## Eddie bauer xrs 65 rear facing installation

10/10/2017

Eddie Bauer may not be the first brand to come to mind when buying a car seat, but the XRS 65 is actually manufactured by the company that makes Safety 1st and Maxi-Cosi seats. This seat is the same as the Safety 1st Guide 65, but with different fabric. Read on for a detailed review of the XRS 65. Safety features While there is nothing innovative about the safety features of the XRS 65, this seat has all passed the same NHTSA crash tests that its competitors have. It has side impact protection built into the frame, which is not something you get with low-end car seats. If you are looking for a more advanced seat, you need to look beyond this price range and more in the neighborhood of 200 dollars+. Weight and dimensions Depth: 22 – The depth of this seat is between average and on the high side. In smaller cars with front seats on the way back, you probably don't have room for that seat. For larger cars or with average high passengers in a mid-size car, it should fit well. Width: 18.5 – The width is slightly below average, so it allows a good amount of space for other passengers in the back seat. Height: 25 – The height is on the lower side, so that the view on the back is not disturbed. Weight: 13.6 pounds – This is a fairly light seat. Combined with its relatively compact size, this makes it a good fit for travel. It is also FAA approved for the use of airlines. Installation The user manual is pretty well designed. The simple installation could be better. As with all convertible seats, the seat should be more reclined in the reserve. This seat includes a Recline Bar that you flip down to stay upright when you move forward. However, there is no bubble plane to ensure that the seat is installed at the right angle – just a simple plane line on the upper part of the seat. When facing forward, this line actually needs to tilt a little forward so that the seat is on the right slope, which is a little confusing. Both the LATCH and belt mounting methods can prove difficult if you try to tighten the movement of the seat as recommended so well that the movement of the seat is reduced to less than an inch. If you have this problem, I recommend trying both installation methods to see which is more secure. Unfortunately, the simple installation is not the strength of this seat. Back The XRS 65 can be used rear-facing from 5 pounds and up to 40 pounds. This is a higher weight restriction than many seats. Infant use is not and can be bundled, but this is really just need ingenuating about 10-12 pounds. Forward position As the name suggests, the XRS 65 has a weight limit of 65 pounds when used forward. That's pretty average. The height limit is 52 inches, which is a little better than most seats. This seat should be suitable for most children up to at least 7 years of age. Adjustment One weakly weak this seat tightens the belt. This is done with an adjustment belt between the legs, which is common in many seats, but this takes quite a lot of strength to tighten. In rear-facing mode, the strap is against the backrest and that makes it even harder. Otherwise, the seat has good adjustment with three adjustment slots for the buckle and five for the shoulder straps. To switch to one of these positions, you must re-energise the buckle or strap. The headrest is also adjustable to five positions with a beam in the back. Fabric and design As already mentioned, the only difference between the XRS 65 and Dem Guide 65 is the fabric. The Eddie Bauer seat has a sewn fabric with a look similar to some winter coats. It is quite well padded and soft, and feels a bit nicer than the Guide 65, albeit at a higher price. This seat is available in three colours, as shown above: Archive, Whitman and Black. The seat cover is not the easiest to remove, but it is completely removable. Unfortunately, it is not machine washable – it must be washed by hand and air-dried. Warranty and customer service This seat has a one-year warranty that is the industry standard. Dorel Juvenile Group, the manufacturer of this seat, does not have as good service as some of the other major brands – reviews are a bit mixed. If you anticipate looking for help with installation or other questions, choosing another brand in this price range such as Graco or Evenflo can be a good idea. Lifespan The XRS 65 expires 6 years from the date of manufacture, which corresponds to most car seats on the market. Value Value Although there are some weaknesses in this seat, this is typical of a cheaper car seat. It is actually a pretty good price-performance ratio for fabric quality and size/weight limits. Accessories included A children's insert is included to support very small babies. A detachable cup holder is also included in the scope of delivery. It is not super robust, but is a nice addition to have. Pros Pretty narrow and light Nice upholstery and fabric for the price Good range of adjustment Good height and weight limits Good value Cons Difficult installation Harness is hard to get tight cover is not machine washable conclusion Overall, the Eddie Bauer XRS 65 is a pretty good value. It's worth comparing the prices between the XRS 65 and The Guide 65 because they're so similar. If the installation on these seats were easier, I would give them very high marks. As it is, there aren't many seats in this price range with a 65 pound weight limit, so this is about as good as it gets. If you are in the to spend about 20-40 dollars more, the Graco MyRide 65 LX is a good choice with easier installation. Some parents will advise you to skip the Eddie Bauer XRS 65 Cabrio Car Seat – another affordable two-way car seat that seems very similar to the old Safety 1st 65. Seems. Seat. Is this seat worth it? Let's find out. Eddie Bauer XRS 65 Convertible Car Seat Ideal Use Rear Weight: 5 to 40 Pounds Reversing Height: 19 to 40 Inch Forward-Facing