Easter can also be activated for 24 hours by purchasing a Bunny biscuit. The upgrade is repeatable, but with each purchase it is more expensive, similar to buildings. Upgrades that are from the Easter season. All upgrades are egg/larvae based on the theme and can be unlocked randomly when clicking on a Golden Cookie, Wrath Cookie, or cracking wrinkles. The price for buying each egg rises based on the number of eggs purchased so far (E in the table below). Icon Name Unlock Condition Basic Price Description Chicken Eggs Common Eggs (see Probabilities). 999 x 2E cookie production multiplier +1%. The cost of weighing with how many eggs you own. Eggs. The egg came first. Get over it. 210 Duck Egg Cookie Production Multiplier +1%. The cost of weighing with how many eggs you own. Then he broke away. 211 Turkey Egg Cookie Production Multiplier +1%. The cost of weighing with how many eggs you own. These will hatch into strange, hand-shaped creatures. 212 Multiplier of quail egg production +1%. The cost of weighing with how many eggs you own. These eggs are positively small. I mean, look at them. How did it happen? Whose idea was that? 213 Robin cookie multiplier +1%. The cost of weighing with how many eggs you own. Embryos with a robbed holy azure cloak! 214 Ostrich Eggs Cookie Production Multiplier +1%. The cost of weighing with how many eggs you own. One of the biggest eggs in the world. More like a sharp one, isn't it? Guys? 215 Cassowary Egg Cookie Production Multiplier +1%. The cost of weighing with how many eggs you own. Cassowary is taller than you, has murderous claws, and can easily outrun you. You'd do well to be wary of them. 216 Salmon Sparks Cookie Production Multiplier +1%. The cost of weighing with how many eggs you own. Do the impossible, you see the invisible. Deer, fight power? 217 Frog rye cookie +1%. The cost of weighing with how many eggs you own. I wanted to do a pun on how these toadally look like eyeballs, but froget it. 218 Multiplier of shark egg biscuits +1%. The cost of weighing with how many eggs you own. HELLO, IS THAT FOOD? LET ME TELL YOU ABOUT FOOD. Why Am I Still Eating My Friends219 Turtle Egg Cookie Production Multiplier +1%. The cost of weighing with how many eggs you own. Turtles, right? Hatching from seashashes. They grow into shells. What's with it? And now my parody of the food from the plane. 220 Ant larva Cookie production multiplier +1%. The cost of weighing with how many eggs you own. It's a treat in some countries, I swear. You let them attack your digestive tract, and you will be very happy about it. And everything will be 221 Golden goose eggs Rare eggs (see Probabilities). 999 x 3E Golden cookies appear 5% more frequently. The cost of weighing with how many eggs you own. The only resounding tragic story involving misguided investments. 222 Faberge eggs All buildings and upgrades are 1% cheaper. [Note 1] The cost of weighing with how many eggs you own. This outrageous egg is definitely fabulous. 223 Wrinkle wrinkles wrinkle explode into 5% more cookies. The cost of weighing with how many eggs you own. Look at that little guy! He's going to be a big boy someday! Yes, it is! 224 Cookie Egg Click is 10% stronger The cost of weighing with how many eggs you own. Looks like it's chipped. I wonder what's inside this! 225 Omelette Other eggs appear 10% more often. The cost of weighing with how many eggs you own. Fromage is not included. 226 Chocolate egg contains a lot of biscuits. The cost of weighing with how many eggs you own. Laid elusive cocoa bird. There's a surprise inside! 227 Century Eggs Constantly get more CpS the longer you played in the current session. The cost of weighing with how many eggs you own. Not a hundred years, actually. This isn't a day above 86! 228 eggs[note 2] +9 CpShej, it's egg 229 ↑ Upgrades that reduce upgrade costs, fold multiple times, not additively. That is, if you have 3 of them that reduce the cost of the upgrade is (original price) \* 0.95 \* 0.98 \* 0.99. ↑ The egg is the only upgrade in the game that gives a flat CpS increase (only an upgrade that does not increase cps by a percentage.) Egg unlocking eggs are unlocked randomly during the Easter season either by cracking Wrinkles or by clicking Golden/Wrath Cookies. The basic failure rate to unlock eggs from the Golden/Wrath Cookie is 90% (0.9), while the base failure rate for wrinkles is 98% (0.98). There are many modifiers that can reduce the rate of failure. Modifier Factor Green Yeast Digestives 1/1.03=0.970874 Santa's Bottomless Bag 1/1.1=0.909091 Hide & Company Seek champion 0.7 Omelette 0.9 Starspawn 0.9 Selebrak, Spirit of Festivities 0.9/0.95/0.97 (Diamond/Ruby/Jade) Mind Over Matter, Reality Bending, both 1/((1.25, 1.025, 1.275)=0.8, 0.98, 0.78 Cosmic Beginner's Luck 0.2 Garden plants (ripe, dirt) 1/(1+0.01G+0.01S+0.03K)G = # green rot s=#ShimmerlilyK=#from Keenmoss For example, if you click on a golden cookie and you have an omelette, Starspawn, Santa's heartless bag and mind over matter, the failure rate is you can also easily cheat while farming egg drops (and other rare return drops). If you pop wrinkles and reload the page without saving, the wrinkle returns. Therefore, you can save the game, pop wrinkles, and if you drop nothing, reload the page. Then simply repeat until something is released. Eggs Unlock Probabilities When an egg is generated, there is a 10% chance that it will be a rare egg, otherwise it is an ordinary egg. If the generated egg is unlocked, then a second egg is formed. This reduces, but does not aaufik, the effect the number of eggs already unlocked has on your chances of finding new eggs. Having more eggs quadraticly. The probability of developing a new egg, an ordinary egg, any rare egg or a specific rare egg (e.g. an omelette) can be calculated using the following formulae, where n is the number of normal eggs, which has already been unlocked, and r is the number of rare eggs that have already been unlocked? Pr (new egg) Number of rare eggs already unlocked 0 1 2 3 4 4 5 6 7 8 Number of normal eggs already unlocked 0 1. 