## Crash bandicoot 2 ps4 gems guide

Just like the Light Gems that will be collected throughout your journey to defeat Dr. Cortex for the second time, you'll also need to recover the gems known as the Colored Gems with their magical properties. They are five in total in Crash Bandicoot 2 and can be collected by completing certain objectives at the level where the gem resides. Unlike the first game, it is not necessary to complete these tasks without losing a life. Below is the list of each colored gem and its location within the second crash title as part of the Crash Bandicoot N'Sane Trilogy. Gem Color, Location In Game, How To Get The Gem, Blue Gem, Level 1: Turtle Woods, Complete the level without breaking a single box. Green Gem, Level 10: The Eel Business, At the end of the level, you'll reach a fork in the road. Take the right path, escape the nitro boxes and jump through the hidden door at the end of the passage to find the jewel. Yellow Gem, Level 11: Plant Foods, Complete the level within the time limit that appears on the screen after the first checkpoint. Red Gem, Level 2: Snow Go, First of all, you will need to get to the Hidden Secret Exit platform at Level 7: Air Crash. After the first checkpoint, jump several boxes into the water to reach the Secret Exit. Then you will need to use the Snow Go warp portal that is unlocked in the Secret Warp Room. Complete this newly accessed area to reach the jewel. Purple Gem, Level 20: Bee-Havin', Climb the fake ladder from the Nitro box to be deformed for a bonus round. Complete this area to get the jewel. How to unlock everything in each game. Crash Bandicoot is back! The N Sane trilogy features remakes of the original three PlayStation adventures, with a brilliant facelift that keeps incredible levels and challenges intact, and is now a profiteer on switch, PC and Xbox, as well as PS4. When completing each step is one thing, completing them 100% is something else altogether. Not only that, but the way you find all gem locations and key locations is slightly different in each game, so knowing how this works will save you a lot of time and hassle. If you're looking for more general tips and an explanation of what's new in the meantime, you'll want to take a look at our Crash Bandicoot N. Sane Trilogy Guide and tips. Each step has a Gem to unlock, which is done by smashing each box into a single runthrough of a level. In the Stages of the White Gem, you may lose a life while trying this, but colored gems require you to complete it in a single attempt, with no lives lost. In both cases, you also need to clean up your special steps, but luckily you can at least die as many times as you want in those without risking losing a life or gem. Island Stage Gem Required Gem Unlocked 1 N. There is also an additional layer of complexity for how you get colored gems. Instead of simply clearing a level without dying, you now have to perform a variety of actions - like finishing a level without destroying any box. Finally, death routes were introduced. These are special platforms that take you to bonus rounds, but are only available if you reach them without dying at that level. Throw the fact that you will need to go back to one or two of them, and they are a very unastardly mechanic. Good luck!
