Getting KO rewards prevents ads from running!# Fix Korean / / Localization of Starter Pack * Improved server communication I love this game and it is very fun to play and customize, but there are a lot of things that need to be improved and not something else. Examples: Sometimes when you click on the fight with the boss or weapon the game just crashes, sometimes when you click on the weapon the game glitches, and everything is blurred and stretched on the screen, so I have to restart the game manually. There are also some very annoying things in this game, first of all, when you get a gift from a small helicopter and watch a video to see the power, and after you collect it just a certain amount of time to use it, and if you add a play that wastes time off the power and ever completely makes the power up useless, so pausing power ups feature while adding game would be greatly appreciated. I understand that there are ads that the game goes, however. After every 2 knockouts/kills and kills, is there an addition? As for the Iphone X, the game does not fully fit the screen, so if I go to settings or something, the game will not let me close the settings app from the game, so I am forced to close the app and restart it. Between since the game doesn't fully fit the screen, there are black bars at the edges, and coins, items, and gems fall off the tile look and don't get collected. Please fix it somehow, somehow? Do we have to bring in breaking news soon? When I open the game a picture of the boss with a strip in the middle of the screen pops up and nothing but black around and after a few seconds crashes. I've tried almost everything to get it to work except for deleting and reinstalling the app. I won't delete it again until after the next update I'll see if it's fixed yet. Thank you and please solve this problem. Ps. It's been so far over 3-5 months. I really like this game and want to keep playing, so please fix it thanks.
