Looking for high-quality Math worksheets aligned with Common Core Standards for Grades K-8? Our premium worksheet bundles include 10 activities and answer the key to challenging your students and helping them understand each topic within their grade level. ----- Note: The information above will not be sent to your printer ----- Compare the two numbers to find what is less than or what is more than the other and write the missing words and numbers to complete each sentence. (the first one is done for you) Page 1 of 3: There are some examples and explanations here that you can look at to get help comparing and ordering numbers. 1. 234 570 234 is less than 570 2. 157 175 175 is over 157 3. 610,602,610 is over 602 4. 647,480,647 is over 480 5. 450,555,555 is over 450 6. 478,468,478 is over 468 7. 392,329,392 is over 329 8. 689 701 701 is over 689 9. 500 499 499 is less than 500 10. 709 907 709 is less than 907 11. 105 151 105 is less than 151 12. 770 707 707 is less than 770 ----- Page Break----- Compare every few numbers below and then use the < or > symbol to show which number is larger or less. (the first one is done for you) Page 2 of 3: There are a few examples and explanations here that you can look at to get help with comparing and ordering numbers. 1. 234 < 570 573 > 462 118 < 181 2. 593 < 953 958 < 985 484 > 448 3. 644 < 755 872 > 278 395 < 397 4. 320 > 230 430 > 429 806 < 917 5. 244 < 424 225 < <6> 252 715 > 713 ----- Page Break----- Page 3 of 4: For help and guidance, see these examples of how to find the distance between two sets of coordinates. Place the numbers below in sequence starting with the number of least value. (the first one is done for you) Page 3 of 3: There are a few examples and explanations here that you can look at to get help comparing and ordering numbers. 1. 226 215 375 215 226 375 2. 459 420 431 420 431 459 3. 895 598 501 501 598 895 4. 900 990 909 900 909 990 5. 372 365 375 365 372 375 6. 882 871 965 978 871 882 965 978 7. 491 518 419 425 419 425 491 518 8. 301 110 200 101 101 110 200 301 9. 417 327 471 327 471 417 10. 525 887 652 687 525 652 687 887 ----- Note: The information below will not be sent to your printer ----- More Compare Numbers Worksheet – At HelpingWithMath.com Similar to the above listing, the resources below are aligned with related standards the Common Core for Mathematics that together supports the following learning outcome: Understanding place value Skip Counting (From Example/Guidance) Understanding Place Value (Thousands, Hundreds, Tens, Ones) (From Example/Guidance) Place value Number cards (7 pages) 0 to 9, 10 to 90, & 100 to 900 (From Flashcard) Number Line (0 to 100 - by 5s) (with option of 1 to 8 lines/page) (From Number line) Number Line (0 to 100) - Show only 5 15, 25, 35, etc (From numberline) Number Line (0 to 100) - marks at 1s, numbers at 5s (From number line) Number Line (0 to 1000) - points at 10s, numbers at 100s (From numberline) Number Line (0 to 100) - numbers at 1s - divided into five lines (From number line) Number line - Count by 2s (0 to 50 with numbers at twos) (From number line) Numbers over 100 (five lines on page : 100 to 600) (From number line) Numbers over 100 (four lines on page: 600 to 1000) (From number line) Number line from 0 - 150 (3 lines on page) (From number line) Number line from 0 - 100 (Count by (From number line) Number line from 1 - 500 (Single page divided into ten lines) (From number line) Number line from 501 - 1000 (Single page divided into ten lines) (From number line) Number line 0 to 100 with symbols (symbols at the 1s, 5s, and 10s) (From number line) Number lines 0 to 20 & 0 to 100 (In portrait format) (From number line) Number lines 0 to 50 & 50 to 100 (marks at 1s and numbers at 10s) (From number line) From 0 to 200 points at 1s annotations at the 10s (From number line) : Ten intervals (10 per page Portrait Format) (From number line) Empty - Marks at 1s , 10s, 100s (also for decimal e.g. tithes to thousands) (From number line) Number Line: 0 to 60 (Intervals of 5) (between 1 and 8 lines/page) (From number line) Ones, Tens, & Hundreds : 16 per page (From Graph) Ones, Tens, & Hundreds : 4 per page (Of Chart) One Ten, & Hundreds (Of Chart) Place value Chart: Hundreds - with blocks for the stressed (From Chart) Place value Chart: Hundreds (Of Chart) Farm Value Arrow Maps (Small, Medium and Large Sizes) (Of Activity) Missing Numbers (From Worksheet) Numbers in Extended Shape Worksheet Generator e.g. 6,000346 = 6,000 + 300 + 40 + 6 (From Worksheet) In this unit compare and order students three-digit numbers. Students will: use the symbols < > , or = to compare numbers. How are relationships represented mathematically? How can mathematics support effective communication? How can recognizing recurrence or regularity help solve problems more efficiently? How is math used to quantify, compare, represent, and model numbers? What does it mean to estimate or analyze numerical quantities? What makes a tool and/or strategy suitable for a given task? How maths gets used to compare, represent, and model numbers? Equals: Same value as. Bigger than: Bigger ones. Less than: Smaller. Prerequisite skills were not entered into the lesson plan. Understanding Numbers up to 1000 Location Value Extended Notation Note: Video playback might not work on all devices. Instructional videos were not assigned to the lesson plan. Greater than less than symbols Greater than less than symbols Kids solve two-digit additive problems, then compare the answers using the larger than, less than, and equal to symbols in this 2nd grade math worksheet. Welcome to our Order Numbers Worksheets page with numbers under 1,000. Here you will find our selection of carefully rated order worksheets, which will help your child to put numbers in order to 999 both from smallest to largest