Witchery spectral dust

in: Witchery, Items, Incomplete Models Edit Reviews Share Spectral Dust is released when a Spectral Family member is killed. It can also be discarded when other undead are killed with an Arthana, although the chance is very low. Use[edit | edit source] Witchcraft items Community content is available in CC-BY-SA unless otherwise noted. From Feed The Beast Wiki The Spectral Dust is an item of the Witchery mod. This item is used to make graveyard dust (used in the Death Summoning process). Spectral Dust can be obtained by: 24.193 ARTICLES ON THIS Spectral Dust Wiki is an item added by the Witchery mod. It is discarded by Spectral Relatives, or as a rare drop of regular undead when using Arthana. Use[edit] Spectral dust can be used to create the following items: Brew of Reflect Damage Graveyard Dust Video[edit] This article is a stub. You can help us by expanding it Witchcraft is a mod created by Emoniph that adds a number of mechanics related to witchcraft. The main disciplines of Witchcraft include: Circle Magic, Brews and Infusions, Poppets and Dream Weaving. Potions. Witches Oven The witches oven is an item added by Witchery and is like a normal oven (you can smell wood in charcoal), but you can create different potions. This is a good way to cook food or smellwood because it cooks food 10% faster than a normal oven, but you can't smell ores. To offer it you need to have 1 empty bucket, 1 iron bar and 5 iron ingots. You place the bucket in the middle top slot, the iron bar in the middle bottom slot, and the iron ingots in the form of an iron helmet in the empty slots. Put a piece of raw food in the oven to maybe create a dirty smoke Put logs on it to maybe get a change of oil Put an oak seedling to possibly get an exhale of the horn put a birch seedling to create a chance to get a breath of the goddess Put a supple seedling to maybe get a spawn tip Put a rowan seedling on it to possibly get a magic whiff Put a change of hawthorn to perhaps get an odor of purity Put a seedling of alder in the oven to maybe get a smell of misfortune Put a jungle seedling in the witches oven to possibly get a dirty smoke Remember to put a clay pot in the bottom slot of the oven to get a potion. To create a clay pot you smelled a soft clay pot in a furnace. A soft clay pot is made with 3 v-shaped clays. Oven update To upgrade the witch oven you need to place a smoke funnel or filtered steam funnel to the left or right of the oven. To create a smoke funnel you need a lava bucket, 4 empty buckets, 2 buckets of iron, iron bar and 1 block of shiny stone. You place a lava bucket in the middle top slot on the creation grid, place a shiny stone block in the middle slit, an iron block in the lower two corners, then you place an iron bar in the middle bottom band and finally fill the final slots with empty buckets. This adds to the oven a one faster cooking speed and a 25% better chance of getting the other item. To create the filtered steam funnel you need a smoke funnel and steam filter. Just place them on the creation table (the smoke funnel a slot above the filter.) To create the smoke filter you need 2 iron ingots, 6 glass blocks and 1 finely tuned loaded stone. You place the glass blocks on the top line and on the bottom line. The iron ingots go to the left and middle right middle slots and the loaded tuned stone goes into the remaining slot. To load a finely tuned stone (made with a smell of magic, then below the grid of creating a diamond and below that a lava bucket) you must use a rite of charge, which is obtained by the magic of the circle. You can watch the video on the page or create the book Witchcraft: Circle Magic. It is created by a book in the middle of a Belladonna above him a feather on the right a smell of magic below him and a bag of paint to the left. The filtered steam funnel is an upgrade to the steam funnel and increases the chance of the extra item by another 5%. Thus, the total effect of the two updates would be +10% cooking speed and +30% chance of the extra item. Distillery The distillery is another item added by the witchery mod used to distill magical items. This is made with 4 iron ingots, 2 clay pots, 2 gold ingots and 1 finely tuned stone. You place (on a breeding table) the 2 clay pots in the top two corners, the gold ingots on the two lower corners, the finely tuned stone in the lower middle slit, and the iron ingots in the remaining empty grooves. Once created, you need to place it at least 15 blocks away from a fully functioning altar. To create 3 blocks (you need at the end 6 in a 2x3 pattern) you need 1 puff of goddess, 1 exhaled horn, 1 bottle of water, 4 stone bricks and 2 rowan toras. You put the exhale of the horn in the upper right corner, the goddess blow in the upper left corner, the water bottle between them, the rowan wood in the two grooves below the water bottle and fill the remaining space with stone bricks. Do this twice put it in a 2x3 pattern and place the distillery near the altar (no more than 15 blocks.) Recipes Put In Get Out Foul Smoke and Quicklime Gypsum, a lola and vitriol oil Diamond and Vitriol Diamond Vapour x2 oil and an odor of purity Goddess Breath and lapiz lazuli Goddess Tear, smell of magic, dirty smoke and a slimeball diamond vapor and a ghastly tear Odor of purity, smell of misfortune, dirty smoke and refined evil Ender Pearl Ender Dew x5 and smell of magic dust and dust glowstone of dust and smell of misfortune Demonic heart and steam diamond Demonblood x4 and Altar badly refined The altar is an object that feeds magical things like the distillery. If you put it in an area with many living beings it will enjoy it with more power to work. The configuration instructions setup in the Distillery section, so if you haven't looked at it do. If you right-click the altar, it will show how much energy you are producing. Video Start with the Witchery mod There is useful information about Spell Casting and mystic branch in this video, starting at 8:30. Model:Atack of B-Team Hey fellas, very late game player on a server, and I'm trying to put a lot of effort into fetishes / witchcraft death items. I was wondering if anyone found a reliable way to get spectral dust in the amounts needed to actually summon a lot of the undead? Page 2 14 comments
