Real reading and writing ebook

The home office is valuable to many homeowners these days, especially if you are telecommunications and do much of your work comfortably. But the reading and writing room is a little different from the traditional office. This room is for someone who really wants to get things done, with no distractions that the home office contains - phones, faxes and anything else that can interrupt your concentration. If you're a writer or journalist or even just a cheeky reader, you'll benefit from creating the perfect place of serenity and isolation in your home. Where do I start? Fear not, literary genius, here are 10 tips for your own reading and writing room. Content Finding a nice, quiet place with a pen and paper (or keyboard) is a bigger challenge than you might think. In addition to the normal distraction of modern life, such as television and phone, there are all kinds of sounds that can interrupt an otherwise productive reading or writing session. Your goal is to minimize these things, so choose a room in your house that is private and far from the street. A swarm of attics or a room behind the house is a good choice. And if you want to go the extra mile, you can always soundproof the room with professional wall insulation or heavy curtains. Advertisement If you are going to write the next great American novel, you should do it comfortably. With the exception of a desk with a comfortable and comfortable chair of your choice, consider a love seat or greasy chair where you can spend time. A lot of writing is taking notes, research and brainstorming, and sometimes it helps get off the table for that kind of thing. And in our opinion, reading is best done curled up on pillows than sitting directly at the desk. The ad Media Room requires a dark space in your home, but if you want to read and write, you want a clean, well-lituminating place. Natural light is always the best, so if you are a morning person, go with the east facing room; Head west if you do a better job late in the day. If you are a night cul-at-night game, you need to pay attention to the artificial light in the room. Mood lighting with lamps can be effective, but make sure it's not so atmospheric that you're more inclined to kick back on the couch and get a little closed eye. Ad Phone, TV, radio and Internet access is the key to modern life for most people, but they are a distraction if you are trying to get reading or writing done. Our advice is that you don't even allow a phone in the room, but if you need to, at least turn down the ringtone while you work. Television certainly has no place in the reading and writing room, but the Internet is a little trickier. Some authors need the Internet as a research tool, but it can easily lead to email checking and non-essential Web surfing. Consider wireless removing or shutting down When it's time to put the pen on paper. Ad There is no better way to inspire you to read and write than to surround yourself with great literary works. Simply a well-stocked library nearby can make the author feel more like writing. And if you're a reader, getting a library at your fingertips is a must. Reading a few points from your favorite book can also serve as inspiration for the author, so stock the shelves with your favorite classics. And keep in mind that books existed as research tools long before the Internet, so use them to get yourself into the right literary mindset. Advertisement You cannot find the kitchen without a cutting board, and it is not advisable to find a reading and writing room without the tools necessary for working. Your computer may be the composition tool you want, but also make sure you have plenty of paper and pens or pens. Whatever tools you use, be sure to keep plenty in stock. Many writers are superstitious creatures, and they can't find that favorite pen that can lead to a dreaded writer's block - or at least a reason to stop writing and go to the store. There are many forms of ad inspiration, so it's important that your reading and writing room surrounds you with as many things as possible. If you're inspired by people or family stories, fill your room with a generous framed photo of your loved ones. Photographs and quotes from famous authors are also food for thought and help inspire you or even keep you on track when your ideas are running low. If nature gets you in the mood, bring pictures of some of your favorite scenes, such as forest forest or sea at sunset. The sounds that drop into the reading and writing room have a lot to do with what they do there. Music can stimulate the creative process, but try to stick to music that has no chance of becoming a distraction. Other people relax with the soothing abstract sounds of sea waves or wind chives. If you are lucky enough to live near these real sounds, open those windows. If not, get a sound machine that can play all the shades that inspire you to work, whether it's a babbling stream or a rainforest. Ad If you have children and want to get a job at home, you should consider keeping a reading and writing room in a childless area. Most freelance journalists and writers say treating a workday like you're going to an office building is the way to go, so explain to your kids that while mom or dad can be home, they're not available during work hours - unless it's a real emergency, of course. You can relax this pause during the day so your kids can get the attention they need. Think of your reading and writing room as an adult clubhouse. True, your pets do not ask nearly as many questions as children, but they can still be a distraction. If you have a lazy laboratory that is happy to lie on the floor and is near you, he can be a quiet comfort. But if Fido is a bartender or wants to get in the bin, you'll spend more time cleaning up after all his fun. And if your furry cat friend is just our friend, he might want to sit on your hands while you write or lie on the papers you need. This is amusing if you're in a procrastinating mood, but a big distraction when the work flows. The British standardize what it