Gramatica b subject pronouns and ser answers

Generally speaking, a subject is who or what is a phrase. Almost anything can be a subject. In the sentences below the subjects are underlined: Nicolas Cage is an actor. Greece is a beautiful country. Julio, Rafael and I went to the store. Your health is very important. Swimming and cycling are fun activities. Subjects usually come at the beginning of a sentence, but they don't have to. What is a Subject Pronoun? A pronoun is a shorter word that takes the place of a longer noun. We use pronouns as soon as we introduce a noun so we don't have to repeat the same thing over and over again. Here are some sentences in which the subjects were replaced by subject pronouns. He's an actor. It's a beautiful country. We went to the store. It's very important. They're fun activities. The subject pronouns in English are me, you, him, her, this, us and them. It can be beneficial to organize them into a chart based on the number (how many people or things there are) and person (whether you are talking about yourself, to someone else, or about another person). singular: plural: first person: I us second person: you third person: he, she, they realize that there is no distinction in English between the singular you and the plural you. Although it is not considered proper grammar, many people will use you or you to indicate that you are talking to more than one person. It is also worth noting that he and she are the only pronouns that take into account the genre. Pronouns of Spanish subject The pronoun of subject in Spanish is like this: singular: plural: first person: yo nosotros, nosotras second person: tú vosotros, vosotras third person: él, ella ellos, ellas Note that there is no pronoun subject to him in Spanish. How do you say that? See below. Yo to say I in Spanish, say yo. Yo is not capitalized unless you start a sentence: Yo hablo español. I speak Spanish. Luckily yo hablo español. Fortunately, I speak Spanish. In many regions the y in yo is pronounced very strongly and it so much like a j. Tú To say you in Spanish, say tú. Tú can only be singular; you can't use tú to address a group of people. Also, the accent on u is not optional; you (without the accent) means yours and not you. (The words tu and you are pronounced in the same way.) Tú hablas español. You speak Spanish. Ella to say it in Spanish, let's say it is. As in the tú, the accent is not optional; el (without the accent) means not him. (The words él and el are pronounced in the same way.) Say it in Spanish, say ella. Remember that the ll is pronounced as a y. Él habla español. He speaks Spanish. Ella habla español. She speaks Spanish. Nosotros, Nosotras Note: If you are a man, it is very unlikely that you already had reason to say or write nosotros. Usually when you need to say us in Spanish, you say nosotros. The exception is when a female is referring to herself and other females. She's going to say nosotras. How about a mixed group? It is not very pleasant or politically correct, but only groups that consist entirely of females are considered female (nosotras). Add a male to the group and the whole group is considered male (nosotros). Nosotros hablamos español. We (group with one or more males) speak Spanish. Nosotras hablamos español. We (all of the female group) speak Spanish. Vosotros, Vosotras Unlike English, Spanish has a way of distinguishing between a singular you and a plural you. To approach a group of people like you, use vosotros. Vosotros habláis español. You speak Spanish. If the whole group you're heading for is female, let's say vosotras instead. Vosotras habláis español. You (all of the female group) speak Spanish. Regardless of the size of the group, if it includes only one male, use vosotros. If you are in doubt, use the male form. Here's the catch, and it's great: Vosotros is used almost exclusively in Spain. So how do you go to a group of people if you're not in Spain? See Vosotros and Ustedes below. Ellos, Ellas To say them in Spanish, you say ellos or ellas. Which is which? The same gender rules you learned in nosotros apply. A group composed entirely of females should be referred to as ellas. Any group with at least one male should be referred to as ellos. If you are in doubt, it is better to use the male form. Ellos hablan español. They (group with one or more males) speak Spanish. Ellas hablan español. They (all of the female group) speak Spanish. Formal vs. Informal You The above chart showing tú and vosotros as second-person pronouns is a bit of an oversimplification. The truth is that there are two sets of second-person pronouns in Spanish. One set is used for both formal and friendly situations and the other is used to show greater respect in formal situations. The chart should really look like this: singular: plural: first person: yo nosotros, nosotras second person, informal: tú vosotros, vosotras second person, formal: usted ustedes third person: él, ella ellos, ellas So what do you use when? Tú or Usted? Generally speaking, you should use tu when you are addressing someone with whom you have an informal relationship such as a friend, colleague, or close family member. Use usted when addressing someone with whom you have a more respectful relationship like an elder, a boss or a dignitary. For example: talking to a child: talking to a teacher: Tú escribes bien. You write well. Usted bien escribe. You write well. A good rule of rule to use is the of the first name. If you are on a first name basis with someone, you can them as tú. If you don't address that person by first name, you should probably use usted. Note: There is even a verb to address someone as tú: tutear. Different countries have different rules for the use of tú vs. usted. While some people may find his use of tú captivating, others may find it offensive. In doubt, use usted. It's better to address someone as expelled when you expect te than the other way around. The word usted is commonly abbreviated Ud. (note the capital letter). Vosotros or Ustedes? When approaching a group of people, vosotros are used for unusual situations and ustedes are used in situations where more respect is needed. For example: talk to a group of children: talk to several teachers: Vosotros escribís bien. You write well. Ustedes escriben bien. You write well. Remember, however, that vosotros is mainly used in Spain. How do you target groups of people in the rest of the Spanish-speaking world? Use ustedes, regardless of the level of formality. Spain: Latin America: second person, plural, informal: vosotros ustedes second person, plural, formal: ustedes ustedes The word ustedes is commonly abbreviated Uds. (note the capital letter). More about Spanish subject pronouns E It? It is an English subject pronoun used to refer to something that does not have a genre or whose gender is not known. There is no pronoun of equivalent subject in Spanish. So how do you say that in Spanish? You don't know that. You simply omit the pronoun subject completely. Beautiful Es. It's beautiful. Works bien. It works well. Subject pronouns omitting speaking of omitted pronouns ... As many verb conjugations make clear who the subject is anyway, subject pronouns are often unnecessary and often omitted in Spanish. For example: Hablas español. You speak Spanish. Hablamos español. We speak Spanish. Vos Se tú vs. usted was not complicated enough, some regions of the Spanish-speaking world have a third category, vos. You generally indicate a relationship even closer than you. second person, informal: vos second person, semi-formal: tú second person, formal: usted Read more about you here: What is the Agreement with Vos (Voseo)? This class covers one of the most important grammatical topics of the language: pronouns of Spanish discipline – Los pronombres personal. These kind of pronouns are used in every conversation we have. Learning how to use them is key to communicating our ideas accurately.
