Today I'm going to share with you which George Washington gold coin dollars cost a lot of money. And which ones you can safely spend at any price! The 2007 Presidential Dollar Coin Facts George Washington Dollar was the first coin issued as part of the long-running Presidential \$1 Coin program - which began in 2007 and ran for several consecutive years through 2016. In honor of each of the nation's deceased presidents in the manner that they served in the White House, Presidential Dollars saw 39 different designs over 10 years. NOTES: The U.S. Mint may resume the series on a sporadic basis in the future - honoring former presidents after they went further, after the series originally ended in 2016. Since these dollar coins pay homage to the presidents of the United States in the order that each of them was commander-in-chief, George Washington was the first to be immortalized in the series. George Washington Dollar Coin Mistakes and Variety Philadelphia and Denver Mint hit a total of 340,360,000 examples of 2007 Washington dollar for circulation - 176,680,000 in Philly and 163,680,000 in Denver. These parts are thus quite common. There are also S mintmarked proof versions sold to coin collectors in proof sets. They are also numerous and quite common - with a coinage of 3,965,989. However, a few interesting varieties made a turn for George Washington dollars... 2007 The Unless God of Dollars Missing Edge Letter Nation motto IN GOD WE TRUST stamped on the edge of the Washington dollar along with the date, mintmark, and the inscription E PLURIBUS UNUM. A small but significant number of 2007 Washington dollars were struck without getting their edge stamped. This may have happened because the edge of the inscriptions were applied to these coins at the stage after the obverse and the reverse had already hit. George Washington gold dollar coins without THE GOD WE TRAST are technically known as Plain Edge dollars. But coin collectors quickly dubbed them the more colorful name Free Dollars. They have become very popular and collectible coin bugs! Values for this coin once hovered as high as \$600, but as the number of samples rose and demand declined slightly, prices eventually fell. Now, George Washington's Free Dollar Error coin in typical unprocessed conditions costs closer to \$50. Beware, as there are many fakes. The U.S. Mint attempted to avoid such a blatant mistake. However, a similar error error 2007 John quincy Adams dollar struck in the same year. The problem has been avoided altogether since 2009 - when the motto in GOD WE TRAST was moved to the obverse of the coin. The Washington Position Dollars edge inscription was struck by Washington dollars oriented either upside down and right-hand up, toward the direction of the letter facing the portrait of the president on the coin. To discern which one, collectors describe the edges of the inscription face-to-bottom (the opposite direction of the president's portrait when he faces up) as a dollar position. Washington's position B Dollars Washington dollars with the edge of the inscription facing the right side to the portrait of the president are defined as Position B. Neither Position A nor Position B are necessarily meager. But many collectors like to classify dollar coins by the relative position of the edge of the inscription - and some try to assemble both varieties for each design. Read: Rare coins against meager coins, how much does a George Washington coin cost? Here's a list of the most valuable 2007 Washington dollar coins: As mentioned earlier, George Washington's Godless God dollars on average a raw fortune costs about \$50. But the pieces in the highest state cost hundreds, even thousands of dollars. For example, George Washington's Fund Dollars Graded Mint State-68 cost \$2,000 or more! 2007-D George Washington Dollar Position is pretty meager in the upper rough classes. Examples of the State Mint-67 classification cost more than \$300. 