Hotspot Shield VPN for Android offers Wi-Fi security, Internet & online privacy as well as access to blocked content & apps like Facebook, Netflix, BBC, Skype and YouTube. Activate with 1 single click and you'll be safe. General feature content AutoShield: Unsafely detects Wi-Fi to automatically enable HTTPS protection, and it automatically unblocks content when you open specific apps or websites. At other times, VPNs are kept off (currently, this feature is available to a portion of users only) Full protection: Encrypts traffic in and out of your device for ultimate privacy Secure your Wi-Fi connections with bank-level HTTPS encryption; your Wi-Fi network may be vulnerable even if the device is safe Prevent hackers from stealing your private information Mask your IP address to surf the web privately & anonymously switch countries with ease; dedicated servers in the US, UK and Japan Unblock websites or apps such as Facebook, YouTube, BBC, Netflix and Hulu at work, school, while traveling or even via airplane Wi-Fi spots Give unlimited access to mobile VOIP and messaging services like Skype and Viber around the world Acting as a proxy, but with richer functionality Hotspot Shield ELITE Features Private browsing Unlimited bandwidth Virtual location Use on multiple devices Ads free ★★ ★ MOD Lite ★★ ★ Language: a Platforms: arm7+, x86 + PREMIUM received: unlimited access, no ads Deep optimized graphics and usage resources The work of analysis is blocked, thoroughly Change is uninvoliated from Google Services Hidden connection quality Assessment Dialog Signature Modified Screenshots Downloads Hotspot Shield VPN Business/Elite v8.2.1 / Mirror Hotspot Shield VPN Business/Elite v8.2.0 / Mirror Hotspot Shield VPN Business/Elite v7.9.0 / Mirror ModLite Hotspot Shield VPN Business/Elite v6.6.1 build 66100 ARM / Mirror Hotspot Shield VPN Business / Elite v6.6.1 build 66100 x86 / Mirror The Internet is a wonderful place with endless knowledge and connections for all people to free access, regardless of your personal background. However, with the current state of blocked accesses and content restrictions, it is quite difficult for Internet users to fully explore the online world. That's why many people try to circumvent these access restrictions with VPN services. But it's not easy to find a good VPN service provider that can provide great services, reliable security and consistent Internet performance, especially for smartphone users. So you will definitely find yourself happy with this awesome VPN app from AnchorFree GmbH. Here, with Hotspot Shield Android users can bypass the internet restrictions and and from their providers or the targeted website to enjoy their full access to the online world. Feel free to connect whenever you want and where you can. But most importantly, the secured connection will ensure that you can enjoy the VPN experiences to the full. Learn more about the great Android app in Hotspot Shield with our reviews. So basically, VPN (Virtual Private Network) is a personal connection that was provided by certain service providers with unique setups and mechanics to make it impossible for your ISPs to track your activities or make their blocking effective. This gives users access to the Internet via a much more secure channel without anyone to track your progress or prevent you from going where you want. And with Hotspot Shield, Android users can now enjoy their full anonymity when trying to access the internet. No one can follow your activities, and you'll have full access to most of the restricted content on the hidden sites. Feel free to explore the completely uncensored internet with this app on your mobile devices. Like VPNhub, with many of its useful VPN features, Hotspot Shield will give you access to the completely uncensored internet while protecting you from unwanted threats. If you want to start using the app, you can easily download and install it from the Google Play Store without having to pay anything. And instantly you can make use of the basic VPN features in Hotspot Shield with the free app, and occasionally, find yourself seeing some ads. To enjoy the completely unlocked experiences in Hotspot Shield, you can also use all the available features in the app, it is also possible for you to make a full subscription to the services with minimal payments. And since the nature of VPNs is that we'll go into a longer route to prevent others from tracking our activities online, it will also take longer for you to connect, despite the high-speed connection you are your service providers. So make sure you use a stable internet connection to enjoy the most comfortable experiences with Hotspot Shield. Here are all the great features that the app has to offer: To begin with, for those of you who need a fast and accessible experience with their VPN connection, you can completely enjoy the amazing mobile app hotspot Shield. Here you can pick up the free VPN service and connect to the blocked content whenever you want. It wouldn't take long before you can find yourself completely immersed in the awesome world of internet. Get rid of the geo-restricted content! Med Hotspot Shield, there won't be any annoying get-restricted content to block your access to global media, news, social networks and more. You will find yourself completely in control of your information and will never again be of the fake media. Explore Explore with a complete view of multiple perspectives to enjoy the amazing internet. Now you can watch your favorite movies, watch certain sporting events, read newspapers or enjoy your favorite social networks without finding yourself being bothered by the annoying ISPs. And at the same time, always have you protected from those annoying trackers, hackers, and even stalkers who are trying to learn your personal data and information. With Hotspot Shield, you can easily configure certain security metrics to protect yourself from the creepy followers and keep your personal data secure. Feel free to hide your IP address, pick up your complete anonymity to freely surf the internet, protect yourself from potential hacks, and more.
