Unlike most gacha games that re-export powerful characters or weapons, players actually roll out skill cards for Naruto x Boruto Ninja Voltage. How to roll? Like most Gacha games, the default way to roll is to delete and reinstall the application. Once you are down to the tutorial, you can collect free gems in your mailbox and do 10+ 1 rolls. As for Android players, there is another way to quickly roll out rooting devices and accounts. You can find out how in the Reddit chat here. Roll for whom? Currently, all 5* skill cards are almost identical in the rankings because each has its own strengths and weaknesses. However, the consensus is to aim naruto or Sasuke's skill cards first and the two characters will be available right from the start of the game. The other 4 characters will have a fast cast I think I want to protect the twin lion fists with soft steps · Ultimate Juts · Giant Damage Card Rare Skill Strength Quiet Cizune 2 Star Medical Ninjuts: Perciers Flash · Ninjutsu · Heal everyone for ~1100 HP in Level 1 Of Carji! 3-star · Ninjutsu · Level 1 (slightly faster CD) heals everyone for ~500 in character rankings - depending on release build 1 - Cherry can be a very high damage 2-Naruto high attack unit with low CP cost per healer and very high damage enemies, most enemies with lassengan There's a skill that can quickly get out of the enemies surrounding 3th place - Sasuke High Strike units can paralyze most enemies by one shot with chidori long-range Ninjusu. Last week (November 15), Banda Namko released Naruto x Boruto: Voltage in Japan. The game features characters from Boruto: Naruto next generation and Naruto to play. Gameplay includes actions and strategies. Players must build their own fortress and attack rival fortresses with the colorful movements shown in the animation. Online cooperatives are also available. Gameplay Summary Ninja Voltage's gameplay is divided into two main categories: PvP and PvE. █ Iconic Moment PvE is a typical mobile action game where players can use iconic characters from the series and relive key moments in the story. █ Mission PvP combines action elements with strategic twists. Players build and customize their fortresses to defend against the aggression of other players. Players can also break into other players' strongholds to earn resources. PvP will reward players with PvP currency that can be used to buy shards █ aside from resource management fortresses, players will also have to manage their resources. Chakras, on the other hand, are used to upgrade money generators and are used to upgrade skills. █ Shad-based character system, unlike most games, characters are not distinguished by rarity. All characters can be ★ 1.0% and all characters can ★ to 6.0%. Some characters can be obtained from the main story chapter. However, someCharacters must farm on special missions. Upgrading your character also requires fragments of certain Heroes that can be obtained in special missions. █ gacha ninja voltage drops character skills. This skill card increases your character's stats and unlocks various skills depending on the card. The top card is a rainy card that unlocks destructive skills for certain characters for example, Naruto's Rainy Season is the iconic Lassengan, and Sasuke's Chidori. █ FAQ Q: What should I look for when rerolling? A: 5★, preferably due to Naruto or Sasuke release pickup. The rainy season of Gaara, Hirota, and Sakura is not useful in the early days because the main characters cannot be obtained from the main story. Q: Daily Quests? A: There are a total of 4 daily quests: – Clear Story Mission: x3 – Attack Mission (PvP): x3 – Clear Special Mission: x3 – Resource Collection: x5 so I just installed it yesterday so my friend told me about this game. I searched in the sidebar but I can't find a beginner's guide. At f2p I can see that step-up things are desirable because it guarantees you get 5* ones. Or am I wrong?
