Compared to historical data on ciflota , the 2019 metric of corporate finance magazine grew by 8.70%. The Effect magazine of Corporate Finance Magazine is Q1. The Journal impact of an academic journal is an oblique metric that reflects the average annual number of quotes that recent articles published in a journal received. It is often used as an indicator of the relative importance of the journal within its field; magazines with higher nicks are often considered more important than those with lower ones. Impact Magazine measures the average number of quotes received for a specific year (2019) from articles published in the journal in the previous two years (2017-2018). Note that the impact of the magazine for 2019 is reported in 2020; they cannot be calculated until all publications for 2019 have been processed by the indexing agency. In addition to the 2-year-old influence newspaper, the 3-year Effect journal Impact can provide additional ideas and influence factors to the Journal of Corporate Finance. Note on page 2: The impact factor shown here is equivalent to quoting an exact result and is therefore used as a substitute for the same. Citescore is produced by Scopus and may be slightly higher or different compared to the impact factor derived from the journal citation report. Please see Web of Science accurate indicator of the influence ratio of The New ™ (Thomson Reuters).
