## Lacc nursing spring 2019 allnurses

Nursing Information Session Wednesday, October 21, 2020 5-7 pm (virtual/online) Sign up in advance for the virtual session by calling 562-467-5231 \* Nursing and counseling will continue to offer information sessions 1-2 times/semester. Please monitor the nursing and counseling website for dates. \* ATTENTION NURSING APPLICANT 2020-2021 application cycle\* FIRST: To be in line with recommendations and mandates set forth by the CDC to reduce the rapid transmission rate of the COVID-19 virus, the ward is currently working remotely. Therefore, we appreciate your patience during this challenging time in our response rate to your questions and questions. We monitor our voicemails and emails closely and respond; however, the response rates may take a few days. Thank you, in advance, for your patience and understanding. SECOND: Schools have made drastic changes to a proactive strategy to slow the spread of Coronavirus and to keep our students and staff safe. We are currently working hard to maintain continuity in nursing classes and clinical for our current students. Enrolled, continuing cohorts must remain our priority right now. However, we would like to assure you that if you submitted an application for admission by March 16, 2020, we have your application! We are currently screening and processing these applications through our normal process. UPDATE: SEPTEMBER 23, 2020 THIRD: The Nursing Program continues to be greatly affected by the COVID-19 pandemic and its impact on our surrounding hospitals, clinics and community clinical partners. It has negatively executed the number of clinical training places available to nursing students. Without plenty of training places/placements, the nursing program will have to exert our efforts on our currently enrolled student cohorts and their progression toward graduation. The program will need to change its registration number and application process for the 2020-2021 study period. Therefore: 1) All applications received in the application cycle January - March 2020 have been received, reviewed and evaluated. 2) In autumn 2020, admission was completed in July 2020. 3) Spring 2021 admission was selected September 14, 2020, and emails were sent to the applicant's email listed on the application. The program aims to admit a reduced class size (~30 students) in January 2021. Please check your email inbox, spam, and trash to make sure this isn't missed. Please reply by Friday, September 25, 2020. We will also follow up with a phone call no later than the deadline date. 4) Once all spring 2021 admits have been notified and have accepted, then all other applicants from this application cycle will be notified by regular mail of their non-approval for the academic year 2020-2021. However, all applicants will the opportunity to move their application forward for selection for the cohorts in autumn 2021 and spring 2022. 5) Due to the ongoing pandemic concern, its effect on enrollment and progression of students in the program, and campusworking remotely this academic year, it is the decision of the nursing program that we will not have an application cycle in January - March 2021. We will not take any new applications until January 2022 (for any possibility of entering the program). Therefore, the enrolment cohorts for autumn 2021 and spring 2022 will be made from the current applications that the programme has. \*IF YOU TAKE AN ADMISSION ELSEWHERE AND NO LONGER WANT TO BE CONSIDERED, PLEASE NOTIFY THE DIRECTOR OF NURSING @KBROOKS@CERRITOS.EDU. WHAT IF I'M INTERESTED IN THE NURSING PROGRAM? WHAT SHOULD I DO? Review the technical standards and essential functions to ensure that Nursing is a career for you. (left toolbar) Review the nursing program's information package and admission requirements (left toolbar). This will give you material information regarding courses, GPA requirements and timelines. Make an appointment with a Health Professions Advisor and/or attend a General Nursing Workshop with counseling. (online currently - workshops continue this fall) Take nursing 3 course in the spring semester to see if Nursing is for you. Get medical volunteer hours during this time. Complete the necessary science pre-requisites Study for and take ATI TEAS Examination PRE-NURSING STUDENTS WITH PRE-ENPREREQUISITES COURSE: With the entire campus taught remotely through spring, summer and autumn 2020, all scientific knowledge courses will be held on-line. Our campus will not be alone in these changes. Many of the community college campuses will also be remote. As a result, the nursing department has made a decision to accept on-line courses (anatomy, physiology, microbiology and English) that are completed during the spring, summer and autumn semester si20. However, nursing students cannot submit pass/pass as grades for these courses. Due to the premise of GPA back admission requirements, as well as the credits awarded by the MultiSelective Criterion for these grades, it is necessary that pre-nursing students take all