Good college writers are curious, engaged, reflective, and responsible. They read critically. They write deliberately. They tune in to their audience. They work together and seek feedback. They know that credible evidence makes them credible researchers. They are being revised. "Bedford Handbook," based on surveys of more than 1,000 first-year college students, supports these habits and offers more support than ever before for college reading and writing. New writing guides support students as they com consist in an ever wider range of genres, including multimodal genres. New reading support encourages students to become active readers. Retooled research advice emphasizes investigation and helps writers cite even the most complex digital resources confidently and responsibly. Best of all, "Handbook" remains a trusted companion for students because it is accessible, comprehensive and authoritative. Instructors benefit, too: The substantially revised Instructor Edition includes Nancy Sommers personal mentoring – more than 100 new specific tips for learning with a guide. Finally, integrated digital content is easy to assign and helps students practice and apply lesson guides.
