We have detailed notes organized by US History entities working with the latest AP US History guidelines. Read on for help with AP US History and learn how to prepare the test. 2020 AP Test Changes due to COVID-19 Due to covid-19 coronavirus pandemic, AP tests will now be held remotely, and information on how it will work is still under development. Stay up to date with the latest information on test dates, AP online review, and what it means to you with our AP COVID-19 FAQ article. What are the new AP's U.S. history guidelines? The AP US History course has undergone a few revisions in recent years. First, APUSH was revised in 2015 to focus more on developing students' skills to understand history rather than just remembering concepts and dates. (This update was controversial, you can read a summary of the controversy here if you are interested.) The guidelines for history were revised again in 2019 to refine the competency-based requirements introduced by the College Board for a few years We will briefly break down these new 2019-20 guidelines before entering the chronology of U.S. history and notes. AP US History has three broad learning goals: Historical thinking skills (basically how to analyze what you learn) Reasoning processes (historical thinking skills) Thematic learning goals (themes to look for in each period covered by AP US History) APUSH is now also divided into nine units, each corresponding to a specific period. We'll quickly go over the three learning goals below so you know what to look for when digging into AP US History notes, which are arranged chronologically by device/time period. You can read the complete description of the new guidelines here if you are curious about AP U.S. history changes. The 6 Historical Thinking Skills for AP US History AP program wants to help American history students develop historical thinking skills, rather than just having them recall a series of facts about a particular place or time period. Especially since AP U.S. History is notorious for requiring students to remember tons of dates, facts and names, the current curriculum aims to develop history skills so that the course is not mostly memorization-based. Each APUSH exam question will test one or more of these skill-based goals as well as one or more of the thematic goals. So keep these skills in mind as you go through chronological notes. Your AP US History teacher should work on these skills with your class. If they are not, we recommend getting a prep book that will review the skills in detail and show you how to demonstrate them in essays. Now let's look at each of these skills in detail. Skill 1: Developments and processes Students should be able to identify important historical concepts, developments with significant historical effects and historical processes. Skill 2: Sourcing and situation This skill is about understanding historical sources. Students should be able to distinguish between primary and secondary sources and also be able to identify where a source came from, the source's perspective, its intended target group and its purpose. In addition, students should learn to examine the reliability of a source and understand how the source's perspective affects how it can be used in historical interpretation. Skill 3: Requirements and evidence in sources Students should learn to analyze arguments in primary and secondary sources. This includes identifying a source's claim, extracting its documentation and assessing the quality and persuasion of the argument. Students should also be able to explain this process, especially when comparing two different sources. Skill 4: Contextualization With this skill, students learn to describe and analyze the context of various historical events, developments, and processes. Yet is that students should be how to place a particular historical event within its broader historical context. Skill 5: Making connections Using historical reasoning processes (which we come to in a moment), students should know how to analyze patterns and make connections between historical developments and processes. Students should also be able to explain these connections and their consequences. Skill 6: Reasoning This skill is about developing and defending an argument. Students should know how to make a historically sound claim, use historical reasoning to make a point, and back up this point with evidence. Students will also learn how to confirm, qualify, or modify an existing argument. The 3 reasoning processes for AP US History These reasoning processes are new to the 2019-20 APUSH update, and they help strengthen the new skills-based approach to U.S. history. These three reasoning processes are tools that students will learn to use to develop a historical thinking mindset that allows them to intellectually engage with historical subject matter. Reasoning process 1: Comparing Students should develop the ability to make logical and accurate comparisons between different historical developments, periods and processes. This involves selecting similarities and differences, explaining them and linking them with greater historical significance. Reasoning process 2: Causation With this reasoning process, students should learn to distinguish, describe and explain the causes and/or effects of various historical developments and processes. This includes explaining the relationship between events, understanding the differences between primary and secondary causes, and