How to rotate image in google docs

SearchClearProcess app searchGoogleMain menu Docs Editors Google Suite has taken over the word processing industry, especially in the business world. Its ability to support documents on the internet, not through downloaded software, makes it ideal for sharing documents between companies. The suite eliminates compatibility issues between software programs. The updated shared editing features in real-time make it unmatched by its competitors, and its use grows by the day. It's a everywhere way to create a document or presentation and easily share it or convert it to PDF. However, some of its functions – especially in Google Docs – are not always obvious to users. It is necessary to explain in some detail how to use the basic editing tools and highlight keyboard shortcuts that users should be aware of. Adding images to Google Docs is simple, but did you know how to rotate an image from landscape orientation to portrait orientation? That's what we're going to see today. Sign in with your Google Account now for a 3-export free trial. There are two ways to rotate an image in Google Docs. Let's review both, so you have a strong understanding of how to complete tasks efficiently. Method 1 for Rotating Images in Google Docs:This is the simplest way to rotate an image in Google Docs:1. From the top toolbar, select Insert. 2. Select Image from the dropdown menu.3. Choose where you want to draw the image from. Options include uploading from your computer, Google Drive, or Google Photos. You can also insert an image from the URL. This will take you to a dialog box where you can select. Affiliate DisclosureIf you purchase a product through multiple links in this post, as an Amazon Associate Itechguides.com from an eligible purchase. This itechguide teaches you how to flip an image in Google Docs. Flipping a picture is different by rotating it. When you flip an image, you flip the image – that is, you create the right left side and vice versa. On the other hand, rotating the image turns it upside down. You can rotate the image to the right or left but you can flip the image vertically or horizontally. In this guide, I'll flip the image below horizontally. When I flip the image, the front of the vehicle will point to the left. Here are the steps for flipping an image in Google Docs:Open the Google Docs document that contains the image you want to flip. Then select the picture by clicking on it. When you click on the image, it will have an edge around it. After the picture is selected, right-click the picture. Then choose Copy. You can also copy an image by pressing Ctrl + C on your keyboard. Place your cursor at the end of the picture and press enter You move to a new blank page. With the image copied to your clipboard, place your cursor on the new page. Then click Insert, point to Picture and then select New. The Google Docs Drawing Tool will on the drawing tool. Then select Paste.The image will be pasted into the Drawing tool. It will also be highlighted automatically. You can also paste by pressing Ctrl + P on your keyboard. To flip this image in Google Docs, click the Actions drop-down menu, pointing to Rotate. Then select Flip horizontally. After you click Flip horizontally, the right side of the image will be left and vice versa. See the second image below. Finally, click Save and Close. You can also flip the image vertically: Action > Rotate > Flip Vertically. Here's a vertically inverted imageThis is very easy to flip an image in Google Docs! I hope you find this Itechguide helpful? You can ask questions, leave comments, or provide feedback with the Leave Reply form found towards the end of this page. Finally, for more Google Itechguides, visit our How to Use Google page. Was this post helpful? Yes (45)No (7) Google Docs is a useful online word processing application that lets you create, share, and print documents for professional or personal needs. In addition to working with text by adding bullets, using find and replace, or adding images to your document, you can also flip or rotate images in Google Docs. Rotating and drawings in Google Docs means you can change how they look on a page. Flipping the image actually makes a mirror version of it. There are several ways to rotate an image but only one way to flip the image. Here's how it works. The instructions in this article apply only to Google Docs on the web. You can add images in the iOS and Android mobile apps, but you'll need to use a desktop browser to change the orientation of the image. Even after you insert an image into your Google Docs, it may not be immediately clear how to rotate the image. However, there are several ways to get there. First, insert a picture into your document if you haven't already. To insert a picture, place your cursor where you want it in your document that you want to view, and then click the Insert Picture icon. Navigate to and select your picture. After the picture is in the document, select the picture so that the blue border appears. You will also see a small menu immediately below the image. Click the Picture Options icon (three vertical dots) and pick Size & Rotation. You can also select Image options from the context menu above the document. The Image options pane opens on the right side of the screen. There, you can use the options below the Rotate section to change the Angle of the image (by degrees) or you can rotate the image 90°. When you're done, you can close the Picture options pane and click outside the picture in your document to close and delete the border box. When you select a picture, you may notice that the blue border box has square points at every corner and in the from each side. These bullet points are used to resize your picture. But there is also a round blue circle in the middle of the top edge of your image. This is the Rotation control. Once you've selected an image, you can click and hold the blue circle to change the rotation of the image. If you change the rotation of a picture in your document and it suddenly disappears, don't panic. Scroll further down in your document. It is possible that changing the orientation of the image makes it too large to fit in the space available on the page where it was originally located. Flipping a picture is not the same as rotating it. Flipping the image creates a mirror image where the text is backward and the object appears on the opposite side of the image. But, to flip the picture, you'll need to insert it in your document using a different method. To insert a picture into your document, please cursor where you want the picture to appear and then choose Insert > Picture and then select + New. In the Picture dialog box that opens, select the Picture icon. Navigate to and select the picture that you want to insert into your document. The picture will be inserted into the Picture dialog box. Before you close the Picture dialog box, select the Actions menu in the upper-left corner. Hover over the Play option and from the flyout menu, select Flip horizontally or Flip vertically. Flipping the picture horizontally moves the items in the picture on the right to the left side. Flipping it vertically moves the item at the top of the picture down. You can also use this menu to rotate an image if you want to do so while editing it in the Pictures window. When you're done, click Save and Close to insert a picture in your document. If you need to change the picture again after inserting it, you can select the picture and choose Edit from the menu that appears below it. That will take you back to the Pictures editor so you can make your changes. Thanks for telling us! Tell us why! Here's how to rotate an image in Google Docs, if you just inserted an image into your document and it's oriented the wrong way. Rotate Image in Google Docs There is no labeled option to rotate an image in Google Docs, which makes the user somewhat unable to know when an image inserted in a Google document appears the wrong way. However, once you're familiar with the steps provided below, you won't have trouble rotating images in Google Docs on your Mac or PC. The steps for Playing An Image in Google Docs are the same, on both a Mac and a Windows PC. Rotate Picture in Google Docs on a Mac or Windows PC Follow the steps below to Rotate an Image or picture in Google Docs on a Mac or Windows PC. 1. Visit docs.google.com and log in to your account 2. Open The document that contains the picture that you want to rotate. If you have not uploaded pictures, pictures, can open New Document to try these steps. 3. To Insert An Image in Google Docs, click on the Insert tab located in the top menu and then click the Draw option in the drop-down menu. 4. In the pop-up, select the Image you want to upload to Google Docs. 5. Once the image is inserted in Google Docs, click Image and you'll see it surrounded by a small square box and editing menu at the bottom. (See image below) 6. To Rotate the picture, click and hold on the little blue circle and you will be able to move the image using your mouse. Moving the mouse to the right rotates the picture clockwise and moving it left will rotate the image anti-clockwise. 7. Once the image is properly oriented, remove the mouse cursor or remove your finger from the trackpad. Rotate Image in google docs App Unfortunately, the mobile version of Google Docs does not allow users to rotate the image. This means you'll need to rotate the photo on your phone before uploading it to Google Docs or uploading an Image on your Phone and using your computer to Rotate the Image, using the steps provided above. If you're using an iPhone or iPad, you can refer to: How to Play Photos on iPhone and iPad. If so, you're using an Android Phone or tablet, you can refer to: How to Play Photos on Android Phone.