scientific pre-necessary courses for letter grades. Therefore, when you sign up for a science pre-professed course, please ask the instructor to give you a performance option. MATH REQ: The program understands that some pre-nursing students may have taken Math 75 for skill requirements. However, in order to appropriately prepare our nursing students for transfer to BSN programs, the program will encourage and require students to take Math 80. The completion of Math 75 fall 2021 or later will not be acceptable to apply to the Cerritos College Nursing program. Cerritos College College The program is approved by the California Board of Registered Nursing California Board of Registered NursingP. O. Box 944210 Sacramento, CA 94244-21100Phone: (916) 322-3350 Cerritos College Nursing program is accredited by the Accreditation Commission for Education in Education Accreditation Nursing Commission for Education in Nursing 3343 Peachtree Road NE, Suite 850Atlanta, Georgia 30326Phone: (404) 975-5000 \*Applicants for the 2020-2021 Application Cycle need to refer to the Fall 2019 Nursing Information Pack and must take advantage of the revised Option A Application (2020 -2021 Cycle) (not 2019-2020application)\*NOTE: NEW APPLICATION/ADMISSION PROCESS - Effective January 2019\*For OPTION A students onlyThe Cerritos College Nursing Program accepts applications once a year, from 1 January to 15 March, for the following academic year. Applications for the academic year 2020-2021 will be approved starting in January 2020. The nursing program will utilize a Blended Admission Process using a combination of: 1) Multiselective Criterion Admission Process and 2) Random Selection (Lottery) (started with January 2019 application period). All applicants will be awarded points according to the Multiselective Criterion Tool. The program will configure points for all applicants and the first 50% of admission places for the 2020-2021 academic year will be filled with the top point applicants. The remaining applicants will be placed in a random selection process (lottery) and the next 50% of admission places will be filled with the best students in the random sample. The Multivalive Criterion Admission Process (for Alternative A Applications) will take into account the following: Nursing is both science and art, requiring specialized training and training to save lives, improve health and alleviate suffering. The Ward is one of California's premier programs that prepares students for high-demand, high-demand nurses such as registered nurses (RN) or licensed professional nurses (VN). Resources include a 2,600-square-foot hands-on skills lab with state-of-the-art equipment that replicates a hospital environment. RN students can earn an Associate of Science degree, while VN students can earn an Associate of Science degree or a certificate of accomplishment. The department

also offers the Career Ladder Nursing Program for licensed occupational nurses to become a registered nurse. All programs include courses that prepare students for the national license degree or transfer to a four-year institution. In addition, the VN program offers home health helpers and nursing certificates. If you are interested in a career as RN, an associate degree in nursing (ADN) program in California offers all the preparation you need. More than 8% of all RNs in the United States are employed in the State of California, making it of the most popular states for people people in pursuing this career. What's more, 33% of U's currently employed in their fields across the state have an associated degree. California is home to some of the nation's best ADN programs, all of which are designed to prepare you to sit for and pass the NCLEX-RN licensure survey. • Curriculum: You will take courses like the basics of nursing, pharmacology, nutrition, and mental health nursing, just to name a few. You will also need to complete a clinical rotation, which will give you hands-on experience under the faculty's supervision. The average number of clinical hours you will need to complete is 240, but this can vary from school to school. In some cases, you may be able to complete additional clinical hours as elective courses. Although these are not required to graduate the program, they can give you more real experiences that can serve you well as you begin your career. At the end of your program, you will be prepared to sit for and pass the NCLEX-RN survey. • Program length: It takes anywhere from 18 months to two years to serve your ADN in California depending on which school you choose to attend. • Cost: The average cost of varies based on the type of school you attend. Public schools offer the cheapest route; private, for-profit schools tend to cost the most. The total cost of your education ranges from \$5,736-\$84,192. Books and supplies will cost an additional \$1,723-\$4,814. Tuition Range \$5,736-\$84,192 Average Tuition \$19,692 Books & Supplies \$1,723-\$4,814 • Entry requirements: To be accepted to an ADN in CA, you must meet the minimum entry