Without generous donors like you, we can't help dogs like her Be the Change You Wish To See in the World That's the difference in the lives of our bulldogs: sign up to volunteer today! It's not always easy, but it's always worth it! Final Updated on July 29th, 2020 The Mini Bulldog is a cross from a purebred English Bulldog and a purebred Pug, also known as Small Bulldog or Toy Bulldog. As the name suggests, it's a small dog at about 10 to 14 ins tall, weighing between 25 to 40 pounds. The life span of this cross-animal is about 10-12 years. I know you're fantasizing about teaching your dog how to ride a skateboard, so read on to learn more about this breed! Mini doesn't always mean Tiny I bet you're imagining a Chihuahua-sized Bulldog right now, a dog that you can carry in your bag at all times. Well, mini doesn't always mean tiny - especially when it comes to the English Bulldog. As mentioned above, the full adult Mini English Bulldog still weighs between 25 - 40 pounds (11 - 18 kg). Carrying them around all day would be a serious workout. Males stretch up to 11-14 inches (27 - 35.5 cm) on the shoulder, females 10-13 inches (25 - 33 cm). This breed looks like its standard English Bulldog, with a deep chest, rounded ribs, wide shoulders, and short bones. The only notable physical difference is size. The average English Bulldog has a height of 16 inches (40 cm) maximum and a weight of 55 pounds (25 kg) maximum. The Toy Bulldog's coat can come in deer, white, brindle, or spotted in two or more colors. How did they make the English bulldog so small? In today's advanced science, you can combine almost all dog genes. Impressive, but very controversial. Back in the 1980s, breeders crossed the Pug and an English Bulldog to create this designer dog mix. They wanted to design (literally) a healthier English Bulldog... but were they successful? I can tell you now from my experience that this parent kind of comes with a lot of health problems. More details on this later. Both pug and English Bulldog have an ancient history of royal families. Pugs favored the Chinese, especially the Shang Dynasty, who ruled from 1600 to 1046 BC. English Bulldogs praised ... The English! What a surprise. Queen Victoria and Queen Richard III are to be replaced by Queen Victoria. King William had his own pack. Welcome to the Bulldog Family American Bulldogs A common mistake people make when you buy a Bulldog distracting an American is an English one – or even a Frenchman! Most people assume that the Toy Bulldog has some American genes in it, but that's not true. Only the English Bulldog can be a mini. The American Bulldog resembles the Pitbull Terrier in many ways. They are active and agile, unlike the Mini English Bulldog, who prefers to sleep all day. Of all bulldog breeds, the American is the largest, up to (59 kg) and a height of 28 inches (71 cm). The smallest Bulldog is frenchie. The only thing any Bulldogs have in common is friendship and positive attention. (Even Bulldog blends like Beabull and Valley Bulldog are huge sweethearts, especially for kids.) Standard English Bulldogs Bullpug Cute... But not the most functional Let's be honest, the miniature English Bulldog is not the most practical dog. They can't walk or run long distances, they can't hunt, they can't do police work, they can't herd, they can't swim, or they can't pull heavy objects - the list goes on. The Teasing Bulldog is primarily bred to be an excellent companion. He's going to sit on the couch all day watching TV and eating Cheetos. As I mentioned briefly, pug and English Bulldog are both prone to a number of health problems thanks to nose and wrinkles. Parent Breed Health Concerns The most obvious issue for the Pugs and the English Bulldogs is respiratory. That's why they pant and snore all the time. English Bulldogs are spread to overheating (so keep your dog in the summer), cherry eye (eye issues), hip dysplasia, and joint injuries. Pug have very similar health problems. But because they're smaller, you can experience trachea collapse, luxating patella (kneecap issue), and nostril collapse. With that, we can deduce that the Toy Bulldog can experience one or all of these concerns. Be prepared to spend a lot of money on vet visits, especially in their old age. The good news is that a healthy Mini Bulldog can live up to 12 years! That's a long time for a dog with breathing problems. Mini English Bulldog Life A Tea cup Bulldog will never be lonely with this breed by your side. Temperament is an English Bulldog obedient, friendly, and deliberate. The pug is leagued, smart, charming and social. They have stubborn sides. Combining these qualities makes a very outgoing and sweet Mini English Bulldog. They are dog-friendly, cat-friendly (because they're too lazy to chase anything), and child-friendly. Overall, the Toy Bulldog is a great family pet. When it comes to noise, the Bull Pug has two levels. They barely bark... But they wink like crazy! Consider sleeping with your dog in other rooms. This type of shed moderately and is not hypoallergenic. It's not the best choice for people with allergies or people who don't like sweeping. The Mini Bulldog can adapt to any size of home, from a small apartment to an echoing mansion. Miniature English Bulldog vs English Bulldog - which breed is stronger? Watch the video below to see who wins the game fight! Grooming your needs since the Mini English Bulldog sheds regularly, you will have to give it weekly brushing to get rid of excess hair. Facial and body wrinkles on the dog's body make it even more sensitive skin allergies and infections, so you should carry out routine checks. It's not the lowest kind. Practice? No Thanks You can tell just by looking at the Toy Bulldog that you are not made for speed or stamina. He'd rather sleep all day than run. In fact, you'll only need to spend 30 minutes each day taking this dog outside to do your business. Puppies are more active than adults, but the Teacup Bulldogs are happy with a short walk twice a day for all ages. Food? Yes Please This chunky dog eats more than its typical little breed. Puppies need 3-4 cups a day. As adults, Mini English Bulldogs should not be overfed as they are prone to obesity. And the lack of exercise only makes things worse. Watch out for wet carpet stains Some dogs are simply easier to house train

