## Medieval house minecraft step by step

This is a step-by-step Minecraft survival house guide. In this guide I will show you one way you can build a house in Minecraft. There are, of course, many other ways, and you do not have to strictly stick to this design. Follow the tutorial and when you get to the end, add your flair. I have provided you with a youtube video and a list of necessary blocks to help you out – enjoy. To start this house, please create a foundation, as shown in the first picture. The foundation consists of dark oak pillars - 4 tall, separated by 3 stone brick blocks, except for the door, which is separated by 4 stone brick blocks. Use spruce boards as a floor. Now the place of stripped birch logs - 2 tall, above the stone bricks. Connect the dark pillars of oak logs with horizontal pillars of dark oak logs. Add a dark oak log overhang around the main structure - as pictured and finish off this step, adding dark oak logs protruding from the structure as shown. Attach the pillars of dark oak logs to the first floor, as shown in the first figure. The creature 4 high dark oak pillars of the staging shown in the second image. Use spruce slabs as a floor. Use purified birch logs to fill the walls. Connect the new dark oak supports with horizontal dark oak beams. Be sure to create a second floor door shown in the picture. Expand the pillars outwards on 1 block, as shownWish flooring dark oak floor beams on the second level of the main house and fill the space between spruce slabs. Add spruce slabs to the floor just below the dark oak logs blocks on top. The floor should be 1 block lower than then above the tower. Add 3 high dark oak pillars to the tower and connected them, as shown in the figurePast dark oak pillars, which 2 blocks long as shown. Attach the cross-beams and fill the floor with spruce plates, as shown in the figure. Line gaps in the tower roof with stone brick stairs, as shownFill all the remaining gaps with stone brick labsMake 1 block high wall using stone bricks all around the top of the tower, then add battlements, as shown. Create a basic roof on the main building, as shown in the figure. Be sure to use a stone brick staircase for finishing the roof. Attach dark oak supports to roof supports, as shownFill walls in rooms under the roof with stripped birch logs. Add stone brick blocks and stone brick slabs to the roof as decorationDetati tower, as shown in the first pictureAfter 4 campfires on top of the tower - they will help you find your house is you will ever get lostUse the picture provided to add information to the main house. Repeat these details all around the house. Add spruce doors to build and detail them, as shown In the figureUse stairs using spruce stairsUse the provided picture to detail the holding area. The house now should start to look good. Create a chimney using stone brick, stone brick stairs, bonfires, and spruce trap doors. Add additional roof details to the main house, as shown in the pictures. This step can be tough, so I recommend watching the attached video for help. Make the necessary changes. Perhaps use another material for the roof. Maybe make the tower taller. Fill the house with a cool interior. Whatever changes you make, please share them with us in the comments sectionhave fun building. Something you may not know about me: I am a Minecraft addict. I usually play the Feed the Beast version with the boy, but we went back to vanilla Minecraft recently to try out because it has loads of new updates! One of my first vanilla projects was to make a pretty medieval-style house – I've always wanted one. This medieval Minecraft house is based at a website I found online a few months ago (and now can't find again link no) – I fell in love right away! When I started building it I realized it was also the perfect size for everything I needed. Years ago, when I first started playing, I'd either use the city as a base or build several structures to house everything, but this house solves all these problems. NOW IT'S ALL IN ONE PLACE AND SEXY AS EVERYONE GET OUT. I have another version of this medieval home survival world boy and I have been playing – it was perhaps a day to build survival. I actually recommend doing one creative – it was only two hours that way! :D This medieval Minecraft house includes:full cellar, including stoves, lots of chest storage, craft table and anvil space, and access to the mining shaft.main floor with lots of chest rooms + craft table spacesekurs with fully functioning enchantment table + room and potions beer areatop floor with room armor stands and beds, as well as walk from balcony sniping enemies in the morningthought stable supplement to keep your fancy horses in the vicinity of texture packs shown in this tutorial is Chroma Hills RPG (building time) and Triton Core V2. (ready-made photos) Both are 64x and AWESOME. If you have an older computer that is hard with 64x, I highly recommend Dokucraft – it comes in a lot of flavors and it's gorgeous even 16x and 32x. Have you ever been to a real medieval house? Well now there are your changes to take a look... Component Drawings Well, well... another Spruce house has been taken here. This time it's quite interesting - I ... Details Drawings, if you like medieval houses, then I'm absolutely sure you like this one here as well. So i...