requirements. You will need a high school diploma or GED, and while many schools will consider your application if your GPA is at least 2.5, you will have a better chance of being admitted to one of these competitive programs with a GPA of 3.0 and above. Program Evaluated90 Program Ranked10 CriteriaMust Approved by California Board of Registered NursingMust be accredited by ACENNCLEX throughput should be available for last 4 years Weightage As assigned for NCLEX-RN Pass Rate Years2013/2014 = 0.102014 /2015 = 0.202015/2016 = 0.302016/2017 = 0.40 We have analyzed 90 California Board of Registered Nursing approved ADN programs, and after applying our ranking methodology, we have come up with a list of the top 10 ACEN accredited ADN programs in California that boast the highest NCLEX-RN pass rates. Los Angeles Harbor College (LAHC) is part of the Los Angeles Community College District. The College offers two different nursing programs. The first is the usual ADN program in California that is designed for high school graduates, and the second is lvn to the RN program, which helps those already licensed as LVNs to promote their nursing qualifications. LAHC offers advanced placement for members of the Also. The ADN program at LAHC offers simultaneous classroomand clinical experience at a variety of local hospitals and clinics. Students can attend clinical studies at Kaiser Medical Center, Providence Little Company of Mary, Torrance Memorial Hospital, and Harbor UCLA, to name a few. The program is four semesters in length and takes two years to complete. During the course of the program you will participate in a variety of discussions in small groups and gain simulated laboratory experience. The curriculum includes courses such as nursing, communication in nursing, nursing process & internship in the care of adult clint, nursing process & internship in care of children, an introduction to leadership & management and more. You can also apply for the Family Nursing Scholarship Program, which is unique to the Los Angeles Community College District, until 2024. This scholarship covers not only the cost of your training, but also the cost of supplies and license fees. Saddleback College is part of the South Orange County Community College district, and it offers a top notch ADN program. Saddleback College really focuses on the student by offering not only education, but also guidance, counseling, child care, a student health center, financial support, tutoring, and an excellent career center. Saddleback College's ADN program takes four semesters to complete, and you will be required to work two to three unpaid 12-hour shifts along with a signed RN during the evening. This will help you get your 240 required clinical hours. Classroom course work includes Pharmacology, Fundamentals of Aging, Nursing Process, Mental Health Nursing, Medical-Surgical Nursing, and more. Once you have completed this accredited nursing program, you will be eligible to sit for the NCLEX-RN survey. Per the school's nursing student achievement data from the academic year 2015-2016, 85% of all graduates got a job in the nursing field after graduation. Monterey Peninsula College (MPC) trains nurses at Maurine Church Coburn School of Nursing. Here you will earn an Associate of Science degree that successfully prepares you in nursing. The ADN program is offered in collaboration with Montage Health, Community Hospital in the Monterey Peninsula. MPC provides a combination of both classroom and clinical training to prepare you for your career. This program takes four semesters to complete, and you will take courses like General Human Anatomy, Lifespan Development, Interpersonal Communication, Applied Foundations of Learning, and more. Out of 73 total units distributed over the course of four semesters, four of these units are your clinical rotation. You will work together with an assigned nurse to complete Supervised Nursing Skills Labs. You will learn to work with other healthcare professionals to provide care to patients in attitudes, to act as patient advocates and to provide direct patient-centred care based on evidence and facts. Completing the MPC ADN program in CA prepares you to sit for the NCLEX-RN exam and work as an RN in an entry-level position. Grossmont College is located in El Cajon, California, and their ADN program prepares both men and women to pass licensure exams and begin their careers in a variety of unique care settings. Grossmont is also home to a chapter of the California Nursing Students' Association (CNSA), and you can find regular meetings on campus. CNSA hosts regular nursing nursing fairs and other events at Grossmont, as well. This ADN program is a two-year, four semester program. Per Grossmont's website, you should be prepared to devote 40 hours each week to classroom studies and clinical. You will take courses like human anatomy, human physiology, paramedical microbiology, and neurological and psychiatric nursing, just to name a few. You will need to complete a total of 72 units to earn