Periodic updates may be required to keep your speaker compatible with products released after your speaker's manufacturing date. All details and instructions are appeared below. For more information, see our FAQ 300 MHz processor (1 GHz for Vista or Windows 7) 32 or 64 bit 128 MB RAM (Windows XP); 512 MB (Vista Home Basic); 1 GB (other Vista editions and Windows 7 32 bit); 2 GB (Windows 7 64-bit) Internet Connection 30 MB available hard disk space USB 1.1, 2.0, or 3.0 port First, download the Bose Bluetooth® speaker update application on your computer. Note windows users: If you have multiple user accounts on your computer, you may be prompted to enter administrator credentials to run the application. Once downloaded, the application will ask you to connect your speaker to your computer with a micro USB cable. Please make sure that the SoundLink ® speaker is plugged in using the AC power adapter before running the update application. In the File Download window, click Run or Save As Run, follow the directions to perform the update If save, select a location for saving the file (Bose_BLUETOOTH_Speaker_Update.exe). Then start the application from your hard disk and follow the directions to perform the update. Wait for your computer to download the file. This will appear on your desktop if a hard disk icon is to open a Window. Drag the update file to the desktop as shown. (If the window does not open, double-click the icon.) Start the update application from your desktop and follow the directions to perform the update. This application allows for a simple, immediate software download directly to your computer and in the SoundLink ® speaker. Periodic software updates may be required to keep your SoundLink ® which is compatible with mobile devices released after your speaker's manufacturing date. Yes. The computer or Mac used for the update must meet the minimum system requirements found on the download site. You can use any USB to micro-USB cable you may have, usually provided with a digital camera or GPS. While the application is running, it will create and use temporary work files. When the application is finished and closed, it will remove all temporary work files, warding behind the driver and the downloaded application file (Windows machines only). The application file can be deleted from your computer after the update is complete, but we recommend installing the driver on your computer to make future upgrades easier. The update can take as long as five minutes to complete. WHEREVER YOU GO BRINGS BETTER SOUND. Evil portable Bluetooth ® is designed to keep up with your busy life and designed to make your music sound amazing. Find the perfect speaker for your outdoor adventure You have selected the maximum numbers of items (4) to compare. Maximum of 4 items reached You can only compare similar products.
