The FlagView HistoryThis page contains a list of codes, codes, Easter eggs, tips, and other secrets for Little Fighter 2 on PC. If you've discovered a scam that you want to add to your page or have a fix, click edit and add it. To create a really strong, consistent attack, go to the game data file.txt. Make a copy firen_ball.dat. Then change bat_ball.dat to bat_ballz.dat. Then change firen_ball.dat copy to bat_ball.dat. (unverified) This is a hack, so first reassch back up the original file. Find the data .txt the game directory. Open it with Notepad and search for strings: id: 200 type: 3 file: datajohn_ball.dat id: 201 type: 1 file: datahenry_arrow1.dat id: 202 type: 1 file: datarudolf_weapon.dat id: 203 type: 3 file: datadeep_ball.dat id: 204 type: 3 file: datahenry_wind.dat id: 205 type: 3 file: datadennis_ball.dat id: 206 type: 3 file: datawoody_ball.dat id: 207 type: 3 file: datadavis_ball.dat datahenry_arrow1.dat id: 208 type: 3 file: datahenry_arrow2.dat id: 209 type: 3 file: datafreeze_ball.dat id: 210 type: 3 file: datafiren_ball.dat id: 211 type: 3 file: datafiren_flame.dat id: Type212: 3 file: datafreeze_column.dat id: 213 type: 1 file: dataweapon7.dat #ice_sword id: 214 type: 3 file: datajohn_biscuit.dat id: 215 type: 3 file: datadennis_chase.dat id : 216 type: 3 file: datajack_ball.dat id: 219 type: 3 file: datajan_chaseh.dat id: 220 type: 3 file: datajan_chase.dat id: 221 type: 3 file: datafirzen_chasef.dat id: 222 type: 3 file: datafirzen_chasei.dat id: 223 type: 3 file: datafirzen_ball.dat id: 224 type: 3 file: databat_ball.dat id: 225 type: 3 file: databat_chase.dat id: 226 type: 3 file: datajustin_ball.dat id: 228 type: 3 file: datajulian_ball.dat id: 229 type: 3 file: datajulian_ball2.dat These are strings that affect attacks that everyone performs. Attacks can be changed by changing these strings, for example: Change string ID: 200 type: 3 file: datajohn_ball.dat to id: 200 type: 3 file: databat_chase.dat John will shoot the bat instead of its purple blast. You can change any of these strings in this way but I recommend you change the string ID: 211 type: 3 file: datafiren_flame.dat to id: 211 type: 3 file: datajohn biscuit.dat or id: 211 type: 3 file: databat_chase.dat It should be noted, that you can only change string ID: 201 type: 1 file: datahenry_arrow1.dat to id: 201 type: 1 file: datarudolf_weapon.dat and vice versa Uploaded by Ben Erion (ben.owns.all)Unverified. Enter lf2.net the main menu. You need to type the normal fullstop not the one on the numeric keypad/calculator. Find the data .txt the game directory. Turn Rudolph into Freeze/Firen Permenently: -- Uploaded by IceFlame First, chose Rudolph with one team 1 along with Firen or Freeze, followed by the opposite what you chose in another team in the singular. (Make sure you have control over all people when you do it for the first time, first, it's a little hard to pull, NOTE: If you want it to work properly, make Rudolph's colleague in the rift past Rudolph and his enemy behind him, alternatively, if you want a lot of clones of the firzen, do it in the opposite direction around) If you want to go faster/easier also type the lf2.net on the character screen, but don't use any of the hidden characters. No computers, only Rudolph, Freeze and Firen. Ok, when yours to play, use rudolph to attack Freeze/Firen on the other team, and then transform into them (Grab using Def when they're cringing, then Def, Jump, Attack to transform), now get a new Freeze/Firen (Rudolph) to run in other teammates (i.e., both running) and making a firzen, now that you tranfrom back, Rudolph will be stopped as freezing permenently even after the game is over and returns to the character screen. Alternatively, if you put rudolph in front of your teammate on the character screen, you turn into a firzen and firen will disappear, then you will be able, instead of splitting back into firen and freeze to transform rudolph, make a few clones then transform back and all clones will firzen. Note: For the first time, there is no need to catch people to transform, you can switch between characters at will by pressing Def, Jump and then attack. Enjoy! POWERFUL NINJA: ------------------ Uploaded by: Yohit First make a copy of rudolf_weapon and paste it somewhere, then do the same to julian_ball2 & rename the julian_ball2 as rudolf_weapon. You have a super-powered rudolf. Go check it out. How to replace louis louisex: ------------------------------ Uploaded by: Elfvin Its easy, go to the local drive, then click on littlefighter2 and then go to the data space. Find the file name louis and louisEX. Copy these files to another location, replace their names, and replace those files with their old ones. THen u get louisex instead of louis... Smart aye? XD Davis Tips: ---------- Uploaded by: tinyfighters * Use infinite MP (F6) and you need 2 davis. One makes a dragon strike and the other hits the dragon when it almost collapses. Repeat. * When Davis finishes a set of punches and knocks down the enemy, quickly press jump + attack and he will hit the enemy back to the floor. * After using shrafe, do a dragon punch when it knocks the enemy into the air. Deals a lot of damage and can drain half of your opponent's PZ. * When you fire energy balls, make them up close. The enemy has less chance of defending it. * Davis run-attack is good if there is more than 1 person fighting with you. Template characters: -------------------- Rename file rudolf_weapon.dat to julian_ball2.dat and julian_ball2.dat. Then, play as Rudolf and throw a few shurikens. They will now be Julian, with purple things overhead. They will also be very strong. Note: This will make Julian harmless shurikens and leave shurikens that will harm anyone who touches them. In addition, this leaves a shadow that will not disappear until the end of the round. Change characters: ----------------- Uploaded by: Firzen Go to the drive where LF2 is located, then go to spirtes, then go to sys. Now select someone you want to change. EG Rudolf. And I want him to change into... Gunman. (Rudolf will not have bandit moves) Now take Rudolf to the desktop. Now look for pic bandits. Change the name (nothing else) to rudolf (not with capital). Find a preview of Rudolf and download it on your desktop as well. Finally change the Bandit preview to rudolf (e.g. bandit_l.bmp=rudolf_l.bmp), then change the rudolfs real one to the bandits and hold it back. Create a new folder in the Data folder. Then copy the original template file .dat the folder. Then copy the other data for the desired character (for example, julian.dat) and rename it to :template.dat. Once you've done that, you'll have two figures julia. You can do this as many times as you want to change into different characters. Change firzen_ball.dat to john_biscuit.dat and john_biscuit.dat to firzen_ball.dat. When you do this, play as Firzen and press [Defend], [Left] or [Right] and [Jump]. If done correctly, Firzen should be shooting John's purple guiding biscuits. Note: This will make John shoot one of Firzena's yellow things when you try to make a biscuit.