than others. Pugs are included in the list of the top-10 heaviest varieties to house train, so you may have some wet carpet stains around your home for a while. It's this parent breed's stubborn personality that makes it harder to train overall. The sit, stay and roll over commands takes some time for the Toy Bulldog. Most dogs learn best when they are treated and positive reinforcement involved. If the Toy Bulldog is not trained properly, you can try to take alpha. Where to buy miniature English Bulldogs The Teacup Bulldog is a complex breed with many pros and cons. With its fragile health conditions, this dog cannot be left alone for hours on end. You need a responsible owner with enough money to take care of your health issues immediately. Otherwise, you can suffer. Speaking of spending habits, be prepared to fork over a whopping \$4,500 for a Mini Bulldog from a highly believable breeder. These breeders typically focus all their time and energy on raising healthy dogs, so it may be worth it in the long run. This could save you future vet visit. This compact crossroads are also known by many names, including Miniature Bulldog, Mini Bulldog, Tea pot Bulldog, Toy Bulldog, and Bullpug. But what is this hybrid really? What makes them unique? Read on and get to know this snoring poo better. What's a miniature English bulldog? This dog isn't just a standard English Bulldog bred smaller over generation. Instead, the Mini Bulldog is a crossed of Pug and the standard English Bulldog. An original purebred miniature English bulldog used to exist. They originated with the dwarfism of the English bulldogs and are considered an unhealthy version, which was used in the 19th century. The Mini English Bulldogs we know today were created by breeders in the 1980s. As with any designer dog, their goal was to create a healthier alternative to standard Bulldog. Unfortunately, this endeavor was not successful in the end. Meet the English Bulldog English Bulldog English Bulldogs, also known as British Bulldogs, unmistakable in a dog park. They're snat, low-ground, medium-sized physi who's got broad shoulders. It's bulldog huge head, underbite, and deep wrinkles that make them look grumpy, but most of the time, they're a sweetheart. The standard Bulldog we know today is very different from the (already extinct) Old English Bulldog. Medieval England used these tyrants for the bloody sport of bull bait. After all, they were bigger, heavier, and had a sportier build. From the 1200s to 1835, i was lured by bulls. After lawmakers passed a law banning bull bait, breeders no longer needed the old version of the Bulldog. Admirers of the breed are selectively bred kinder and less athletic dogs. In the late 1800s, the American Kennel Club (AKC) recognized this new English Bulldog. Apart from being stubborn and not easy to train, not very athletic, and low stamina, but calm and dignified. Since World War II, England has regarded this breed as a national icon. Meet the Pug The Pug is one of the oldest dog breeds around. They're from China. e. 206 and a. e. 200, and they were associates of both Tibetan monks and the Chinese royal family. Many assume that these dogs are the descendants of the Peking breed. Fun fact: Breeders selected Pugs to breed time over so that their wrinkles would spell out the Chinese character for princes. These doggos are uniquely small, with a body and deep chest. Don't confuse the flat face and the deep wrinkles that they're crazy or nervous about, it's just how they look, but this fido is charming and playful. The strong-willed Pug is not aggressive, but intuitive and people-pleaser They need his companions to be happy and often fall into depression when the owner is not around. What does a Tea-Sauced Bulldog look like? Much like their parents, Miniature English Bulldogs are big heads and skedgeers to build. They inherited the usual faux-grumpy look with their wrinkled face and wide jaw. This dog is flat-nosed with low-set brown eyes and short slish ears. Mini Bulldogs have short legs and stand low on the ground and they also have thick, short tails. How big is the miniature English Bulldogs get? When talking about dog breeds, the term miniature doesn't always mean playly-sized like a Pug. The full adult miniature English Bulldog weighs between 25 and 40 pounds (11-18 kg) and has a height of 10-14 inches (25-36 cm). By comparison, a standard English Bulldog stands 14-15 inches (36-38 cm) tall and can reach a maximum weight of 55 pounds (25 kg). If you think the measurements of British Bully are too much, then the miniature version may be for you. These mini fidos are excellent an match for the owners who live in the apartments. Coat and Color: Is the Mini Bulldogs hypoallergenic? Since both the Pugs and The English Bulldogs are not hypoallergenic, the Mini Bulldog is neither. If you're looking for an allergy-friendly canine pet, then you can scratch out the Teasing Bulldog from your list of breeds to consider. If no one has allergies in your home, you will have no problem with a short-coated puppy that sheds moderately. Miniature British Bulldogs come in a variety of jacket colours as well, including white, red, deer, or pied on the brindle. You may find these dogs in brown mask-like colorings of pugs and pied variations like the English Bulldogs. Some of them can be seen in merle and blue versions, but they are