Brutal black dragon alt guide osrs

BBD redirects here. For the blue partner, see Brutal blue dragon. Brutal black dragons are murderous monsters found in Kourend's Catacombs. Require level 77 Slayer to be damaged, they are a more difficult version of the black dragon and as such can be killed as an alternative to a black dragon Slayer mission. Players can access the dragons by heading to the Dragon Cave and running through brutal blue and red dragons, or otherwise, using holes found in Lovakengj to get them there immediately (unlocking this shortcut requires climbing the vine from inside the crypt first). Like all brutal dragons, they use Melee, Magic and long-range dragonfire. Using both protect from Magic (with a few potions of prayer) and a fireproof potion will completely protect the player from damage, if the player does not stand within the Melee range. The brutal black dragon is known for dropping dragon cypriots not through rare drop boards, which is one of its most frequent drops. Locations[edit | edit source] Drop rate estimated based on 118, 1400 kills from the Drop Rate Project, unless otherwise cited. Brutal black dragon killings averaged 27,338.89. Kill the average brutal black dragon while on a Konar mission worth 29,030.99. 100%[edit | edit source] Uniques[edit | edit source] There is 1 in 128 chances to touch the single drop board. Below lists the rate of decrease in efficiency. The bullet attacks the magic of the brutal black dragon just like Iban Blast. The brutal black dragon is the only monster to have two items from the super rare baby board of the rare drop board on their standard drop board (runes and dragon cysies). Your actual profit may be higher or lower depending on your speed and luck. At maximum efficiency, it is possible to get 70-75 kills per hour. Brutal black dragons can be found in Kourend's catacombs. The average value of a kill is 26,476.54 coins. It is recommended to bring 1-2 potions of prayer (depending on the level of prayer), a different, sacred drug and a prolonged fire resistance. Protection from Magic should always be activated, or death is inevitably due to their extremely powerful magic attacks as well as dragonfire. Together, Protect from Magic and Antifire disable all damage remotely, but players need to make sure that they are both turned on at the same time. Melee damage is still very damaging, so players should be careful if picking up the battlefield while next to an attacking dragon. Players should always restore prayers at home owned by the player or at Ferox Enclave and move back using Xeric's talisman. Due to ongoing price changes on the Grand Exchange, some of the information in this article may or may not appear current. You should check the price directly on the Major Exchange before making large investments by any method. All prices on this page are hosted, meaning they may appear overdue.
