Use this calculator to convert any value in cm to feet and thumb. One meter is a length of lasting and equals about 3.28 feet. One foot equals 12 inches exactly. If you need to be super precise, you can use one meter = 3.2808398950131 feet. Once it's very close to 3.28 feet, you'll almost always want to use the simpler number to make the math easier. Step 1: Switch from meter to feet 1 meter = 3.28 x feet, so, 1.72 x 1 meter = 1.72 x 3.28 ft, or 1.72 meters = 5.64 ft. Step 2: Convert the decimal feet to inches an Answer like 5.64 feet can't mean much to you because you might want to share the decimal, which is in feet, inches once it's a smaller unit. So, take everything to the decimal point (0.64), then multiply it by 12 to turn it into inches. This works because one foot = 12 inches. Then, 5.64 feet = 5 feet + 0.64 ft. Once 0.64 ft x 12 = 7.68 inches or 5.64 ft = 5 feet and 7.68 inches. Obviously, that equates to 1.72 yards. Step 3: Switching from decimal inches to a comfortable fraction of inches The previous step gave you the answer in decimal inches (7.68), but how to measure it in a ruler or tape? See below a procedure, which can also be made using a calculator, to the decimal thumb to link to the nearest comfortable hernia: a) Pull 7, the number of whole inches, inches, 7.68:7.68 - 7 = 0.68. That's the fractional part of the thumb value. b) Multiply 0.68 times 16 (it can be 8, 16, 32, 64, ... depending on the exactly you want) to get the number of 16th's inches: 0.68 x 16 = 10.88. That's the number of 16ths of an inch and also the numerator of the fraction that can still be reduced. c) Round the result to nearest integer: round (10.88) = 11 Final, 1.72 meters = 5 feet and 11/16 of an inch. In short: 1.72 m = 5'7 11/16(*) (*) This result may differ from the calculator above because we assumed that 1 meter equals 3.28 feet instead of 3.2808398950131 feet). You can use this table to find any value in feet, in inches or in feet plus inches when you know the value in centimeters. This is an alternative to the converter above.
