Math with gonzales

Hello! I am a visiting scholar at the Institut des Hautes études Scientifiques in Paris, France. Previously, I was a Visiting Postdoctoral Fellow at the Max Planck Institute for Mathematics (Bonn, Germany), Sabanci University (Istanbul, Turkey), IHES (2012) and Galatasaray University (Istanbul, Turkey). In August 2011, I received my doctorate in mathematics from the University of Western Ontario (UWO, London, Canada) under the direction of Lex Renner. My research interest lies in the interaction between algebraic topology and geometry. In particular, I apply the GKM theory (named after Goresky, Kottwitz and MacPherson) to the study of spherical varieties. I am particularly interested in normal projective embedding of reductive groups. In particular, these compactifications can be obtained as projectivizations of reductive monoids. In my dissertation I provide a complete combinatorial description of the equivariant cohomology of rationally smooth embeddings (a subclass containing smooth and certain singular varieties). My results greatly increase the effectiveness of GKM theory as a tool in embedding theory. In my current work, I determine the GKM theory in the context of equivariant chow rings (with rational coefficients) and equivariant K theory (with integer coefficients). In addition, I describe the equivariant operational chow rings of spherical varieties as two modules of their corresponding equivariant chow groups. These results build on previous work by Brion, Fulton, Kimura, MacPherson, Payne, Sottile and Sturmfels. You are cordially invited to read my MPIM report and my forms in arxiv for more details! Copyright © 2011-2020 Regents of the University of California Hello Parents, Students and Caregivers. Welcome to the school year 2019/2020. I'm looking forward to a great year and looking forward to meeting you all on Back to School Night, which is on Thursday, September 6. Please log in to your child's Google classroom weekly to see what we do. If you want to be added as a guardian, you can sign in to BTSN or send me an email and I can add you. I will distribute some of our documents in this way. You don't have to print anything. Please let your child do his or her work in a mathematical diary (a spiral notebook or composition book - your choice). Math 7 Textbook: Big Ideas www.bigideasmath.com. Accelerated textbook: McGraw Hill connectED. Trimester 1 : Progress Reports = 10/11 End trimester 1 = 11/15 Trimester 2 : Progress Reports = 1/17 End of Trimester 1 = 2/28 Trimester 3 : Progress Reports = 4/17 End trimester 1 = 6/4 Google Classroom Passwords: 2. Period: Period: (Lowercase letter l) 3rd period: j0a82 5th period: 56t7up 6th period: xhc3x7 7th period: pja5osi dear parents, if you want to buy supplies for our class, we can always use pencils and fabrics. That would be awesome! I will also post videos for teaching on Google Classroom. I use one of these links to check on your student's progress: (ParentConnection) (StudentConnect) received this link from a student. Look at it! Algebra Calculator - MathPapa Use this link to split integers: this link to split fraction: recipes: this link for additional practice for concepts taught in 6th grade. Classroom Rules Expectations for Student Homework Scoring Homework Policy Do you want to repeat a test or quiz? Behavioural standards strategies for success The best way to learn is to correct your own mistakes. After Passing a test or quiz, they have students copy the answers to the problems they've done wrong. Then they do the work necessary for homework to understand their mistakes. They are also expected to write a sentence for every problem they were wrong and explain what they have done wrong. Then the parents have to sign the test or the quiz. If a student needs help with corrections, they can work with me at lunch or after school. You can also ask questions in class. Please encourage your child to make the necessary corrections so that they can understand the material so that we can move on to more difficult concepts. There is a Google document titled Tips for Success in Mathematics. I hope you can find it useful! The link to view it is: first: area of a circle video: second: area of a circle video: The grading policy for Accelerated is 80% tests and quizzes and 20% homework and class work. 4176 Campus Drive - William E. I specialize in A&P, pharmacology, dosage calculations, human pathogens and biology at high school/college level. I am also adept at elementary mathematics and science and have been a substitute... Read more I am a Doctoral student and I have taught mathematics (calculus and algebra) for more than 14 years. Read more The moment of the light bulb, the moment when a student understands new material, brings me great joy. I am passionate about finding ways to help students understand and understand the material they are struggling with. I am a certified teacher in my 13th year of teaching and have an MEd in Curriculum & Instruction: Read &... Read more Current, I Tutor Primary School Mathematics already in 2nd grade. I am also currently working with middle-aged children in mathematics (including pre-algebra). I specialize in common core mathematics and traditional mathematical skills. Read more I'm Brian.

I've always enjoyed maths. I got my bachelor's degree in engineering and mathematics. I remember how some of the math classes were difficult at first, but that repetition made the concepts easier. I plan to use examples and repetitions to help students.... Read more Hello! My name is Anna and I graduated from the University of Louisiana in Lafayette with a bachelor's degree in General Studies. I chose it because I was interested in so many different areas, especially history, political science and criminal justice. General Studies allowed me to bundle all these and... Read more ... they could be sure that the task ahead will be accomplished with proven results, which makes them very proud of their child(s) and their elevated reading and math scores. When the child(ren) see and know that their grades have improved, the smile on their faces will come along with increased confidence, knowing that they... Read more In my subjects (physics, maths), it is essential for students to get to a point where they are able to solve problems themselves to understand how to approach a variety of potential exam questions when the time comes. As a physics major, I use a lot of maths every day. I... Read more I'm a Student at Grand Canyon University Studying Autism Spectrum Disorders. I have been teaching 4th grade mathematics and science in the last two years of school. In the summer, I work with 2nd and 3rd grade in a STEM enrichment camp, which is a joy. Maths and science are my favorite subjects... Read more In the past I have Babysat, Nannied, and also a reading friend to help read confidence at Westdale Heights Academic Magnet School. I have completed my math courses for my elementary math part of my studies and am currently helping 4 children at Brusly Elementary. In the I have... Continue reading
