Visit the help section or contact us © 1996-2015, Amazon.com, Inc. or its affiliates These custom crossbow strings and cables are made specifically for the 2013 Raptor FX by Barnett and meet the exact specifications of the crossbows. Using our patented rope construction processes along with the best BCY fibers, we offer the best ropes you can put on your crossbow. Your 2013 older FX raptor will shoot better than ever and have zero creep and no service separation. America's Best Bowstrings is the market leader in crossbow ropes due to our advanced rope construction technologies used in the construction of our ropes. Our crossbow strings are made using our Ultra End loops and tighter portions for better fit and durability. We also use our DURA-SERV Center Servicing technology to deliver the toughest and most durable center portions available. Our custom string builder allows you to easily choose between tons of colors for strings and portions to help you create the best looking rope for your bow. Below you will find links to each series of custom crossbow strings we make for your bow. If you have any questions please call our string specialists at 877-893-7155 Home / Barnett / 2013 older Raptor FX Crossbow Debate Home • #1 • Aug 31, 2015 im thinking about buying a raptor but there are problem areas that I need to look for with the problem of breaking strings or if there are faulty chains I can identify that came in these or should I just get the viper chain / cables right away? Has anyone been seriously injured by a rope break? ps.: called Viper and have 2 different measurements listed for the Raptor - 32in chain 17.1/8in cables 33.1/4in rope 17in cables? I have 5 Barnett crossbows. I've never had a rope break. But I also take good care of my strings by using a high quality rail lubricant called Scorpion Venom. I've filmed every crossbow hundreds of times, however, the strings still look new. One of the crossbows I have is from the Raptor family. It's called Veloci Raptor FX. It is made exclusively for Gander Mountain. It comes with improved range, a higher package and shoots 10 fps faster than the traditional Raptor FX. The Raptor FX is typically sold for \$399 and the Veloci Raptor FX sells for \$499. But right now you can for the Veloci FX for sale on Gander Mountain for the same price as the Raptor FX \$399. I love all my Barnett crossbows. I've been around the block with the crossbow makers, Barnett has always exceeded my high expectations that I need from all my hunting equipment. The Raptor Veloci Veloci it is lightweight and compact limbs just like the Raptor FX. The Veloci Raptor FX and Raptor FX have a strong following and are large crossbows. love launt ? The problem with Barnett's newer arches is the sharp curvature of the end of the wires and the rope on the cams. This causes service separation leading to broken cables and ropes. There are many who have no problem with their bows, but there are many more who do. Remember that the few who post here are not a true percentage of Barnett's arch owners. You have a 50/50 photo of either getting a smooth arc or a troubled arc. I have a jackal and had the same problem of separation and wear on the cables and rope until I replaced them with custom quality cables and rope. Good luck with your search. Sent from my Galaxy Note 4 using Tapataik ? It's really a harder question to answer than you think. The Barnetts listed in the area of \$500.00 and less, are bought by a lot of first-time buyers, who are not families with how to shoot or care for their xbow, and some dry fires happen with rope breakage, what percentage of this is any guess, but I would think it would have to be considered on the more than all the broken strings, plus there are tons sold. So the total amount could be misleading when reading or hearing about broken strings. So I guess I really couldn't say for sure. Plus Barnett is the sales leader, so this could be a factor as well. Just my thoughts. Good luck, be safe. But I would say, Viper is probably a better string, from what I've heard in this forum. Debate Home • #5 • August 31, 2015 I remember reading somewhere that the black and red strings of the raptors were considered a bad race and that the new ones are all black? Can anyone comment? because many of the replacement strings in the net are black and red can raptors use the recruit's strings? both are 32? Here is the string and cable information for Veloci Raptor FX, Raptor FX, Lady Raptor, Red/Black Recruit, and Recruit Black/Grey Veloci Raptor FX: Crosswire String ..... 16166 Chain Length..... 32.938 Rope material..... DF97 String Strand Count.... 28 Cable Length..... 17.625 Cable Material..... DF97 Cable Strand Count..... 28 Crosswire Cable ..... 16167 Raptor FX Crosswire String..... 16227 Chain Length..... 32.938 Rope material..... DF97 String Strand Count..... 28 Cable Length..... 17.625 Cable Material..... DF97 Cable Strand Count..... 28 Crosswire Cable ..... 16166 Chain Length..... 32.938 Rope material..... DF97 String Strand Count..... 28 Cable Length..... 16.750 Cable Material..... DF97 Cable Strand Count..... 28 Crosswire Cable ..... 16166 Recruiting Red/Black Cross Wire Rope..... 16166 Chain Length..... 32.938 Rope material..... DF97 String Strand Count..... 28 Cable Length..... 17.625 Maternal Cable..... DF97 Cable Strand Count..... 28 Crosswire Cable ..... 16198 I have the red/black rope and the cable on my Veloci Raptor FX and I have had no problem. I've put over 200 photos on those strings and they still look new. I also have two family members and 4 friends who also picked up the Veloci Raptor FX (after shooting mine), and none of them have any either. love launt ? I have an FX Raptor and have had no problems with red/black strings and cables. I bought mine right after Christmas 2014 and have shot it many times since then. Debate Home • #8 • Aug 31, 2015 so I bought the raptor and wrongly get the red/black rope for him and report back on how it works. Here is the string and cable information for Veloci Raptor FX, Raptor FX, Lady Raptor, Red/Black Recruit, and Recruit Black/Grey Veloci Raptor FX: Crosswire String ..... 16166 Chain Length..... 32.938 Rope material..... DF97 Cable Strand Count..... 28 Crosswire Cable ..... 16146 Recruiting Red/Black Cross Wire Rope..... 16166 Chain Length..... 32.938 Rope material..... DF97 String Strand Count..... 28 Cable Length..... 17.625 Maternal Cable..... DF97 Cable Strand Count..... 28 Crosswire Cable ..... 16167 Recruit Grey/Black Crosswire Rope..... 16197 Rope Length..... 32.938 Rope material..... DF97 String Strand Count.... 28 Cable Length..... 17.625 Maternal Cable..... DF97 Cable Strand Count..... 28 Crosswire Cable ..... 16198 I have the red/black rope and the cable on my Veloci Raptor FX and I have had no problem. I've put over 200 photos on those strings and they still look new. I also have two family members and 4 friends who also picked up the Veloci Raptor FX (after shooting mine), and none of them have any either. love launt ? My Raptor seems to have the same specifications as the Lady Raptor. The string is 32 and the cables are 16.7 My Raptor seems to have the same specifications as Lady Raptor. The string is 32 32 the wires are 16.7 I'm not sure what to say about it. Barnett (Jesse) sent me a pdf file with the string/cable information for all his crossbows. I wish I could publish the pdf, but it won't let me. But if you want a copy of it you can PM me your email address and I will be more than happy to send you the pdf by email. I'd be more than happy to send a copy to someone. I hope this helps the hunt in love. At some point they changed something. I remember people saying they were getting different ropes and pockets on their limbs when they had some string failures. I bought mine in December 2013 before they were even on Barnett's page, maybe the first race in different spec'd I have one of the 32.9 strings sitting in my bow box, it's certainly too long for my bow. Arc.