and also from largest to smallest. We've split the sheets into two sections: the first section is easier and involves ordering numbers to 200. The second section involves ordering numbers up to 1000 in value. We also included a supporting number line sheet so that your child can try as an extension activity to position the numbers correctly on a number line. Using these basic math worksheets will help your child: learn their place value and order 3-digit numbers. These skins can be used next to the order numbers of sheets. Once the numbers are ordered, they can be placed on the number lines using these sheets provided. Using these skins will help your child to: Position numbers on a number line up to 1000. Check out a few more of our worksheets similar to this. Here's our generator for generating your own bigger than less than worksheets. Our generator will create the following worksheets: numbers up to 8 digits numbers to 3dp. Positive and negative numbers Greater than less than worksheets Below are our choice of location value, ordering and finishing worksheets The following worksheets involve different Second-grade place value activities such as counting hundreds, dozens, reading, writing and order numbers to 1000, and knowing what number each digit represents. Using these skins will help your child to: learn to count by hundreds, tens, five, two and children; teach their place value until 999; order numbers to 999. Here you will find our selection of number line worksheets for 2nd grade. The following sheets involve the correct instead of numbers on a number line. Using these skins will help your child to: count by 1s 2s 5s 10s 50s and 100s; position numbers on a number line; value up to 1000. All the sheets in this section will help your child with their understanding of numbers up to 1000. Number Line Worksheets up to 1000 Here you will find a variety of free printable Second Grade Geometry Worksheets. On a Second Grade level, children are introduced to a wider range of 2d and and start learning to rotate and rotate shapes. They are able to classify and sort two-dimensional shapes using different criteria, and they learn the characteristics of three-dimensional shapes. The following worksheets will help your child to: Identify and name a variety of 2d and 3d forms; Draw 2d forms; Know some of the properties of 2d shapes. Second Grade Geometry Worksheets If you want to try a fun ordering activity online, why not try this simple game by top markings. You can choose which totals to go up, including numbers up to 10, 100, 1000, negative numbers, and decimals. Coconut Ordering Game by Top Markings How to Print or Save These Sheets Need Help With Pressing or Saving? Follow these 3 easy steps to get your worksheets expressed perfectly! How to print or save these pages need help printing or saving? Follow these 3 easy steps to get your worksheets expressed perfectly! The Math Salamanders hope you enjoy using these free printable Math worksheets and all our other Math games and resources. We welcome any comments about our website or worksheets on the Facebook comment box at the bottom of each page. Page 2 Welcome to our 2 Digit Multiplication Worksheets page. We have many worksheets on this page to help you practice the skills of multiplying 2-digit numbers by 1 or 2 digits. We divided the worksheets on this page into two sections: 2-digit x 1-digit multiplication (3rd grade) 2-digit x 2-digit multiplication (4th grade) Each section ends with some tougher challenge sheets for more competent students. Within each section, the sheets are first carefully graded with the easiest sheets. These skins are aimed at 3rd graders. Sheets 1 to 4 consist of 15 problems; sheets 5 and 6 consist of 20 problems. Sheets 1 and 2 involve multiplying 2 digit numbers by 2, 3, 4 or 5. Sheets 3 through 6 involve multiplying a 2-digit number by single-digit numbers and finding increasingly tougher products. These 2-digit multiplication worksheets are designed for more competent students who need that extra challenge! These skins are aimed at 4th graders. Sheet 1 involves 2 digit by 2-digit multiplication by smaller numbers and responses up to 1000. Sheets 2 through 4 have harder 2-digit numbers to multiply and answers that are generally greater than 1000. These 2-digit multiplication worksheets are designed for more competent students who need that extra challenge! We have more 2-digit multiplication worksheets, including 2-digit x 3-digit multiplication problems on this page. More Double-digi Multiplication Worksheets (harder) Look at some more of our worksheets similar to this. Do you need your own long or short multiplication worksheets quickly and Create? Our Multiplication worksheet generator will allow you to create your own custom worksheets to print out, complete with responses. Here you will find a variety of multiplication worksheets to help you get more fluent and with your tables. Using these skins will help your child to: learn their multiplication tables up to 10 x 10; understand and use different models of multiplication; solve a variety of multiplication problems. All the free 3rd Grade Maths Worksheets in this section are informed by the Elementary Mathematics Benchmarks for 3rd Grade. Here you'll find a variety of free printable multiplication games to help kids learn their multiplication facts. Using these games will help your child learn their multiplication facts to 5x5 or 10x10, and also to develop their memory and strategic thinking skills. Multiplication Math Games How to print or store these skins needs help with printing or storing? Follow these 3 easy steps to get your worksheets expressed perfectly! How to print or save these pages need help printing or saving? Follow these 3 easy steps to get your worksheets expressed perfectly!
