In today's article we're going to learn how to install galaxy S7 camera app on your old Samsung device. Since the release of the Galaxy S7 and S7 Edge developers have ported almost all apps. We saw Galaxy S7 keyboard apk delivered to other devices and also some other apps. So before deciding to upgrade the Galaxy S7 or S7 Edge you can taste some of how it feels by installing their apps. We also wrote another post about some other Galaxy S7 apps being available for download and On other Samsung devices. So why wait, get all the Forties apps of the Galaxy S7 and S7 Edge and install them on your Samsung phone. The apps that have been accessed so far include Browser, S Health, Gallery, Wallpapers and few others. Around Android forums we've seen many people ask for other apps such as Camera, but these apps seem to require a little more work than others. Fortunately a developer named henrylife after almost a month, the Galaxy Port S7 Camera App for other Samsung devices. According to the developer the camera app should work on all Samsung devices running Marshmallow TouchWiz firmware. So that means you can install on your Note 4, Note 5, Galaxy S5, Galaxy S6 and so on. As long as the firmware you use is TouchWiz Marshmallow you can go and try it. You can download the Galaxy S7 Camera App Apk and install it immediately. The new camera app comes with new options and features that let you create better images. So when you have a chance to improve the camera app why not do it. How to install Galaxy S7 camera app and gallery on other devices before changing any file on your device we always recommend doing backup. Because you want to change camera, make a backup of the current app. There are many ways to do this. You save the current camera APK file elsewhere or use the software to back it up. A good one is titanium backup. If you have root access and custom TWRP recovery from what we recommend doing nandroid backup. It will create a full copy of your current ROM and you can easily restore it with one click if something goes wrong. If you want to get a full experience of the Galaxy S7 camera you need to flash the zip file. It also includes the gallery app not just the camera. But to flash the zip file there must be a custom recovery installed. If you haven't installed one on your Samsung phone yet, check out our custom recovery section. After installing custom recovery go further. Download Galaxy S7 camera and zip gallery file, S7Edge_Camera_by_henrylife.zip. Put the downloaded file somewhere in your phone's internal memory and reboot your phone for recovery. To do this press and hold the volume + home + power button. After your phone boots into recovery navigate to install section and then select the zip file you downloaded. Flash the file and reboot your phone. When it boots you will see the new camera and gallery app installed on your device. Don't forget to have fun and if you have any question don't invite to ask in the comment section below.
