The dark soul world can be a dark and lonely place. Various challenges, traps, and booby traps can do numbers for players, but there's at least one ray of sunshine to keep your spirits up in Rodran: Solaire in Astora. He's a delightful knight who's always ready to engage in delightful collaborations, so it's no surprise that Solaire is quickly a fan favourite. Unfortunately, Solere doesn't usually have a happy ending because in most people's play, Solere is going crazy and you have to kill him. Thankfully, there's a way to save him and this list will help you do that, as well as tell you some things you don't know about our badly incandescent friends.

- 10 Miyazaki's favorite character, Soler, who didn't know it, is not a beloved character among fans, nor is it the beloved character of Hidetaka Miyazaki, the founder of the Soulsborn series. Miyazaki himself said Solaire was his favorite character. Miyazaki, the director of Dark Souls, helped the game's design team create Rodran, but he designed the now famous sun emblem on Solere's armor.
- 9 Save Soleer: The first step to saving undead Berg Sole, of course, is to find and meet him. After the Tarus Demon Boss fight, you'll first encounter Solaire in Hellcite Dragon and the undead Bug on the other side of the bridge. Keep talking to him until he offers to help you on your journey. Accept his offer and he will give you a white autographed soapstone. Then go to the next location.
- 8 Didn't know: he was undead on purpose for some reason, when a dark-souled man was branded as a dark symbol and became undead, they moved to an undead asylum, and by extension, Rodran. It's a big fate for anyone except Solaire. Solaire actively wanted to be undead so he could find his own sun. The only way he thought so was to travel to Rodran, but to do so he had to be an undead.
- 7 Save Solaire: Anor Rondo, who met him in Undead Berg, soror moves to Anor Rondo. This means you won't see him for a while after you first meet him, but you can summon him for a few bosses along the way, even though it's not necessary. You'll find Solere sitting next to the first bonfire in Anor Rondo, but to get there you'll have to walk past two Silver Knight Archers who are blocking the road to Anor Rondo Cathedral.
- 6 Didn't Know: Appears in World of Warcraft and Borderlands 2 Solere, but has had a huge impact on players despite playing relatively minor roles in Dark Souls. So he starred in other games like World of Warcraft and Borderlands 2 as Easter eggs. World of Warcraft: General of Draenor, you'll find a follower NPC named Soulair of Andoral, a clear nod to Solere. Similarly, in BorderLands 2, you will find a named NPC Near the camp fire on the island of Gossy Cave, any attempt to talk to him would make him laugh.
- 5 Save Solere: After talking to Solere from the lost Izzaris shortcut Anor Rondor and searching for the Lord, you will eventually find yourself in demonic ruins. Near the fog gate for demon fire bosses you can go down some big roots until you find a four panel door. The door is a shortcut to the lost Izaris and the key to saving Solaire. To open the door, you have to be Chaos Servant +2, which means you have to give 30 humanities to the Fair Lady, and the door opens.
- 4 Did not know: His trademark gesture precedes that of Sole, if he knows his trademark Praise the Sun gesture. Praising Solaire and the Sun go together like peanut butter and jelly, but you might be surprised to find that the gesture doesn't originate from Solaire. This gesture comes from the devil's soul as a rare holy gesture that occurs when you cast a miracle wearing a ring of sincere prayer. Save 3 Solaire: Kill the red eye chaos bug this is the most important step to save Solaire. Unlock the shortcuts of the lost Izaris and you will find yourself in an area full of bugs of chaos. In this area, you need to look for chaos bugs with red eyes. This red-eye bug can save him by infecting Solaire with the sunlight-gudging that causes Solaire's madness. With Soler saved, he can check it out at the end of the game and help the final boss, Gwynn. There are other ways to save soleils that don't include opening shortcuts.
- 2 I didn't know: Connecting fire with Solere allows you to fight along with Gwynn, the lord of the synder. After defeating Gwynn, you have the option to connect the fire or become the Lord of darkness, but what can Soleir do? Miyazaki said that in Solere's world, if he was saved, he would connect the fire and die because it finally became the sun.