your degree. Three of these units are eligible for a humanistic course of your choice. At Grossmont, 80% or more of students who enroll in the ADN program complete it within six semesters. Job placement rates are 75% within the first 12 months, and for those who successfully take the program and get their license, 25% enroll in an advanced degree program within a year. The RN program at Hartnell College is one of the most lucrative ADN programs in California. Groups like the NAACP and UCSC have praised Hartnell College's nursing program for promoting underrepresented students and minorities. This program takes two years to complete and consists of four semesters of study combined with clinical experience. To pass this program, students must take and pass 44.5 study units. Unlike many colleges that drive clinical experience to the end of the program, Hartnell students have participated in four levels of Supervised Nursing Skills Practice – one level each semester. This combined approach to classrooms and clinical learning has been shown to improve students' ability to retain information learned in the classroom and translate that information into the real world. Courses include Nursing Theory, Clinical Reasoning, Pharmacology, and more. After completing the program, students can communicate effectively with patients, their families, and other medical professionals, utilize critical thinking skills to provide the best possible care throughout the human life cycle, make ethical decisions when planning patient care, and demonstrate skills in nursing skills at entry level. The School of Nursing at Santa Barbara City College (SBCC) offers several unique opportunities for those interested in a nursing career, including an outstanding ADN program. program is four semesters in length and takes you two years year Complete. The curriculum is structured in such a way that it meets standards set by the Massachusetts Nurse of the Future and Quality and Safety Education for Nurses (QSEN). Courses you will take during the program include foundations in nursing, pharmacology, medical-surgical nursing, gerontology, community health care, and much more. You will also be required to participate in clinical rotations that will allow you to test your skills in a real environment. These skills and clinical are designed to maximize the number of students who pass the NCLEX-RN examination upon receipt of their associate degrees. More than 85% of the students who start this program successfully complete it. What's more, 91% of those who get their degrees from SBCC gainfully employed as RNs within one year of graduation. Riverside City College (RCC) School of Nursing's ADN program requires four semesters and an intersession. There are 74 total units to complete, and the school requires scientific prerequisites in anatomy, physiology and microbiology. RCC offers a pre-nursing workshop to introduce new students to the industry every two weeks throughout the school year, and all students interested in nursing programs are encouraged to participate. During your course of study, you will take courses such as the Foundations of Nursing, Chronic Disease, Acute Maternal-Child Specialty, Pathophysiology, Pharmacology, and Clinical Every Semester. Unlike other ADN programs in CA, RCC makes some of these clinical selectable. All students must participate in the clinical trials required to receive their degrees and sit for the NCLEX-RN exams, but in this case students are given the opportunity to participate in extra clinical hours if they so wish. Due to the required intersession at RCC, the program length is five semesters, which means that the program takes 2.5 years to complete. At the end of the program, you will be prepared to provide high-quality patient care using endorse-based methods, provide leadership across a wide range of healthcare environments, collaborate and communicate effectively with others, and use the latest technology to communicate, reduce risk, prevent errors, and support decision-making. At Santa Monica College (SMC), students interested in getting their ADN can participate in a Nursing Program Information Session. These sessions are open to potential SMC students, but you need to sign up for them in advance. Although Santa Monica College itself does not offer a BSN program, its curriculum is designed to support an ADN to BSN bridge program, and students are encouraged to promote their education. Coursework is combined with supervised tutorials and simulated labs over four semesters. Aside from the courses required, you can also choose to attend optional counseling courses to help you improve your study skills at college and enjoy success as a nursing student. You will also have access to Supervised Tutoring, which is a more personal approach to learning and can help you better understand the key concepts taught in your courses. More than 90% of SMC graduates are gaining employment in the nursing field within a year of receiving their degrees. SMC is transferring more students to the