Sims 4 satisfaction points mod

Emphasis Emphasis Emphasis Emphasis Emphasis February 06, 2020 - Delivered to Scumbumbo but his work and memories are still keeping his life alive for many of the people he touched. To download fixes to his mods, check [this](#) and direct any questions or concerns to his discord channel linked to it. 964 Thanks Thanks 342 Favorites Note: With the addition of cheats sims.give_satisfaction_points the December 16 (career) patch, this mode is no longer needed. However, the mode still works and doesn't need to be test cheat enabled, so you can continue to use it, add it to your game if you don't already have it, or use a new built-in cheat. Have your way! Satisfied Cheat Console Command Is a simple script that adds console commands so that you can increase (or decrease) satisfaction with the amount you can handle this game. This is a generic sim_commands.py that whims_give_bucks functions of the built-in script, but do not require test cheats or debug cheats to be enabled. Update: Accept the Sim name instead of asking for a SIM ID. The target simulation does not need to be in the current lot. Check to ensure that satisfaction is not reduced below zero. The installation extracts .ts4script from the download zip file MTS_Scumbumbo_SatisfactionCheat mods folder. This is script mode, so scripting must be enabled. This mode must be compatible with all versions of the game after 1.47.49 (November 13, 2018). Because it is a new command, you should not refer to any other script mode. Use Ctrl-Shift-C to open the console window. This is a live command type, so you don't need to use testcheats. Enter the Satisfaction command and the amount (or negative decrease) to increase satisfaction. This does not negate or satisfy the current whims or aspirational problems. The amount applies to the currently selected simulation or if you name another sim to that SIM. Yemando 25000 John Doe Satisfaction 1000 Added satisfaction to Jane Doe Extra Credit 1000 Satisfaction: All outstanding people who worked to decompile the game's basic script. Special thanks to Fetal Dip for his re-power script.
