Eso es lo que intenta hacer ZEPETO, donde los usuarios pueden interactuar con otros a través de los avatares tridimensionales que ellos mismos han creado a partir de fotos propias gracias al potente sistema de reconocimiento facial que incorpora. Crea tu avatar e interactúa con los demás usuarios Su funcionamiento es tan sencillo como hacerse un selfie o coger una foto de la galería para convertirla automáticamente en emoji. A partir de aquí podremos personalizar su estética tanto como nuestra imaginación nos lo permita y crear un entorno a través del cual nos presentaremos other users , decorate our own With plants and furniture, even participate in daily missions. Become a virtual character. The rest is quite like lifelong conversations. That is, as we walk through different chat rooms, we access the profile of other users, we follow them, we exchange messages with them ... The effect of apps like Sims or SecondLife here is obvious so if you like this kind of game to actually simulate while you're a regular social media user, download APK now and register as a user. The social network is not without controversy this social network created by the same developers that the SNOW instant messaging app has quickly gone viral and it is not uncommon to see your 3D avatars used in other messaging apps and social networks. However, it's been in pretty much controversial lately. The internet rumor that zepeto follows and monitors its users through the camera and microphone of its portable devices (a lot of tom's modern eye roll) has begun to spread. It all comes from many Twitter accounts that have alerted you that if you approach your mobile phone in your ear while running this app, you'll hear background noise, sometimes constant sound. Because of this buli (it has already been proven that ZEPETO does not spy on anyone) thousands of users started uninstalling the app from their smartphones and tablets, giving credibility to rumor without any kind of foundation, because it is a common noise in any application that makes use of our microphone. Don't worry, it's not a tracker that's new in the latest version you can now use the world vertically. Allows you to import music or sounds from a video. Have you ever wondered what it's going to look like? With ZEPETO, you can recreate yourself in 3D animations that can also work as emoji chat! The app will also let you release your creativity by allowing you to customize your avatar, set a greeting, and much more. Becoming emojiZEPETO focuses on trying to capture your features as accurately as possible to create an emoji or avatar that will undeniably look like you. To get started, the app will ask you to take a selfie and from that, it will try to capture and recreate your look, and turn it into a 3D animation. If you are not satisfied with the result, you can change and modify your features so you think that your avatar looks just like you do. For example, if your eyebrows are thicker than zepeto made of it, you can either fix it manually or choose from the app's presets. While the essence of the app is to create an emoji that looks like you, of course, you don't have to just settle on a basic look. ZEPETO will also let you experience on yourself. If you want to change your hairstyle or hair color, you To do it! It has many distinct assets available to you to try in order to make your avatar more like you not only in appearance but also in style. Also customize does not end with your avatar only. Backgrounds can also be changed and we're not talking about just changing colors. ZEPETO WILL LET YOU DECORATE YOUR OWN PLACE! You will have your own room very complete with furniture and other items such as books and photo frames. This can be seen by others when you check your profile. Additionally, text greetings such as thank you, sorry, and Miss you can be included. But wait, there's moreapp than just a avatar maker. Believe it or not, it has its own community of users with whom you can be friends. There are also daily tasks that you need to perform in order to get coins, which you can spend to buy new clothes and items for your avatar and your room. Apart from that, your profile picture is also able to make moves and perform positions that can be saved by an expressive generosity or profile picture for your other accounts. A secret spy? Rumors have ZEPETO is secretly tracking its users. This assumption spread like wildfire in the Twitter community after many users claimed that when you put your phone in your ear while using the app, you'll hear a constant noise or a very faint sound. Sounds scary? Well, we won't argue with that but despite these allegations that run in the rumor mill, there is actually no strong evidence to support this. When registering, ZEPETO does not ask its users to disclose their location. Apart from just asking permission to use your camera and for your personal photos, the app does not require any other personal information such as your home address. As for the constant sounds and buzz? It is possible that the problem lies in the device itself and not the application. You can rest assured that the app is safe and has no way of knowing where its users live. Have fun with your emojisZEPETO is a cool app that you can really enjoy. The ability to make yourself an emoji is a fun and best way to express yourself. Its mini-games also keep an interesting app to use. Make only one application and 3D - ZEPETO.
