# What is the difference between project and program management

Risk management is a process used to identify, evaluate, and analyze potential risks for an organization or project. This process allows you to develop the most appropriate risk responses. During the Risk Management course for the project, you will learn the fundamentals of risk management, as well as how to apply the risk management process in project-based settings. Risk management is a repetitive process and you'll learn how to apply key procedures that can help you maximize opportunities and minimize negative impacts on your project goals. In this course, you will continue torture through the application of risk management canvas, which is a framework that allows you to manage risk in your own environment. It will immerse yourself in the concepts of risk management and help you adopt key processes. Practical activities through the course will allow you to apply the knowledge you learn as each week focuses on an important stage of risk management. The theories and practices taught in the course can easily be applied to any project, organization or business environment. Risk management for projects is brought to you by the same highly successful development team About MOOC Project Management, and builds on risk management for projects introduced in that course. Taking this course will ensure that you have the know-how to reduce your project and organizational risk in the future. Risk Management Processes act as part of the compliance framework Use frameworks to identify, assess and analyze risks in a business context Apply appropriate risk responses Design and integration strategies to report and communicate risks to different stakeholders Use monitoring and review processes and apply Risk management as a repetitive process Get a certificate signed by the instructor with the organization's logo to verify your achievements and increase your job prospects Add certificates to your CV or continue, or post directly to LinkedInGive an additional motivation to complete theEdX course , a nonprofit organization that relies on verified certificates to help fund free education for everyone globally Project managers can work in a variety of industries – from healthcare to engineering to information technology and more. International Construction Project Management Association This group serves project managers in the construction industry by providing news on the field and an annual conference. Members of the PMI Institute of Project Management can take advantage of project plans organization's previous presence, a outline international best practice and web conferb. The Institute also offers professional certifications including Program Management Specialist (PgMP) ®, PMI Risk Management Specialist (PMI-RMP) ® and Project Management Specialist (PMP) ®. How much can I do with a career in project management? Since most industries require project managers, there are many project management roles available, especially for those with advanced degrees such as master's degrees in project management. However, depending on the role, additional training or certification in a related field may be necessary in addition to courses in project management. CAREERLOWEST 10% ANNUAL SALARYMEDIAN ANNUAL SALARYHIGHEST 10% EARNS ANNUAL JOB GROWTH 2016-2026Construction ManagerLess over $54,810 $91,370More $159,560 + 11% Architecture and Engineering Project ManagersLess coal $88,050$137,720More $208,000+6%Information Systems Project ManagerLess than $83,860$139,220More than $208,000+12%Advertising, Promotion and Marketing Project ManagerLess over $48,150 $106,130More $208,000 + 10% Training and Development ManagerLess over $59,170 $108,0250More $187,670+10%Social and Community Service ManagerLess than $39,730 64,100More $109,990+18%Source: Bureau of Labor Statistics, 2018 According to the Employment Growth and Talent Gap in Project Management report published by the Institute of Project Management, by 2027, 8.8 million jobs related to project management will be created, in part because many workers eligible to fill these positions are retiring. The exact growth trend will depend on the specific industry. The areas that will grow the most in the coming years will be health care, construction, finance and oil and gas. Obtaining a master's degree in project management will help train the staff needed to fill these positions. The degree also positions workers to increase their income potential. According to the Center for Education and the Workforce, workers with bachelor's degrees earn $2.3 million in lifetime income, while those with master's degrees will earn $2.7 million. The master of online management program management accreditationproject management is tasked with making important decisions about which contractors to use, what materials to buy and the terms of the contract for negotiation. One of the most important decisions these professionals will make is the place to train for their careers. To get the quality education they need, students should choose a school that has been recognized by the Institute for Project Management (PMI), the Business University Enhancement Association (AACSB) or the European Management Development Fund (EFMD). Schools have earned recognition from these certified institutions for their quality curriculum, research efforts, and faculty. How to pay for a master's in Management degreeMuch the work of project managers refers to finance and budget and many of them can start developing this skill when exploring ways to keep their educational costs down. Federal Financial Aid To find financial aid opportunities, students should start by completing a free application for federal student aid (FAFSA) to determine how much they can get in federal loans and grants. Scholarships from professional organizations In addition, students can receive scholarships from industry organizations. For example, the Dallas, Orange County and Pittsburgh chapters of the Project Management Institute offer scholarships to college students. In addition, the Institute for International Learning, in collaboration with the Institute of Education's Institute for Project Management, offers scholarships for this degree program. Program Scholarships In some cases, project management students can win scholarships from the school they attend. Boston University, for example, provides funding to students in its post-degree program. Program.
