F Gm7 Bbmaj7 C7 Mister Sandman to bring us the F Gm7 Bbmaj7 C7 F6 Mister Sandman to make us dream to celebrate the release of my new book, The National Fingerstyle Guitar. I think it would be fun to demolish Mr. Sandman, the classic Chet Atkins piece and use to introduce you to this timeless style. Travis picking a style guitar popularized by Merle Travis (though he absolutely didn't invent it!), characterized by alternating basslines and syncopated melodies, giving the illusion of more than one guitar being played. Before looking at the song, here's Chet playing this wonderful piece To find out any piece of Travis picking in style, the first step is to get to grips with the chords, as the melody of any particular piece is to sit on top of the chord handle so you can keep that alternating bass line. Once the chords are learned, we can come back and look at thumb picking patterns and adding a melody. The first chord could be called Amaq13, a rather complex chord name, but that means you have a maj chord along with maj7th and 6th (13th day). You also notice 5 (E) has been released, this note adds very little chord and is often dropped in favor of a more colorful note (like the 6th). Mr. Sandman Chord 1: It moves the G #7 barre chord at fret 4. I would expect most of you to have had this chord form but don't underestimate the importance of getting a good strong barre with the first finger as you will need that high E string ringing later in the melody. Mr. Sandman Chord 2: Next up is the C #9 chord, this is pretty easy to play. Use the 2nd finger for note A in string A, 1 finger for note D, and then unseat the top 3 strings with finger 3. Mr. Sandman Chord 3: The next chord is the Fitchord, and for the sake of looking at the Merle Travis style I've fingered this, using your thumb to play a note on low E, with 4 fingers playing notes on, D, G, and B strings. Playing chords with your thumb may feel strange at first, but be sure it's very common from Travis to Hendrix to Joe Pass and beyond. This is perfectly acceptable! Mr. Sandman Chord 4: Next is the E9, exactly the same as the C#9 chord, but two frets lower, starting with B. Mr. Sandman Chord 5 Next Chord is technically called E13, similar to the Amaq13 chord, meaning that 6. (13) 7 chords have been added. In this case, E7 (E predominant 7). It tells you the difference in naming conventions too. When you add an extension to a dominant chord, it is named based on that extension, so E7 becomes E9, E11, or E13. E11 is the dominant chord. On the other hand, when the extension is added maj7 chord, that maj part of the name there distinguish it from the dominant chord. So Ema7 becomes Ema9 etc. Emaq13 - E G #B D #F #C #E13 - E G B D F #C # F Mr. Sandman Horda 6 Now we are moving back up to the 5 fret field triade for the top 4 runners, but with an open bass note. These chord types are included in the advanced chords section of the Country Fingerstyle Guitar. The Sandman Chord 7 Penultimate Chord is another 9 chord, this time F9 up at fret. Sandman Chord Aricde 8 The last chord is E9, which requires you to take the previous chord and move it down fret. Mr Sandman Chord 9 take the time with these chords and commit to remembering them. Playing a piece like this is about progression is automatic, as the expert will be free to envisage the melody to a song they know, playing around with notes available around the chord. Good luck and I'll see you on part 2 soon! If you want a much more country finger style guitar, check out your new book! Mister SFandman, Mister SFandman, E7bring me a dream, A7 (#5).
