The three Lost Sectors in Edge artifacts and The Tangle are:The location confluxThe Carrion Pit locationThe Rift location A technical look at the PC version of Destiny 2 from Digital Foundry. The Conflux Location: From the shesing point of the Cistern, head north, keeping the edge of the cliff on your left, following the main path as you curve. Keeping the cliff to your left, you will reach a white and to the top of the waterfall, where you will see the Lost Sector symbol on a square outcrop of rock on the other side. From here, look to the left, and you'll see a giant tree, but before that, several rectangles-rectangles taking down. Go down these, then look back at these platforms in the direction of the tree. You'll see the Conflux Lost Sector entry at the base of these platforms. Here is the location on the map to help reduce it further. Strategy: Head inward, then turn left and fall. Pass the sunken spheres on your left and then go to the opening at the end of this room. Go down, turn right and you'll be in the main chamber of this dungeon. Time to take down the Cabal! Deal with the patrolling Scions, then focus on the Incendiors as they can cause you some suffering from afar. Warhounds will also be released to your right, but there are five in total, not hard to defeat in small numbers. The head of the level, Primus Cal'aug, is not very hard, but he has those heat-seeking missiles that blind you like flash bangs. Use the lid at the bottom of the stairs to pick it up. Watch out for the Psions that cover you from the distant platforms. Location: Look for what appears to be a rough ship in the middle of the Glade of Echoes. On the side closest to the entrance to the area, look for a large ramp. On your left side there's some torn steel with the symbol on the side. Pass the symbol and turn immediately to the right. Strategy: Follow the passage down, then turn left, then turn left again. Continue through the tunnel, turn left at the end, then turn right. Cross the container bridge in this area, and walk down the ramp toward the blue-lit opening. Now turn left and you will enter the large main area. Take the Shanks and vandals in this first section, and be wary of Tracer Shank (we find him patrolling in the upper left corner of the entrance itself) and a Heavy Shank just in front of you. It can cause a lot of damage, but it's not too hard to take down, since it doesn't have a shield. Turn left and climb the illuminated ramp (sure place the Vandals and Dregs on your left before you do. Turn left at the top to enter the final section of this area. :: The 20 best Xbox One games you can play now Here you'll find some more Dregs and Vandals and you boss, a Server called Nariks Reborn. It's next to a broken cylindrical container on the other side of the area you're in. Go to him, but watch out for a fallen patrol (which may contain a captain) prowling around him. Strategy: The dungeon entrance is just behind the container with the symbol. Head inside, turn left and jump over the metal fence. Go down the blue-lit corridor and jump over another metal fence. Turn left and jump over the stone blocks. Now turn left to enter a large camera. This area is full of Dregs and vandals, so focus on the Vandals, as most are armed with sniper rifles and can cause serious group damage. Even a decent hand cannon works well here. Once they are all clean, go to the right corner of the room to find another entrance. Now you're going to be a huge blue slum. Jump to the right side and you will immediately encounter the Fallen. You'll find many Dregs, Vandals and Shanks, as well as the boss (Talas, Captain of twilight). You can use the lid of the lower containers, or, jump to the higher levels and use your elevation to knock the Fallen below. Beware of some vandals already placed at this level that will need to be knocked down beforehand. The chest can be found on the left side (from where you first entered the area).
