## Mock amc 10 aops

AMC (American Math Competition) is a series of tests that lead to the selection of the American Math Olympiad competing in the International Math Olympiad. Together with MathCounts, the AMC series of competitions is the premier math competition for middle school students. AMC 8 is for students in grades 8 and under. It will be held in November. Students are allowed to complete the 25-question multiple-choice exam. Middle school students who score well on AMC 8 often take AMC 10 in February. A high score of AMC 10 or 12 qualifies a student to take AIME, which leads to USAMO and eventually MOSP and IMO. More information can be found on the AMC website. A very well thought out mock AMC10 from AoPS uses dnkywin. A very difficult (AMC12 +/AIME level) Mock AMC exam created by AoPS users Caelestor and gfour84. See the discussion posts linked here. Harder version of the exam and key. Hard version of the exam and key. Submit your own mock contest! I've pulled most of the test exams I'd put out. You can buy previous exams from MAA here. \$25 buys you each exam and solution for the last 10 years (buy the High School Math Club Package, one of the last items on the list). I'm just leaving the latest exams. Harold Reiter has graduated for the years he led AMC on his website here. (Scroll down to the AMC section... there are lots of great things related from his site.) (52 pages) Last updated February 6, 2009.Draft Counting unit. Mostly completed now. (42 pages). Updated 26/09/09.Draft probability unit. Mostly complete, however, could use some revisions. New! Updated 26.04.09. Community » Blogs » OK ... Log in/join AoPS • Blog Info A Mock AMC is a competition meant to mimic an actual AMC (American Mathematics Competitions 8, 10 or 12) exam. A number of Mock AMC competitions have been held on Art of Problem Solving bulletin boards. They are usually made by one community member and then administered for some of the other community members to take. Sometimes the administrator can ask others to sign up to write issues for the competition. Mock AMCs are usually very popular in the months leading up to the actual AMC competition. There is no guarantee that members of the community will do Mock AMCs in a given year, but there will probably be one. Feel free to remove mock tests that are not of high quality or to recommend others. Ongoing mock AMCs, as well as other mock contests, can be found in AoPS Mock Mock Forum. Tips for writing a Mock AMC Anyone can write a Mock AMC and manage it. If you're interested in writing one, here are some tips: Look at previous AMC/AHSME tests to get a feel for what kind of problems you should write and what difficulty they should be. Look at familiar theorems and formulas and see if there is any way you can make a good problem out of them. If you run out of creative juice and decide to draw problems from competitions, you can try to use problems from obscure competitions first, if possible. In this way, even the more experienced test takers will hopefully find problems that they do not already know how to do. Pair up with another user on AoPS and write it together. Two minds are much better than one. With only one person, the problems can be biased against one topic, but with two people, the chances of this happening are less. Previously Mock AMCs listed below are [higher quality] Mock AMCs which have hosted over AoPS in the past. Feel free to add, remove or recommend. Note that the level column represents the originally intended difficulty. In other words, if a person makes a mock AMC 12, the level would be 12, although the problems themselves are much easier. Recommended mock tests are star.