not very common. Before we proceed, take a look at this video of a standard British bully and a miniature English Bulldog playing rough together: What is the miniature English Bulldog's personality like? The Teasing Bulldog is an easy go and gentle poaar. They're the type of dog that likes being around their person or family. With that said, this hybrid can't be left alone for too long, or it can develop separation anxiety. So we do not recommend the Bullpug for those who spend most of their time away from home. As with most puppies, Small English Bulldog's can also have a lot of energy. You don't have to worry because it melts out pretty quickly when you've fully outgrown or when you reach maturity, which is about 18-36 months. When it comes to pets, it's best to know that this mini version of English Bulldog has average prey drive. We can expect that this fido won't go crazy pond when there are other dogs or cats in your home or during walks. They are also very friendly, so don't expect the mixed breed to excel to be a guard dog. It's up to you to decide whether kindness and less vocal behavior have good or bad qualities. If you prefer a rare barker, then this doggo may be for you. One more thing to discuss is the miniature English Bulldog temperament - there is a stubborn streak and can be challenging to train. It's a common trait found in the Standard Bulldogs, and you have to know what they're going to win by carrying out a command. Luckily, yummy dog treats are a simple solution. How to care for the Mini English Bulldog Bullpugs are not indoor-loving pets because they are lazy. They just can't stand the extreme weather, especially the heat. Aside from that, there are other care requirements that you would be responsible for if you choose to go with the Miniature Bulldog. When it comes to grooming, the jacket of this crossed is relatively easy to maintain. Brushing your hair for around 5-10 minutes a day can keep your shed under control. Baths can be given only if necessary, as this doggo is not very energetic to make everything dirty and smelly. An important cleaning task for Miniature English Bulldogs has something to do with wrinkled faces. Bacteria can easily collect inside crevices, so you can wipe inside and outside the wrinkles every single day to prevent raw skin and infection. Do not forget to check the ears and clean them once a week. For their diet, you should be able to feed it canine around 20 to 30 calories per pound of your body weight, or 3 to 4 cups of dry roughly grind daily. It's best to distribute their meals all day since this designer dog is not very active and is spread to obesity. Exercise can also help with this! It wouldn't be a lot of time because 30 minutes a day spent on walks or playing activities over enough teasing for the Bulldogs. Source Bullpugs is not the healthiest breed breeders create the Mini Bulldog in order to get a healthier standard for English Bulldogs. Unfortunately, every dog can inheritance and develop certain health issues. With breathing being a common problem with this mixed breed, their lifetime is between 9 and 12 years. Some other minor health problems include: It's hard to cool down in warm weather. Sometimes they have difficulty breathing and you may notice them wheezing. Developing Cherry Eye, usually about two years old or younger. The condition occurs when the third eyelid prolapses. Seasonal and food allergy development. If you notice contrast sneezing, hives, redness between their paws, and constant itching, take them to the vet. Hip dysplasia is when the soft tissue of the dog's hips remains loose, displacing the thigh head. A pain and arthritis. Infected wrinkles. If the facial folds are not properly groomed, you can get wrinkle dermatitis. The types of major health issues include cataracts, pulmonary stenosis, dental disease, Brachycephalic Respiratory Obstruction Syndrome (BAOS), Patient Sinus Syndrome, and Subaortic Stenosis. I highly recommend that you register your Teacup Bulldog with a pet insurance company. We also recommend doing this before you develop any pre-existing medical conditions. If they have pre-existing conditions, a future pet insurance agency may not cover costs associated with them. Where to buy or accept miniature English Bulldog? Since most designer dogs are trendy, available puppies are quite easy to find online. And that goes for the Mini Bulldog too! Before we provide you with some websites that are worth checking out to browse adorable furballs, you have to be prepared on how to find a responsible breeder. One of the factors that puppy customers consider is the price. The miniature English Bulldog can cost anywhere from \$800 to \$4,500. It seems like a huge range and kind of expensive, but some things that can affect how much a breeder would charge for a pup. This may include the place of the seller, the bloodline of the parent breeds, if the kennel is well known, and the number of litter in their breeding flock. Teasing Bullpugs have an average litter size of two to five pieces, so if there are only a few pups to sell, that can play a big role with the pricing. Whether you and the breeder have agreed on a price, there are still do't and don't, that you have to remember. Apart from the usual question-and-answer section, request to visit the kennel or the place where the dogs live. It will give you a chance to observe how the breeder cares for their canine, and to see how the parents and puppies are in terms of physical health and nature. While you're at it, ask the breeder to ask for the parents' medical and vaccination papers. If the puppies have already received shots, the seller should show it to you as well. People who put the comfort of their dogs as a top priority would have their males and females under generation testing before mating to avoid passing diseases to puppies.
