Greenpan valencia pro 8 inch

Home > Pot > Pot Sets > GreenPan Valencia Pro 8- and 10-inch Fry Pan Set > Description GreenPan Valencia Pro Fry Pans are also suitable for a variety of cooking tasks. The flat bottom and low profile make it easy to throw away and turn food when roasting in a burner, browning and pan. This set includes an 8-inch and 10-inch pan from the GreenPan Valencia Pro. The GreenPan pot has a non-stick ceramic coating called Thermolon, reinforced with diamonds for greater performance, durability and flexibility. Thermolon is derived from sand and does not contain PFAS, PFOA, lead and cadmium. By transmitting the heat well, your ceiling reaches the desired temperature earlier and at a lower temperature setting. The cooking surface is reinforced for maximum strength and scratch resistance. Non-stick ceramic coating allows you to cook with less butter or oil and without sticking, and does not release harmful fumes if overhezed. The GreenPan Valencia Pro collection is made of hard anodized aluminum with Magneto technology with copper-reinforced ferromagnetic particles for induction cooking. The inner cooking surface is covered with Thermolon Minerals and is safe for use with metal tools. The arms are made of stainless steel and are connected with safe rive. The oven is safe for pot 600F. In the dishwasher it is recommended to check the case, hand washing. What's in the box: GreenPan Valencia Pro 8-inch and 10-inch frying pan Magneto technology PFAS made of hard anodized aluminum with Nonstick ceramic coating, PFOA, lead and cadmium Safe rive stainless steel handles for use with safe metal utensils Pot oven safe 600F Induction compatible Dishwasher safe, hand washing recommended Comments Details Event Number first : Error_Unknown, Product Thermolon Minerals ceramic non-stick PFAS and PFOA-free Magneto technology for scratch-resistant construction and easy pouring with maximum strength durable hard anodized aluminum, providing excellent results and using less oil Working base with drop free edges wheels; The safe and comfortable clutch ceramic, electrical, gas and furnace case is manufactured in China with a lifetime warranty limited to the safety of ceramics, electricity, gas and furnaces in a secure riveted ergonomically cool stainless steel handle ceramic, electrical, gas and furnace safe; Thermolon Minerals ceramic non-stick PFAS and PFOA recommended hand washing although free dishwasher safe, providing excellent results and maximum strength durable hard anodized aluminum scratch resistant construction and easy pouring magneto technology for easy pouring working base with free edges wheels; The safe and comfortable clutch ceramic, electrical, gas and furnace case is manufactured in China with a lifetime warranty limited to the safety of ceramics, electricity, gas and furnaces in a secure riveted ergonomically cool stainless steel handle ceramic, electrical, gas and furnace safe; Dishwasher safe despite washing advice
