Review During my 15+ year of teaching I have always encouraged my students to include flash cards with their learning process. Many students have their own juggling school, work and home life. The fact that these flash cards are already outcast is a great time sparing for many students. Mary Nichols, Heald CollegeI think this is the best book on the market. I use the CD-ROM for additional credits. I recommend its use. Students who use it typically achieve higher grades in exams. It seems to me that students use during leaving and play games and exercises using exams. These are very useful!