means to have an object of silver as early as the 14th century. But how do you know if something's a pound or not? Quotes. Grammarbook.com, 2010. ◆limerkit/lainaukset.asp pressure levels. Coolmath.com, 2010. Richard. Think twice about taking your kids to work. Usatoday.com 26 April 2011. s hard to write. It can be difficult to find the right set of words that convey thoughts and ideas. A sentence may make sense when you write it out, but reading it aloud can be a different story. You can improve your writing make sure it sounds good when you read aloud. At Fast Company, author Laura Vanderkam offers a few tips for effective speaking, but her tip to write strategically is solid writing advice in general:While people read something quietly to themselves, they actually say the words in their heads. This means that writing, which sounds good when read aloud, comes out as good writing, even if it is never read aloud. One way to implement this is simply to read what you have already written and make sure it is consistent. However, I also use the computer's text-to-audio feature to read my writing aloud. Hearing my words from a third party makes it easier to detect strange wording. I also sometimes use audio typing to write from scratch (you can find this in the Google Docs app > audiobook). If you're having trouble getting words out of your head, saying them out loud can make it easier to parse your writing. Vanderkam offers additional tips throughout its post in the link below. How to make your voice sound better so people actually listen to you | Fast CompanyPhoto by Caleb Roenigk Source: Barnes & Noble Do you want to write a book in the digital age? You're lucky because setting up an e-book isn't terribly difficult, and we explain how to do it right here. However, there are a few aspects you need to make before continuing: what you want to do with your e-book and where you want it to go. What shouldn't be done even if you're going to write, the easiest way to make it an e-book is to make sure that all the designs are very simple. Amazon and eBookPartnership have several things they suggest avoid when writing an e-book: Page numbers: Because the side sizes of readers vary and devices can format their own page numbers. Headers and footers: These may not be saved in an e-book, so if they're vital, that's a problem. Edges, backgrounds and fancy letters to start the song: Remember, keep it simple. Different text colors and fonts: Not all devices support all fonts, and some don't support color, so style options can be lost. If those styles are important, you're in trouble. Multi-column side shapes: These are likely to mess up when the device tries to fit them onto the page. Text boxes: According to where they land on the side of a device, they may break and split between the pages. Ads and references to other resellers: If you try to publish this e-book, such things are unlikely to be allowed. Bullets such as these: they may not be supported by eBook formats or devices. Complex formats If you really want to incorporate a lot of these features, you can try to create a PDF of your writing. But this may not be ideal. In some cases, each page can be viewed as an image, allowing it to be too small to read on devices. Otherwise, a device reading a PDF file may have a way to control the format of the PDF file, allowing these features to still crush the translation. For more information about documents that need very specific formatting, see the eBookPartnership Guide on How to Prepare Such a Document. However, it is quite more complicated, so unless absolutely necessary, it would be much easier to keep the document simple. Source: Amazon What to Do Standard Word Document (usually .doc or .docx), such as One in Microsoft Word or OpenOffice, is the starting point. You don't have to worry about the page size or page edges, because the device that reads your e-book controls them all. Play it safe with standard fonts like Arial, Georgia, or Times New Roman and average font sizes 9 through 12 – because the device is likely to take control of fonts and font sizes. If you have numbers, you can format them in the text style Heading 1, and you can use the Heading 2 button for subtitles or section headings. Add a page break at the end of the chapter to make sure that the next chapter starts as a new page in the e-book. If you want paragraphs to be indented correctly, do not use the Tab key or spaces. Instead, make sure that the paragraph style in the Word document automatically indents the first line of each paragraph. You can also upload pictures to a file. Select JPEG because they are a widely accepted format, wrap text around them. Also, make sure that the actual image file is uploaded to the document and that you have not just copied and pasted the picture. When the document is already done, you can move on. Mobi If you want to create a .mobi file to share on Amazon, you can export the word documentary to Amazon and follow the instructions here. Here's more help adding title and copyright pages and a page like them, as well as a table of contents. ePub If you want to create an .epub file for Nook eReaders and many other device types, you can search for a different application or Web service that converts Word documents to ePub files. A simple Web search doc to ePub should get a handful of results. Another option is to use OpenOffice Writer , which is part of a free open source software package that can be downloaded here. Then install the Writer2ePub extension, which can be found here, or another extension like it. In Writer2ePub, you must first .odt document as a standard OpenOffices file. You can then click the Writer2ePub button (it will be added to the OpenOffice toolbar when the plug-in is installed correctly), add all the information from the e-book you want, and – voila – your ePub file will appear in the same folder where the document is stored. If you plan to send your ePub book to Barnes & Noble's Nook bookstore, see here. Check out entertainment cheat sheet on Facebook! More from entertainment cheat sheet: Sheet:
