All rights reserved. © 2002 RadioShack Corporation.RadioShack and RadioShack.com are trademarks used by Read before using this equipment. Caller ID is a service provided by your tele-phone company. When you subscribe to this service, between the first and second rings, the telephone company sends the caller's phone number (and name, if available) and the date and time of the call. The Caller ID box receives and provides this information for each call and updates the view with the current date and time. Your caller ID box stores up to 64 caller ID records, and then replaces the oldest caller ID record with each new one.1. While holding down the button at the bottom of the attached mounting bracket, lift the bracket to remove it.2. Use a flat-blade screwdriver to lift the tab on the door of the battery compartment at the bottom of the Caller ID box.3. Place four fresh AA batteries (not included) in the compartment, as indicated by the polarity symbols 4. Replace the battery lid and click it When it appears or the display dims, to power the system, close the included Class 2 AC adapter barrel plug in DC 6V 200 mA on the back of the Caller ID box. Then connect the other side of the adapter to a standard AC Your Caller ID box is ETL listed according to UL standards and meets all applicable FCC Your Caller ID box connects directly to a modular phone line connection. If your phone wiring does not have a modular connection, update the wiring yourself with adapters (available from your local RadioShack store), or have the phone company update the wiring U. You must use compatible modular connections that comply with Part 68 of FCC rules and the requirements set by the ACTA. The included telephone cord and modular plug are part 68-compatible for connecting to the phone company Connecting to a Single-Line 1. Disconnect the phone line cord from the modular phone connection on the wall and connect it to the PHONE JACK on the back of the Caller ID box.2. Connect the caller ID box's pre-wired telephone line cable to the modular • Discard empty batteries immediately and • Don't burn or bury batteries. • Use only fresh batteries of the required size • Do not mix old and new batteries, different types of batteries (standard, alkaline or rechargeable) or rechargeable batteries • If you do not intend to use the Caller ID box for a month or more, remove the batteries. Batteries can leak chemicals that can destroy electronic components. • When replacing batteries, do not press buttons on the caller ID box after you remove the old batteries. If you do this, all stored information can be erased. • When replacing the batteries, you should have fresh information at hand before you start. If you do not install the new batteries within about 2 minutes of removing the old batteries, you will lose all information stored in the • The backlight as the AC • The USOC number for both the single-line and two-line connections to be installed is RJ11C (or RJ11W for a wall plate jack). If your home has specially wired alarm equipment connected to the phone line, make sure that installing the Caller ID box doesn't turn off your alarm devices. If you have any questions about what turns off your alarm equipment, please contact your telephone company or a qualified installer. Advance CID/Call Waiting ID Boxwith Blue Backlight and 10-Number VPIf an icon appears at the end of a paragraph, go to the box on that page with the corresponding icon for relevant information. Thanks for purchasing a RadioShack Advance CID/Call Waiting ID Box. Your caller ID box stores and displays up to 64 caller ID records. It gives the phone number of the caller (and name, if available in your area) and the current date and time, as provided by your local phone company to Caller ID service subscribers. When caller ID is offered, one or more of the following options are generally available. • caller name and numberThe actual number of caller ID registers your caller ID box, depending on the caller ID information sent by the phone To use this 12-000 ID, you must be in an area where the caller ID service is available and you must subscribe to the service.43-3903.fm page 1 Wednesday, January 8, 2003 9:49 Am RadioShack and RadioShack.com are trademarks used by Tandy Corporation.OWNER's manual - Read before you use this equipment. CID-948 Jumbo Caller ID with 50 MemoryYour RadioShack Jumbo Caller ID is the latest phone phone The system displays current date, time and caller information as provided by your local phone company to Caller ID serviceThe system stores and displays up to 50 multiple (name and num-ber) Caller ID records and includes these features: Jumbo Display with Photo Sensor - makes it easy to see caller information and current date and time. The system's photosen sor automatically adjusts the screen brightness based on the am- - let you know how many calls are stored - alerts you when you have an incoming call and the status of a parallel phone in use. — place the system on a desk, shelf, ortable, or mount it on a wall. We have designed your caller ID system to comply with federal regu-lations, and you connect it to most phone lines. However, any device (such as a phone, caller ID, or answering machine) that connects you to the phone line draws power from the telephone line. We refer to this power draw as the ringer equivalent alence number of the device, or REN. The REN is at the bottom of your caller ID.If you use more than one phone or other device on the line, add all RENs. If the total is more than five (three in the countryside), your phones can't ring. If the call control is compromised, move a device off the line again. Your system complies with part 68 of FCC rules. You must provide the FCC registration number and ren to your phone company when you request. Both numbers are located at the bottom of the system. You may not connect your system to:• Most electronic key phone systemsIn the unlikely event that your system causes problems on the telephone line, the phone company may temporarily disconnect your service. If this happens, the phone company will try to notify you in advance. If prior notification is not practical, the phone company alerts you as soon as possible and advises you of your right to file a complaint Also the phone company may make changes to its lines, equipment, operations, or procedures that may affect the operation of this sys-tem. The telephone company will notify you of this change in ad-vance, so that you take the necessary steps to avoid interruptions to your telephone service. This equipment complies with the requirements in part 15 of Part 15 of . These limits provide reason-state protection against radio and TV interference in a residential ar-however, your equipment can cause TV or radio interference even when it works properly. To avoid interference, try one or more of the following corrective measures:• Refocus or move the TV or radio's receiving antenna. • Increase the distance between the equipment and the radio or • Use on various electrical circuits for the equipment and consult your local RadioShack store if the problem continues. Changes or changes to this unit are not expressly ap-proven by the Party Party for compliance, the authority of the user to operate the equipment may be invalid. Connect the barrel plug of the included adapter to the connector at the back of the system to power the system. Connect the other end of deadapter to a standard outlet. After you turn the system on, all indicators for about 3 sec-onds will light up, after which the caller ID returns to standby. You must use a Class 2 power source that delivers 9V DC and delivers at least 300 mA. The middle tip should be set to positive and the plug should fit on the caller jack. The included adapter complies with these specifica-tions. If you're using an adapter that doesn't meet these specifications, it may damage the caller ID or adapter. • Always connect the AC adapter to the caller ID before using it on ALTERNATING Current. When you're done, disconnect the adapter from the AC before disconnecting it from the caller ID. To reduce the risk of fire or shock, do not expose this product to rainELECTric SHOCK, REMOVE COVER OR BACK. NO PARTS TO BE OPERATED BY THE USER INSIDE. REFER MAINTENANCETHis symbol is intended to warn you of the presence of fearless hazardous voltage in the casing of the product which could be of sufficient size to cause a risk of electric shock. Do not open the case of the product. This symbol is intended to inform you that important work and maintenance instructions are included in the literature.
