Still stacking against new ones. Shining like hell. A bit of a weighty 1.2kg but is so worth it given to throw light. The only problem is that you can put the torch in lock mode and it still can be turned on if you don't place it securely if the switch is going to get pressed. I locked it in the back seat of my car and found it turned when I smelled plastic burning. I replaced the valve next to the leather and also now save the torch when not in use, with the side turn the battery so the contacts do not match. Looks like it solved the problem. I also love Imalement thanks to its small OLED displays, just adds premium types of quality. Not that you need them, but they're nice. Battery levels are good, though, as a guide to how much battery is left considering the brightness of the device you have in it. The battery also having to be charged with a 24volt power adapter, which makes it more of a home toy or caravan product more than camping with a torch. While there are other brighter torches in the range now, this one is still a goodie because it is still very bright and size and weight can be a happy medium and compromise. It's true the end of the dark review of Charles on 24/09/2018 Let me start wow if they ever need a replacement light for a footy game then it's possible to handle this lot of light this small unit puts the most powered outdoor lights in shame to love this Quite a handful of reviews of Steve on 13/09/2018 If your after enough light to cover the oval footy, This 32 000 lumens flooded the beam is for you. It seems to be a very well done informative and easy to use interface that tells you the voltage and lumens output. It's a big torch that is well balanced and feels good in hand if you have big hands, but can be a problem if you don't, especially finding a switch in the dark or accidentally turning it while handling it. Time will tell if electronics are reliable, although I have no reason to believe they are not. Be
