Home » Pengo Home Electricity » Rice Kitchen » Rice Kitchen PG-618T Product Code: PG-618T 0 commenting capacity: 1.8L, removable cable. / Smooth aluminum heart Read more - By command pengo - manufactured in Vietnam - Certified cr Vietnamese stamps - Certified energy stamps issued by the Ministry of Industry and Commerce - Capacity / Voltage: 900W - Aluminum heart thickness 270gram - The surface inside and outside the cooking pot is treated with surface electrolytic technology - Keep warm from the pressure of the bottom, 40W power- stainless steel lids are extremely resistant oxygen toation. European-style disassembly power cable, 1.2M long.- Rubber food flange system ensures food safety parameters, export standards according to international standards, no smell, no toxicity .... There are a variety of colors and patterns Price: Contact copyright © from Pengo. All rights are reversed. 1.8L Pengo PG-618T removable rice cooker with a capacity of 1.8L is suitable for small families of 4-6 people. Simple design products, elegant colors suitable for many kitchen areas. The pot is designed with large heat trays, radiating heat across the surface to help the rice mature evenly and more palatable. Stainless steel caps are highly antioxidants to ensure that they do not cause toxic substances to affect users' health. The container is made from 270g cast aluminum, 2 layers of unstuck glazing to prevent food from burning at the bottom of the container and easy to clean after use. The inner and outer surfaces of cooking pots are treated with electrolytic surface technology. The capacity of the container reaches 700W to help the rice mature quickly. The product used simply press the push button, the pot will automatically cook the rice and automatically turn to keep warm when the rice is cooked. Rubber food flange system ensures food safety parameters, export standards according to international standards, odorless, toxin-free .... The first amplifier panel has a compliance voltage ±12 V and a working current range from 20 nA to 100 mA. The second amplifier panel has a compliance voltage ±5 V and a working current range of 5 pA to 2 µA. Providing such a huge current range makes the PG 618 USB unique on the market. In PG 618 USB both working electrodes can be controlled independently of each other. In addition, having two working electrodes available allows to explore redox chemistry in a ring-disc configuration.