Weight: 22 to 65 Pounds Forward-Facing Height: 34 to 52 inch Good All-In-One Car Seats Product Name Price Diono 2020 Radian 3R, 3 in 1 Convertible, 10 Years 1 Car Seat, Slim Fit Design, Fits 3 Across, Black Jet \* Diono 2020 Radian 3RX, 3-in-1 Cabriolet, Toddler Insert, 10 Years 1 Car Seat, Fits 3 Across, Slim Fit Design, Black Jet \* Diono 2020 Radian 3RXT, 4-in-1 Cabriolet, Extended Rear, 10 Years 1 Car Seat, Fits 3 Across, Slim Fit Design, Gray Slate \* Evenflo EveryStage DLX All-in-One Car Seat, Recumbent Seat, Infant Cabrio & Booster Seat, Grows with Child Up to 120 pounds , Angled for Comfort & Safety , 3-times-Tighter Installation, Reef Blue \* Evenflo Symphony Elite All-In-One Cabrio Car Seat, Paramount \* Graco 4Ever DLX 4-in-1 Car Seat, Kendrick \* Graco 4Ever Extend2Fit 4 in 1 Car Seat | Ride Back Longer with Extend2Fit, Carnations \*Graco SlimFit 3 in 1 Cabrio Car Seat | Infant to Toddler car seat, saves space in your back seat, Darcie \* Safety 1st Grow and Go 3-in-1 car seat, Harvest Moon \* (\* = affiliate link / Image source: Amazon partner program) Will it fit in my car? Width 18.5 inches height 20.5 inches depth/length 27.34 inches The above dimensions are installed for when the seat is stored backwards with the lying foot. Forward, the height is reduced to 25 inches, while the depth is reduced to 20.25 inches. Good two-way car seats installation Do I need to use a pool noodle/rolled towel? Yes easy to mount backwards with LATCH no easy-to-install back with seat belt not easy to install forward with seat belt? Yes Easy to uninstall? Yes When mounting the seat backwards, you would have to pay close attention to the horizontal line on the side of the seat. You need to align it to the ground to have a proper rear-facing couch. To level the horizontal line in the seat on the floor, you would sometimes have to use rolled-up towels or pool noodles. Watch this video to learn how to install the seat backwards with LATCH. How To Install The Eddie Bauer XRS 65 Rear-Facing With LATCH How To Install Eddie Bauer XRS 65 Rear-Facing With Seat Belt Some parents find it frustrating to get the right rear-facing installation as their installation moves more than an inch, side to side or from front to back. Note, however, that the only place you need to check for proper installation is on the belt path with one hand. Mounting the car seat forward and with the seat belt is considered easier to do. There is To use harnesses – under the child's legs for rear-facing mounting and for the forward-facing, the seat belt should be behind the child's back. How to safely install the seat and with the seat belt, thread the belt in the right way and buckle the seat. Next, tighten the shoulder strap and slide the car seat toward the back of the vehicle. After that, you must put the seat belt into a locking mode. If your vehicle's seat belt does not come with a locking mode, you must use a locking clip. Once you're done, check if the belt path is moving. It should not move an inch side to side and from front to back. Security country of origin: USA steel frame: No five-point harness? Yes side impact tested: Yes approved for flight use: Yes easy to buckle and loosen? Yes, if you buckle your child to the car seat, make sure you snap the chest clip to make sure it doesn't loosen or unlock itself. Look at the colors The seat is the material breathable? Yes Seat Weight: 13.6 pounds machine washable cover? No room? Yes No-Rethread Harness? No Comes With a Baby Body Support? Yes easy to remove cover? Yes expire 6 years comes with a Cup Holder? Yes shoulder strap has pads? No Beingurte has pads? No The seat seems to be very well padded and comfortable. It's easy enough to carry around with you when you need to travel with him. Note that the seat cover should be hand washed and air-dried. The plastic parts of the seat can be wiped cleanly and the straps can be cleaned if necessary. Parents who are annoyed by the lack of seat belt cushions on the seat belt can contact the manufacturer for the approved seat belt covers. For the safety of the small passenger, do not attach third-party accessories to the car seat belt anyway. Check out the latest price conclusion doing a seatbelt installation seems to be the ideal way to install it easily. Most of the time, the reserve is backsecured with pool noodles or rolled towels. If the line on the side of the seat is already leveled on the ground, then you have the right angle – but what if a newborn has to lie flatter? Facing forward, a toddler also has no back prince for comfort function as the seat sits straight up. It seems that the comfort of the passenger comes only from the good upholstery around the seat. For the price point, it looks like it's okay to use it as a replacement seat for an older child installed in a car that your child will rarely drive on. I suggest that you look at the feedback from other parents who have received this seat to help you further review your decision. Read the Eddie Bauer XRS Convertible Car Seat Reviews What Do You Think? I would like to know your thoughts in the comments section below! Cheers! Check the reviews of Similar Car Seats Cosco Mighty Fit 65 DX | Safety 1st Guide 65 While the Britax Boulevard Clicktight and the Chicco Nextfit Zip are both safe options, practical parents will take advantage of Chicco Nextfit Zip across the Boulevard Clicktight, although it is more affordable. For more information, I know that many large sites highly recommend the Graco Extend2Fit seat. His extended reversing ability is known to his parents. The Evenflo Symphony DLX/ELite seems to be an underdog. However, between the Graco Extend2fit and the Evenflo Symphony DLX/Elite, I would honestly opt for the latter. Here's why. Wearing a car seat with an infant in it can be difficult as your child grows. Is the Graco Snuggler Elite Stroller an ideal help? Let me see. See.