University of California campus than any other college in the United States, and it has been doing so for more than 26 years in a row. Many of these students are nursing students pursuing their BSN or MSN degrees. Palomar College in San Marcos, California offers a highly rated nursing education program that takes a holistic approach to learning. The program found here focuses heavily on ethics and the ability to think critically, both of which are crucial in any nursing career. Unlike many of the other schools, Palomar College offers two different associate degree options for nursing students — an associate in Science in Nursing (AS) and an Associate in Arts (AA) in nursing. These programs are mostly identical, but the AA program requires additional entities in American history and institutions. Courses include nursing foundations and multiple levels of generic nursing courses that aim to provide students with all the information they need to not only pass the NCLEX-RN survey, but to enjoy a successful career. These courses are combined with clinical ones that are designed to provide real nursing experience in a supervised setting. If you are interested in attending Palomar College's Nursing Education Program, Informational Meetings are held in the spring each year. At the end of your studies, you will be able to make complex decisions, adapt to different situations, collaborate with others, act as a patient advocate, and leverage technology to provide outstanding and ethical patient care. Palomar College focuses on advocacy-based nursing aimed at disease prevention, wellness promotion, and even hospice care. Moorpark College is a member of the Ventura County Community College District which was ranked the fourth best community college in the United States on the March 15 Huffington Post. Moorpark College takes a unique approach to the ADN program by giving you access to a variety of elective courses approved by the California Board of Registered Nursing. These courses, including electives like Sex, Sex, and culture and peoples and cultures in the world, are much more diverse than many other schools can offer. Compulsory courses for this program include Biology, Pharmacology, Physiology, Infant/toddler care, Nursing science and clinical laboratories. You can also choose to participate in Holistic Health Practice courses if you choose to pursue a career in holistic medicine. You will also have the opportunity to participate in four levels of nursing skills labs that are not required for by Moorpark College. Completing this program will teach you how to apply safety and technical skills at work, think and reason critically, communicate with others in a health care setting, organize your time and set clear priorities, and perform all the tasks essential to your career as RN. After graduating from an accredited ADN program to practice as an RN in California, you must apply for a license, register for the NCLEX RN exam, and pass the exam. An ADN in California can give you a lucrative career as an RN as long as you pass licensure examination and keep your license ur up to date. With an ADN in CA, you can provide nursing care in hospitals, nursing homes, schools, prisons, rehabilitation centers, outpatient clinics, trauma centers, emergency rooms, and urgent health centers throughout the state. Greater work responsibilities include monitoring and documenting patients' health, taking and recording vital signs, administering medications prescribed by a doctor, and working with doctors, patients and other caregivers to come up with unique care plans based on patients' needs. An ADN in California prepares you for an entry-level career in nursing, and while this can be lucrative on your own, you can choose to use it as a springboard. Many schools offer ADN to BSN programs, and others offer ADN to MSN or BSN to MSN programs that allow you to pursue a specialty in nursing later down the line. The average annual salary for all RNs with ADNs across the state is \$99,970, which is significantly more than the national average. Type Pay klass Average earnings Hourly wage \$29.51-\$69.50 \$48.06 Monthly \$5,120-\$12,050 \$8,330 annual \$61,380-\$144,550 \$99,970 (Source: Compiled using data from the U.S. Bureau of Labor Statistics) Employment prospects for ADN graduates in California are exceptional. Between 2016 and 2026, employment is expected to increase by around 15.75% when 14,270 new jobs open within this 10-year timeframe. California's population continues to grow, and more of these people have access to health insurance, which means that the number of people seeking professional health care is expected to grow significantly. Right now, about 6,250 jobs for an RN with ADN are available each year in California. Number of RN's with ADN 10 year new job growth projection (2016-2026) Estimated annual job openings (New + compensation) 2016 2026 Increase in speech growth in % 9 0.630 104,900 14,270 15.75% 6,250 (Source: Compiled using data from careeronestop.org) ADN Program in other states