0.999844 0.999375 0.998594 0.997 5 0.996094 0.994375 0.992344 0.99 1 0.994375 $0.91\ Time If we unlock Easter eggs only with the help of golden cookies needed to unlock all Easter eggs can be calculated. The calculation includes the effects of unlocking omelette eggs (whenever they are born naturally). Therefore, please ignore the omelet factor when calculating the failure rate in this section. The resulting curve is very similar to the log-normal distribution. For each failure rate, we can customize the log-normal distribution probability curve to find the μ and σ. Then we can use the formula on Wikipedia to get the probability we want. For example, if you fail 0.9, if you clicked or popped 753 objects, then there is a 50% chance to collect all easter eggs. Number of objects needed to unlock all Easter eggs failure rate 50% 75% 95% 98% Log-normal distribution µ of 0.98 2351 3524 6 310 8066 7.7625 0.6003 0.97 1755 2515 4218 5245 7.4 704 0.05330 0.96 1437 2005 3241 3967 7.2700 0.4946 0 .95 1231 1231 1231 1691 2670 3236 7.1157 0.4706 0.94 1474 2291 2759 2759 0.4546 0.93 973 1313 2019 2420 6.8808 0.4435 0.92 885 1188 1812 2166 6.7858 0.4356 0.91 813 1087 1649 1966 6.7009 0.4298 0.9 753 1003 1516 1804 6.6240 0.4254 0.875 637 845 1269 1506 6.4575 0.4185 0.85 554 733 1096 1299 6.3176 0.4128 0.8 441 582 868 1027 6.0895 0.4116 0.75 367 485 722 854 5.9062 0.4108 0.7 315 416 619 732 5.7526 0.4106 0.6 246 324 483 571 5.5034 0.4110 0.5 201 266 396 469 5.3050 0.4113 0.3 148 196 291 345 4.9982 0.4112 Cookie Production global multiplier that many of the eggs modify is essentially another form of cookie multiplier. The ultimate cps formula is basically: CpS\* Cookie Multiplier (Cookie Types, Heavenly Chips, Madness/Older Madness Bonus/Clot Penalties, etc.) \* Global Multiplier For example, if you have some types of cookie and kitten bonuses totaling 1000% cookie multiplier, and a basic CpS of 10,000, giving you a total income of 100,000 cookies per second, and you bought two common eggs, your new total CpS would be 102,010 (10,000\*10\*1,012). If you then unlocked another kitten upgrade that increases your basic cookie multiplier to 1,500%, your income would increase to 153,015 (10,000\*15\*1,012) Achievements Description of the name of the Hunting icon's name on Unlock 1 Egg. 166 Egging to Unlock 7 Eggs. 167 Mass Easteria Unlock 14 eggs. Owning this success makes eggs drop more often in future playthroughs. 169 Note: Eggs must only be found for the results to be obtained, they do not need to be purchased. While it may not weight, since most eggs end up being purchased, it is useful to know that you can get success in storing a chocolate egg for later to get a larger sum of cookies from its one-time effect. Gallery Appearance of golden and angry biscuits during the Easter season. This season is one of two seasons when my own grandmother's form, bunny grandmother. The second is the Christmas season. Trivia Upgrade Description Duck Egg is a link to the popular YouTube video, Duck Song. Omelette's taste text is a reference to the omelette du fromage episode of Dexter Lab. Salmon herd taste lyrics is a reference to the song in tengen toppa's anime Gurren Lagann. Century eggs is an ingredient in Chinese cuisine, while taste text is a reference to the novel Discworld Interesting Times. Shark egg description is from the thoughts of sharks in one of orteil's other games, Nested. This is perhaps also a reference to sharks from the Pixar movie Finding Nemo. Bunny's grandmother bears a striking resemblance to Frank, the character from the 2001 film 'Donnie Darko'. Robin's egg flavor text is a reference to robin's catchphrase from the 1960s Batman TV series. Golden Goose Egg's taste text is a link to Jack and As well as the related idiom: killing the goose that laid the golden eggs. Bunny biscuit text is a reference to one of the rabbit myths said in Watership Down. The egg bears a strong resemblance to yoshi eggs from Super Mario World and normal Pokémon eggs from the Pokémon game series. It may also be a reference to a pokemon egg defect. This pattern is also similar to the default spawn egg from Minecraft. Orteil said the taste of the text for the egg is neither a pun nor a reference. However, in French, the egg is pronounced un œuf, which sounds exactly like neuf = 9. Mass Easteria is probably a reference to mass hysteria, also called mass psychogenic diseases. Golden/Wrath cookie strings can still unlock eggs. Community content is available within CC-BY-SA, unless otherwise stated. Noted.
