## Renew avast free subscription

Vast antivirus is available in two versions which is, for a fee and free of charge, for all its antivirus products. Evn free antivirus programs require a renewal every year and no money is asked for in return. However, if you want full apps like Avast Pro Antivirus and Avast Internet Security, you are prompted for a renewal payment in exchange for another year of service. In this post, we will discuss the process of renewing paid versions. If you have any other questions related to your subscription or any other questions, call Avast Support Number UK to get in touch with experts for immediate guidance or guidance. Let's move on to renewing your paid Avast antivirus subscription:First of all, visit the official home page of the Avast website and then click on the Avast app you want to renewNow, select your plan from 1-year, 2-, or 3-year renewal plans. There is also an option to purchase renewal for more than one computer by simply clicking on the More PC option. Next, select the number of computers and the duration of the license. Now, click the Add to Cart option, and then enter order details such as email address and contact information to complete the payment process. You can make the payment by credit card or PayPal. After making the payment, Avast sends a confirmation email to your inbox about the order you placed. Open the email message, and then save the attached file to your PC's hard disk. Go to the desktop, and then click the small arrow that appears just next to the clock in the taskbar to open the taskbar. Then, right-click the Avast icon to select subscription information At the end, click the Insert License File button and navigate to the folder that contains the license file. Now, select the file, and then open it. The file will be ready by the Avast to complete the subscription renewal for the selected duration. By following these steps, you can easily renew your Avast subscription, and if you don't renew your antivirus software, your computer will be open for online hackers and viruses.