describing the short- and long-term effects of events. In addition, students should be able to explain how relevant context influenced a historical development or process and discuss its significance. Reasoning Process 3: Continuity and Shift Students should learn to identify, describe and explain patterns of continuity and change over time. In addition, students should be able to explain the relative historical importance of specific historical developments in relation to larger historical patterns, developments and/or events. Have you ever heard the term missing the forest for the trees? The same goes for here- the AP program doesn't want you to remember a lot of years and names without understanding the greater relevance of them. The 8 Thematic Learning Goals for AP U.S. History Beyond just the basic facts of U.S. history and broad historical thinking skills, the AP program wants you to gain a bigger picture understanding of major themes and developments across U.S. history, just as you would in a college course. The aim is to be able to connect these themes between periods in U.S. history and be able to discuss them in an essay. As we get into the concept of which breaks down APUSH by time periods/units and where we link to notes, think about these themes and see if you can connect them to the outline notes. These are important themes to track throughout your AP US History studying! Theme 1: American and National Identity (NAT): How and why definitions of American and national identity and values have evolved, including citizenship, constitutionalism, foreign policy, assimilation and American exceptionalism Theme 2: Work, Exchange and Technology (WXT): The factors behind the development of systems of economic exchange, especially the role of as technology, economic markets, and government Theme 3: Geography and Environment (GEO): The role of geography and both the natural and human-made environments on social and political developments in what would become U.S. Theme 4: Migration and Settlement (MIG): Why and how the different people who moved to and within the United States both adapted to and transformed their new social and physical environments Theme 5: Politics and Power (PCE) : How different social and political groups have influenced society and government in the United States , as well as how political beliefs and institutions have changed over time Theme 6: America in the World (WOR): The interaction between nations that influenced North American history in colonial times, and on U.S. influence on world affairs Theme 7: American and regional culture (ARC): How and why national, regional and group cultures evolved and changed, as well as how culture has shaped government policy and economy Theme 8: Social Structures (SOC): How and why systems in social organization develop and change as well as the impact these systems have on the broader community AP U.S. History Notes by Unit and Time Period AP U History Course are organized by entities, or chronological periods, as well as the historical skills and themes described above. In other words, this is your basic first A happened, then the B, then the C structure that you're probably used to from previous history classes, as well as the specific dates, names and events of the story. After all, a great essay on the development of democracy in America would be weakened if you did not know the year the Constitution was ratified! It was in 1788, by the way. So yes, chronology is the easiest way to think about history. But remember to think of the eight themes and try to connect them to the basic facts you learn. For example, when you think of secession, you should know when the Southern states detached (in 1860 and 1861), but you can also connect the American and regional culture theme to explain why: The belief in a distinctly Southern way of life and a refusal to abandon it drove the southern states to secession. In short, understanding the overarching themes will help you to understanding the names and dates you learn. Plus, being able to write about them will take your essays from good to great. The following chapter provides an overview of ap study notes. The source is The American Pageant, one of the best AP American history textbooks. The time periods don't always quite fit with AP's guidelines, which will be true for most textbooks (there are only a few out there written exclusively for APUSH). But we've organized the contours to mostly fit with AP US History's units and breakdown of the timeline. Whether you use The American Pageant or not, these dispositions should provide you with useful summaries that can help you study during the year or in the run-up to the AP exam in May. Unit 1: 1491-1607 (4-6% of exam) Planting of English America: 1500-1733 Unit 2: 1607-1754 (6-8% of exam) Unit 3: 1754 -1800 (10-17% of exam) Unit 4: 1800-1848 (10-17% of exam) Unit 5: 1844-1877 (10-17% of exam) Unit 6 1865-1898 (10-17% of exams) Unit 7: 1890-1945 (10-17% of exams) Unit 8: 1945-1980 (10-17% of Exam) Unit 9: 1980-Present (4-6% of exam) Resurgence of conservatism: 1980-2000 Notice that the textbook chapters fall roughly within apush guidelines for chronology in terms of the amount of time spent on each period. All U.S. history textbooks approved by the College Board will have good coverage of all chronological topics, so if you have chapter guides or notes from your own APUSH class textbook, you can (and should!) use them as well.
