DIY Statement Ceiling Give your home a bold look this year! How Wallpaper is not just a cutting and pasting job. Why choose Wallpaper? With so many decoration options, why choose wallpaper? Wallpaper is a great imitator. Updated: 08/02/2019 by Computer Hope Also called desktop background, a wallpaper is an image that is displayed behind the graphical user interface when the user's desktop is visible. This is the image, color, or pattern that you see on the main operating system screen after the computer has booted. In the image, you can see an example of a Microsoft Windows XP desktop with a wallpaper representing the white clouds in a blue sky on a green hill. Confusion between screen saver and wallpaper Many new computer users confuse a wallpaper with a screen saver, which is the moving image or animation that is displayed when you are away from your computer. See our screen saver page for more information and related links on this term. Related Pages Background, Desktop, GUI, Live Wallpaper, Operating System Terms, Windows Theme If you work or play for hours on your PC, having a wallpaper that is interesting to watch can be one of the best ways to bring your system view to life. Nobody likes to look at a blue screen or a Windows logo for hours, so let's make things a little more interesting, okay? We've perverted the almost endless options of beautiful images and animated backgrounds to find the best wallpapers out there. But we've not only chosen the pretty ones. We've specifically looked for images that are a good backdrop.
