on you, I would say that yes it does count spell areas that you're in the Houston area. (See spelling the Spelling Turn for an example of how the word is when an effect only takes place for spells that actually target you.) 2014-10-12, 01:41 PM (ISO 8601) Thanks ... As an addon question, would I ask myself whether the mordenkainn disjunction can be used for normally counting, as magical dispcel or magical dispel? 2014-10-12, 01:53 PM (ISO 8601) Originally posted by Max Caysey Thanks ... As an addon question, would I ask myself whether the mordenkainn disjunction can be used for normally counting, as magical dispcel or magical dispel? Yes, I think he lists that as a use for the spelling. moderate aura's evocation; CL 11th; Ring seat; Price 4,000 gp; Weight – DESCRIPTION on first test, this ring seems to be a ring of stored. However, while it allows a spell of one at the 1st to 6th level to be thrown at it, that spell cannot be thrown out of the ring yet. Instead, should that spell ever be thrown on the bear, the spelling immediately contrary, as a counterspell action, requiring no action (or even knowledge) on the bearing party. Once so used, the spelling cast of the ring goes. A new spelling can be set (or the same one as before) can be placed in it again. CONSTRUCTION CONDITION Feat memory ring; Spell imbue with spell capacity; Price 2,000 gp. Is a ring of smuggling area in spelling effects like fireball? The ring only affects the spell that targets you, not spell including you in the area. A possible interpretation is that the ring would make you the immunity that is distributed through the spell (and the rest of the area would be affected normally), but that would require language additional explanations and create unusual situations where you should immunity to control water or guard with wards and be up free of these effects. Instead, it's clearer to adjust if the ring only affects your targeted spell.
