I saw youtube on my iphone and all the noises stopped. I checked and my headphones were still connected. I opened my Bluetooth area in the settings, but then they parted. I hadn't pressed any buttons or turned off the headphones. I tried to reconnect them, but the charging circuit only as long as I leave it. I tried to turn off Bluetooth. my headphones and my phone, but it still won't connect. I also tried to connect them to my laptop, which was connected to them in the past, but it wouldn't connect either. Sometimes when I try to connect it on my phone, the circle turns for a few minutes, which says that the connection was not successful. The headphones are turned on and they still say pairing as soon as I turn them on, but they refuse to connect to anything. Any advice is welcome.
