The Safariland 7355 7TS ALS fast-release tactical belt features an automatic locking system (ALS). If the weapon is in a holster, it locks in place. When ALS is de-activated by the thumb, a simple straight drawing is used. This tactical holster is made up of the innovative SafariSeven material, a unique nylon blend from DuPont. SafariSeven is extremely durable and practically impervious to the elements. The 7385 holster includes a quick release attachment that easily removes the holster from the belt. Features: ALS (Automatic Locking System) protects the weapon after it is in the holster; simple straight drawing after release is disabled Open-top design without SLS for quick gun extraction Constructed by SafariSeven, patented nylon blend, which is completely unabraded to the coating of a firearm Developed surfaces of the holster to create airspace around the weapon, allowing quick clearing of any contact with the firearm Very high hearing and low cold tolerances structural sound from 300F to -50F Can be immersed in water indefinitely and maintain still shape and function dual foot strap with a veil with mounting holes for additional accessories Permatanes designed to reduce reflection and can be supported with a simple washing pad Leas in SafariSeven finishes Safariland 7355 7TS ALS Drop-Foot Tactical Holster with quick release leg strap WARNING: This product may contain chemicals known to the state of California to cause cancer and birth defects or other reproductive damage. There are many options for mounting accessories on the holster with additional ELS, QLS and MLS systems for quick attachment. Patented & StealthGearUSA® Drop-Leg 2.0 is an innovative and lightweight solution for carrying a firearm in the Drop-Foot position throughout the day. Designed to carry a firearm on the outside of the thigh in a fully adjustable KYDEX wrapper® wrapper, the StealthGearUSA Drop-Leg holster shell is attached to the thigh via a vertically adjustable thigh strap that connects to a heavy nylon belt loop and Duraflex clutch clasp. The model 2.0 features a new KYDEX® plate, which is compatible with five different fastening systems. 2.0 plate is compatible with generations of StealthGearUSA Drop-Leg holsters. The plates can be purchased separately here. It is also equipped with mounting holes for ELS gadgets on both sides of the holster. Additional Safariland ELS attachments can be purchased here. StealthGearUSA Drop Leg 2.0 foot is standard equipped with Safariland ELS fasteners and is compatible with the following adjustment systems: The Quick Lock Equipment System (ELS) 2.0 is compatible with our SG-X Modular Holster System of adaptive, fully polymer, non-collapsing non-collapsing outside belt holsters. This system allows users to quickly and easily move a body from the drop leg platform to a chest case, belt attachment or MOLLE platform. Safariland gadgets are standard® ELS. The ELS system is attached to kydex® a plate that is also vertically adjustable and features a ventcore® pad that is placed on the thigh. Woven polyester elastic legs fasten the Drop-Leg Holster stealthgear on the leg using adjustable side releasing buckles. 2.0 is designed with input from law enforcement experts and military personnel. Please note: SG-X modular covers that attach to the ORIGINAL drop leg platform are only compatible with SAFARILAND ELS or QLS attachment systems. All SG-X SG-X holster holsters ordered after (03/13/2020) will have hole templates compatible with all five plugin configurations listed above. The waiting time is fluid and varies between 2-6 weeks depending on the sales volume. You'll receive email notifications as your order moves through the production process to and including when it's delivered. Please do not send an email to update the status of your order. This slows down our customer service team and does not change the delivery speed of your order. All holsters and mages are custom-made and not loaded. We value your patience as we manually craft your custom holster. Buy your new Safariland model 6354RDS ALS Drop Foot Holster, Sig Sauer P320 9 mm /.40 Compact w/ITI M3/Streamlight TLR1/SF X300/X300U, right hand, Cordura, dual band, multi camera, 6354RDS-7502-701 from OpticsPlanet today and you'll appreciate the easy ordering process, fantastic customer service, free shipping policy and information to easily track your order. The 6354RDS holster is specifically designed for firearms with red dots mounted on them. This model features an automatic locking system (ALS), an internal locking device that holds the weapon in all directions, providing secure hold in an open upper holster for tactical use. With als, once the weapon is in a holster, it locks in place, providing an additional measure of weapon security. Moreover, the holster is fully working with the thumb, which makes it very instinctive to use. Finally, once the device is deactivated, it can be used simply to Equality. Key for comfort and stability are the weight double foot strap and foot cover. SafariSuede's lining helps to protect the sights of the weapon and finish.