- 1 Save Solaire: As mentioned previously, if you're having trouble putting together 30 humanities to

open an alternative method, Lost Izalis Shortcut, there's an alternative, but you shouldn't tell Anor Rondo's Solaire. Don't tell him at Anor Rondo and continue playing as usual until you get to Lost Izaris. Once there, make your way to the area with all the chaos bugs and kill the red eye chaos bugs. After that, you can go back to Anor Rondor and tell Solaire to stand. He will head to the lost Izalis and will not be infected with sunlight meds. You can also cast a poison mist through a shortcut door to kill chaos bugs. Knight Soleir is your best friend. You meet Knight Solaire, a delightful chap whose hobby is a great sense of humor staring directly at the sun, right after you've finished a fight with a bull devil. (First time player, taurus devil is turbodosh; it's a huge obstacle in the way of the rest of the game; it kills you, stony dies, over and over again. And if you bother him enough he leads you to the fact that he can summon players from different worlds to help you in boss fights - as you would do. He says how great the sun is and wants him to be so badly incandescent. He used the expression jolly cooperation. He behaves like a bloke who, at some point in the future, is asking for a beer. And I immediately, like some people. We are CHUMS now. Others in the game, bar cheeky pyromancer, a) secretly or openly akb) unnecessarily evasive and strange or c) recklessly incompetent.* But Knight Soleil? I've never wanted to be more chums with any NPCs in my life. AND CHUMS, MIND. Not a friend. I GET THE FEELING THAT KNIGHT SOLEER ENJOYS GINGER BEER, AND THE AMOUNT OF GINGER BEER HE PREFERS IS LASHINGS. When you take off your helmet, you get the feeling that you can find BUN crumbs around the big jolly CHOPS. The good thing about The Shining Brain Parasite Knight Soleil (despite the big jolly encephalbi) is that he helps you during boss battles. You get him treading bravely over and over while you poke some interrupted monster du jour like a human player, you summon him, and you're fighting on the closest thing you have to a bum. To be honest, I will be honest. I got without him. I didn't summon much, really. But I loved watching him. He seemed to be going on a similar quest to me buzzing around at anorondo's ruins and what, at times I'd find him sitting cold or in a cave near a bonfire, either of them activities that included staring directly at the sun, so I figured he was getting bored of practice or b) blinds. Then Dark Souls does the job. The dark soul attempts to kill him. Dark Souls is trying to kill him, and it stops as easily as finding a woman in a backstreet gambling Moreover, it does not kill him. You kill him. If you plod through the game as just normal – and trying hard all the time to not die and probably still fail, which means it's normal – then he contracts a glowing brain parasite, goes completely mad, and goes to kill you - so you have to put him down. In the whole game, one good, competent person becomes corrupted and tries in your life. Fuck you, dark soul. God, some people. Egg cellar here's what you need to do, to save him, 38 easy steps: STEP ONE. Marry your wife. (Don't follow this guide; wives with sufficient levels of power will do so.) Step 2. Play Dark Souls with her as a spotter, loremaster, and watcher. She will let you know that Knight Solaire will die and you have to stop this, which will make a bad impression every time you love so much and open the bedroom curtains in the morning. Step 3. Kill a giant spider lady from the fungal ruins of BrightTown. Go under her house and discover that her basement is covered with uno harmed spider eggs, and a terrifying infected monster is blocking the aisle. Step 4. Set the monster on fire. Step 5. Realize that the monster was an important NPC and ran away. Go to Belfry. Send 10 grand to the spell of forgiveness of a masked man posing like a Scare scaret. Step 6. Return to the egg cellar. Do not set monsters on fire. Talk to monsters. meet his boss--another giant spider lady. She wouldn't say anything. Somehow, you can sign up for her covenants in a straight-up. Do that. Steps 7 through 36. Give her 30 humanity. You can get zero feedback in the process of all this. Can you repeatedly ask your wife to confirm that this is the right thing to do because you are sure that you have read the right thing about human love in your 30s? Now use the unlocked shortcut to (apparently) sneak off the back of the lost Izalis. Kills all minor bugs in the path that don't attack you. (This is very important; if you don't do this, you can't save him.) Wear with a hat, if you want. Step 38. Wonders like Knight Solaire is not trying to kill you, instead it just seems a little mepey. Confused when he doesn't hug you. I really hope you did it right, and it wasn't just a waste of thirty bloody humanity. Ultimate CHUMS It worked, thankfully, and Knight Soleir and I were the ultimate CHUMS right at the end of the game. As I kicked in the fog in Gwynn's lair, Solaire was by my side, shining brightly, heavily incandescent, and the sunlight flowing from his core. He tied Lord Gwyn to the fight, and I mashed a fool out of my Black Knight Sword +5 and something good rotten. Boom. game over, good end. I woke up in prison. Tea and crumpets are all round. I could not do without him. Jolie. Co. Op. ER. ATION. Mother.
