Today's ShowHide content table, video editing is simpler and faster thanks to advanced editing apps on smartphones. Kinemaster is a name that is all very familiar to Android users. It is even integrated with a range of devices such as Xiaomi Redmi. However, Kinemaster is not what I want to mention in this article. Alternatively, you can try VivaVideo, one of the video editing apps with many prominent features. VivaVideo has won many awards and has become the most popular app for many years. Still under development, add new features so that users can edit and customize videos the way they want. Choose Vivavideo or Kinmaster? Actually, there's Many comparisons between these two video editing applications. But we all understand that each application has a different use, tailored to each user's requirements. So the comparison is not really enough. But there are also some highlights that you may already know. VivaVideo has a more detailed editing toolkit. At the same time, the application emphasizes aspects of quality. You can export edited video in Full HD, 2k and even 4K. Kinemaster is also the simplest to use. But it still gives you all the features you need to make your old video more unique or in any style you can think of. Previously, the video editing software was not great. Most users want to customize video, they should use Photoshop, a powerful editing software, but it requires a lot of complex manipulation and experience to work with it. But now video editing has been greatly simplified when VivaVideo is released. The app offers a lot of tools, allowing you to make review videos, short movies or slide shows directly on your Android device. Simply drag, drop and select effects, you will quickly have a full video with many beautiful effects. VivaVideo offers professional space, with a set of tools arranged in categories at the bottom of the screen. You can change the speed of video playback only by dragging and projecting, which ranges from 0.2 to 4. You can also add blur effects, transitions or adjust the brightness accordingly. In addition to editing, VivaVideo has been selected to add music, photos, video subtitles and short films. Discover funny filtersOne of the features that people care about when using editors is color filters. These filters will quickly change the original video style, replacing it with new colors and effects. FX filters with popular themes such as texture, dynamic, dream, Romanian or overlay. Effects filters with favorite themes such as cinema, bugs, split, VHS and Magic Mirror. In addition, there are many other free topics such as Gouache, Morandi, Kira, 3DLUT, .... To choose from. Most of all, they are provided free of charge in the resource category. Find them and choose your favorite style. Looking to create short videos to preserve memories?
