About my friend Pedro When people ask me why I love this game so much, I tell them just one word : slow motion. It's hardly the only shooter that you can find today online that has a slow motion feature where you can do awesome stunts, kill enemies like a movie hero and still play an interesting game. So before you start playing let's find out some useful information about the game. My friend Pedro is a shooter with a little dark graphics and nice gameplay. At the beginning of the game you need to fill out a small tutorial where you will find out how to control your character, how to activate slow motion and many other things. According to the plot, you follow your friend who is invisible but has a banana to show you where he is. He will guide you and give you advice on how to jump from wall to wall, how to get new weapons and so on. Another thing why I love this game is different weapons. During the game you will unlock a lot of different weapons, some of them are strong enough to fight with multiple enemies at the same time. You can even get double weapons to do an awesome badass stunts and headshots. Your primary mission in the game is to stay alive and reach the finish line.