2007-S proof George Washington dollar coin is a great collectible - but this is significantly common. You can buy one for \$3 to \$5. Regular business strikes from Philadelphia and the Denver Mint cost \$1.50 to \$2 in the average mint state classes. Worn examples (the type you find in your pocket change) is worth the first cost. I am a coin editor here at TheFunTimesGuide. My love of coins began when I was 11 years old. I primarily collect and study American coins produced during the 20th century. I am a member of the American Numismatic Association (ANA) and the Numismatic Literary Guild (NLG) and have won several awards from the NLG for my work as a coin journalist. I am also the editor of CDN Publishing (a trusted source for U.S. rare coins), editor of the Florida United Numismatists Club (FUN Topics Magazine), and author of Images of America: United States Mint in Philadelphia (a book that explores the colorful history of the Philadelphia Mint). I have contributed hundreds of articles for various coin editions including COINage, Numismatist, Numismatic News, Coin Dealer Newsletter, Coin Values, and CoinWeek. I'm also the author of almost 1,000 articles here in the Fun Times Guide to Coins (many of them with over 50K stocks) and I welcome your coin questions in Below! 2007 2007 George Washington Presidential Dollar Cost is \$1 distributed coin. Raw Raw Value: \$1.25 to \$2 Graded - Certified Cost: MS 66 \$5 Coin should be valued by MS66 pCGS or NGC and values sometimes depend on the edge of the label's orientation. In 2009, the U.S. Mint moved the date, motto and mint sign to the edge. So look for the missing edges of the inscription, the weak edge of the inscription and the partial letters of the edge. You have a position A and a B position on the orientation of the edge of the inscription as well, but this rarely adds any value, except for certain edge errors in the inscription. Presidential dollars are called golden dollars, but they are not made of gold; their alloy is 75% copper and the remaining nickel balance. More Presidential Dollar Values Designer: Obv: Glenn Goodacre. Rev.: Thomas D. Rogers Senior Diameter: 26.5 millimeter Metal content: .770 copper, .120 zinc, .070 manganese, 0.040 nickel Mintmark: P (Philadelphia), D (Denver), S (San Francisco) center below date series: (No) PCGS MS66 View more images PCGS MS66 PCGS MS66 Designer: Joseph Menna / Don Everhart Diameter: 26.5 0 millimeters metal: 88.5% copper, 6% zinc, 3.5% manganese and 2% Nickel Jaime Hernandez: The 2007-D Washington dollar is the first presidential dollar coin issued by the Denver Mint, in the presidential dollar program. The coin was officially released into circulation on February 15, 2007. Any coins submitted by PCGS prior to February 15, 2007, were given a special designation of the First Day of Issue on the Holder, also known as FDI. Location of the item: Flower Mound, Texas, United States Shipping to: United States Exceptions: Angola, Cameroon, Cayman Islands, French Polynesia, Libya, Mongolia, Suriname, Guyana, Panama, Mauritius, Brunei Darussalam, Chad, Madagascar, New Caledonia, Bahamas, Bermuda, Iran, St. Kitts, Sudan, Guadeloupe, Venezuela, Somalia, Burma, Cuba, Republic of Reunion, Yemen, Barbados, Belize, Liberia, Sierra Leone, Central African Republic, Martinique, Dominica, Niger, French Guiana, Saint-Pierre and Michelon, Saudi Arabia eBayGeorge Washington Dollar Rose Newell This set of plates Here is a story associated with the son of the other error dollar madness that was swamping his home state of Florida. While some people in Florida end up finding thousands of simple edge dollars, Doubt Thomas doesn't think any of this luck will ever come his way. His son encouraged him to buy a couple of rolls of coins, just to see, but Thomas was adamant. None of this tomfoolery for him! Finally, Bill decided to just go ahead and buy the rolls anyway. He took them to his father's house and him in making a couple of them just to heck it out. If there were no mistakes, he could just spend it. His mother, Rose, who was a little more substrate to the project, chose a pair of rolls from a dozen or so that Bill brought, and Doubt Tom reluctantly chose a couple of rolls for himself. And then set them aside and forget about them. Rose opened her rolls, but found nothing. Realizing that Tom hardly bothered to open his own without much push, she encouraged him to do so, which he did, and he quickly scanned them to prove that there were no easy dollars to be found, and what a waste of time it all was. But then he noticed that one of the coins looked a little funny on the edge, so he asked Rose to take some photos and send them to Bill. Bill's wife, Cher, sent the photos along with the question if this coin was rare or worth anything. They sent a coin to mistake coin scientist Tom DeLorey so he could see the coin and then send it for classification. NGC evaluated this sample of MS-64 and the Newell family decided to duplicate its Doubt Thomas Double-Edge Lettering sample.
