Press and hold one of the following hotkeys to display ranges without having an equipped item: RAlt Range Highlights JJunimo huts HBees Houses SSprinklers WScarecrows Hotkeys and highlight colors are configurable: When SMAPI runs the mod for the first time, it will create a config.json file in the mod directory. Edit the file to change the hotkeys or highlight colors. Support works with Stardew Valley 1.4 on Linux/Mac/Windows. Works in single player and multiplayer. There are no known incompatibilities, but if you have another mod that also shows ranges (such as UI Info Suite) then each mod will apply its own highlight. The result is not horrible, but you probably want to turn off range highlighting in the other mod if possible. (You can do this from the game menu in UI Info Suite.)
