## 925 silver ring with blue sapphire

If you're the type of bride looking to break tradition with your engagement ring, a sapphire engagement ring is a wonderful way to do so. Gemstones are a major trend in terms of unique engagement rings, thanks in large part to Kate Middleton who got Princess Diana's 12-carat oval blue sapphire engagement ring (complete with 14 solitary diamonds in white gold) from Prince William in 2010. Such a regal choice! Most famously associated with September birthdays, sapphires are incredibly special stones that signify honesty and loyalty and range in color from royal blue (the most famous of the spectrum) to purple, pink, yellow, green, orange, brown, black and even white. Many of the lesser known sapphire colors are incredibly rare and often designed with different sapphire shades combined to create a very distinctive piece of jewelry - perfect for women who want to defy tradition with their engagement ring. If you find yourself partial to a deep blue hue à la the Duchess of Cambridge, your engagement ring can easily serve as a perfect something blue on your wedding day. If you're all about a classic sapphire, there's nothing wrong with choosing a super-sparkly style in polished platinum, silver or gold whether it's a solitary stone, three-stone ring, accented with shimmering side stones, or enhanced with a dazzling halo. If you definitely want a traditional diamond engagement ring, but like the idea of integrating sapphires into the design, look for a ring that has just been touched with sapphires or as side stones, a halo, or a single accent stone. If you think a sapphire engagement ring is right for you, scroll through the extraordinary styles ahead. 01 of 30 Courtesy of Trumpet & Horn This Victorian-inspired sapphire and diamond engagement ring ensures that every bride gets his way.
